Boyertown Landfill HSCA Site, 300 Merkel Road, Gilbertsville, PA 19525, Douglass Township, **Montgomery County**.

The Department of Environmental Protection (DEP), under the authority of the Hazardous Sites Cleanup Act (HSCA) (35 P.S. §§ 6020.101—6020.1305) has initiated a Prompt-Interim Response at the Boyertown Landfill HSCA Site (Site). This response has been initiated pursuant to Sections 501(a) and 505(b) of HSCA (35 P.S. §§ 6020.501(a) and (b)). The Site is located in Douglass Township, Montgomery County, PA.

The Site consists of a landfill located at 300 Merkel Road and the surrounding area. The area primarily consists of residential properties, an apartment complex, a few commercial properties, and agricultural land. To date, six residential potable wells have been affected by per- and polyfluorinated Substances (PFAS), and one PFAS, perfluorooctanoic acid (PFOA) was detected above its Maximum Contaminant Level (MCL) in all six wells. These residents with contaminated wells are receiving or have been offered bottled water service.

To address the release and threat of release of PFAS at the Site and corresponding threats to human health, DEP installed, and will maintain for the duration of its drinking water investigation at the Site, point-of-entry treatment systems. This response complies with Applicable, Relevant and Appropriate Requirements (ARARs), is feasible, and cost-effective. Other alternatives considered were no action, and the continued delivery of bottled water.

This notice is being provided pursuant to Section 506(b) of HSCA. The Administrative Record which contains the information that forms the basis and documents the selection of this response action is available for public review and comment. The Administrative Record is lo-

cated at DEP's Southeast Regional Office at 2 East Main Street, Norristown, PA 19401, and is available for review Monday through Friday from 8:00 am until 4:00 pm. Those interested in examining the Administrative Record at DEP's office should contact Colin R. Wade at 484.250.5722 or by email at cowade@pa.gov to arrange for an appointment or to request electronic copies of documents in the administrative record. An additional hard copy of the administrative record is available for review at Douglass Township Building.

The Administrative Record will be open for comment from May 13, 2023 until August 11, 2023. Any person may submit written comments into the record during this time only, by sending them to Colin R. Wade, Environmental Protection Specialist, at the Pennsylvania Department of Environmental Protection, 2 East Main Street, Norristown, PA 19401 or by email at cowade@pa.gov.

In addition, any person may present oral comments, for inclusion in the Administrative Record, at a public hearing. DEP has scheduled the hearing on June 21, 2023 at 6:30 PM. Any person wishing to present comments must register with Stephanie Berardi a minimum of 24 hours in advance of the hearing by telephone at 484-250-5808, electronic mail at sberardi@pa.gov.

Persons with a disability who wish to attend the hearing and require auxiliary aid, service or other accommodations to participate in the proceedings, should call Stephanie Berardi at 484-250-5808 or the Pennsylvania Hamilton Relay Service at 1-800-654-5984 (TDD) to discuss how DEP may accommodate their needs.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 2

The Following Plans and Reports Were Submitted Under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department of Environmental Protection (DEP) to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, please contact the Regional Office Program Manager previously listed in the notice.

Individuals in need of accommodations should contact DEP through the Pennsylvania Hamilton Relay Service at (800) 654-5984 (TDD users) or (800) 654-5988 (voice users).
