Re: Point-of-entry Treatment System Offer
Boyertown Landfill HSCA Site
Douglas Township, Montgomery County

Dear Mr. and Ms. Parastino:

Pennsylvania's Department of Environmental Protection (DEP) has been investigating drinking water contamination in your community. You are receiving this letter because your drinking water had levels of perfluorooctanoic acid (PFOA) above its Maximum Contaminant Level (MCL) of fourteen (14) micrograms per liter, established pursuant to the Pennsylvania Safe Drinking Water Act.

In order to address the PFOA contamination, DEP is proposing to install and maintain a point-of-entry-treatment system (POET system). The POET system will be installed at DEP's expense, and DEP will maintain it for the duration of its drinking water investigation.

In order to install the POET system, DEP requires a signed Consent for Access and Right of Entry form to provide us and our contractors with access to your property. A Consent for Access form is enclosed, as well as a self-addressed envelope for returning the signed form. Please return the form to me by **April 6, 2023**. Upon receipt of your signed form, you will be contacted so that an initial appointment can be scheduled to inspect your home so the POET system can be designed to fit in the available space. The POET systems must be installed in a space that is not subject to freezing. Once the POET system has been installed and verified to be removing the PFOA below its MCL from your water, DEP will cease delivering bottled water to your home.

If you have any questions, please feel free to contact me at cowade@pa.gov or 484.250.5722.

Sincerely,

Colin R. Wade
