DEPARTMENT OF ENVIRONMENTAL
PROTECTION

Mission Statement

The Department of Environmental Protection's mission is to protect Pennsylvania's air, land and water from pollution and to provide for the health and safety of its citizens through a cleaner environment. We will work as partners with individuals, organizations, governments and businesses to prevent pollution and restore our natural resources.

www.dep.state.pa.us

Local Government Support at DEP

The Department of Environmental Protection's (DEP) **Local Government Liaisons** are responsible for creating effective partnerships with local governments, municipal associations, economic and industrial development associations and the business community in collaboration with the Department of Community and Economic Development and the Governor's Office. Consistent with the Governor's focus on brownfield redevelopment and job creation, this office is also responsible for coordinating and promoting initiatives to foster a climate of economic growth while balancing complex environmental issues.

Local Government Liaisons assist local government officials, their associations, businesses, and local economic and redevelopment agencies by:

- Providing customer service regarding environmental concerns;
- Promoting effective communications;
- Fostering innovative problem-solving; and
- Furthering the overall goals of the DEP.

DEP Regional Local Government Liaisons Directory

Northeast Region, Wilkes-Barre Office

- Serving Carbon, Lackawanna, Lehigh, Luzerne, Monroe, Northampton, Pike, Schuylkill, Susquehanna, Wayne and Wyoming counties.

Environmental Cleanup & Brownfields

Bureau of Environmental Cleanup and Brownfields

The Bureau of Environmental Cleanup and Brownfields was established in 2011 within the Office of Waste, Air, Radiation and Remediation. This bureau coordinates environmental cleanup activities in the department's storage tank, site remediation and Act 2 land recycling programs.

The structure incorporates all aspects of site cleanup to mirror environmental cleanup programs statewide. The bureau focuses DEP's efforts to redevelop more sites and attract investment opportunities, securing Pennsylvania as a leader in brownfield redevelopment.

Pa. Brownfields Inventory

DEP and the Team Pennsylvania Foundation have developed an online directory. It provides important information on the size,

location and availability of sites in every corner of the state.

Visit: <http://new.pasitesearch.com/brownfields.aspx>. To list your site in the directory, email Team PA's Jim Neuschwander at jim@teampa.com or call 717-233-1375

Environmental Cleanup & Brownfields

NEW! Brownfield Development Guide

The Brownfield Development Guide draws on DEP's 18 years of experience in cleaning up more than 4,760 sites and outlines the full spectrum of services and resources available for the often complex steps involved in redeveloping brownfield properties.

It seeks to assist a broad audience of private industry, state and local agencies, economic development agencies and redevelopment authorities, local officials, communities, property owners, developers and other stakeholders. DEP fosters and helps to build public-private partnerships, which have proven critical for the timely completion of successful projects.

About Your DEP Regional Office

The following lists the major program areas within DEP's regional offices. It is designed to familiarize you with the duties and responsibilities of DEP regional offices and will help you to determine who to contact at DEP for information or assistance. You will find a directory of contacts for each DEP regional office immediately following this section.

Regional Director – Directs and oversees all environmental programs in the DEP regional office, with the exception of the Oil and Gas Program.

Assistant Regional Director – Assists the director in the overall management of regional DEP activities. The Assistant Regional Director also coordinates all multi-program and inter-program activities, economic development projects and pre-application meetings.

Local Government Liaison – Serves as a point of contact for local and regional government and economic development officials to provide information and assistance. Promotes effective communication and collaborative problem-solving among DEP staff and the regulated community.

Community Relations Coordinator – Serves as the point of contact for news organizations, community and special interest groups, and the general public.

Environmental Advocate – Fosters relationships among environmental justice communities, industry and DEP. Promotes public involvement during and after the permitting process. Works to engage communities traditionally removed from the decision-making process. Supports DEP's community revitalization efforts and environmentally-friendly economic development.

Regional Legal Counsel – Provides legal advice and litigation support to DEP regional office staff as they implement and enforce environmental laws and regulations. Serves as the point of contact for attorneys concerning any matter involving DEP regional offices.

Emergency Response Program – Oversees dispatch and response of DEP's emergency resources during environmental emergencies, accidents and disasters. This team can be contacted 24 hours-a-day, seven days a week.

About Your DEP Regional Office

Service Representative – Serves as a point of contact for the public and provides general information. Receives and logs complaints about environmental incidents or issues over which DEP has authority to regulate, except for incidents relating to mining. Dispatches staff from the proper DEP programs to investigate environmental complaints. Alerts local governments or other agencies and authorities of environmental incidents when appropriate, and makes referrals for issues outside the DEP's purview.

Office of the Great Lakes – Represents Pennsylvania in Great Lakes matters at the local, national and international levels. Provides a variety of services to community groups involved with matters regarding the Great Lakes and Lake Erie. Located in DEP's Northwest Regional Office in Meadville.

Office of Pollution Prevention and Energy Assistance – Provides technical, financial and administrative assistance to help organizations and businesses identify and implement energy efficiency, renewable energy, pollution prevention, recycling and green technology programs.

Air Quality Program – Processes air quality plan approvals and operating, Title V and state-only operating permits. Inspects sources of air pollution from industry and businesses, handles air-related complaints, asbestos notifications and, when appropriate, conducts inspections at asbestos removal sites. Takes enforcement action as needed for non-compliance with air pollution laws and regulations.

Environmental Cleanup and Brownfields Program – Oversees assessments, monitoring plans and remediation of contaminated land, implements the Hazardous Sites Cleanup Act, the Land Recycling and Environmental Remediation Standards Act and the Storage Tank and Spill Prevention Act and provides assistance to redevelop former industrial brownfields.

Waste Management Program – Regulates the transportation, storage and disposal of waste by fulfilling the mandates of Acts 97, 101 and 108 for the planning and regulation of municipal, residual and hazardous wastes from the time they are generated until disposal. Works with local and county officials, business, industry, and environmental and citizens' groups to ensure that all waste is properly managed.

About Your DEP Regional Office

Clean Water Program – Implements the federal Clean Water Act and state Clean Streams Law. The program has four major components: the implementation of Act 537, issuance of NPDES permits (including surveillance, compliance and enforcement responses to violations); the implementation of the state water quality management permitting portions of the program; stream monitoring and assessment activities including Total Maximum Daily Loads; and provides technical and financial assistance to wastewater treatment facilities.

Safe Drinking Water Program – Implements Pennsylvania’s Safe Drinking Water Program under federal and state laws through monitoring, inspection and permitting of public water systems. The program also is responsible for implementing the state Water Allocation Program through permits. This program conducts source water assessment and protection plan reviews and assists with drought monitoring, reporting and management activities during drought emergencies proclaimed by the Governor. It also provides technical assistance and financial services to drinking water systems.

Waterways and Wetlands Program – Implements the provisions of the Dam Safety and Encroachments Act, as well as companion federal programs, regulations and requirements relating to waterways and wetlands through delegated authorities and regulations. Implements nonpoint source abatement activities under the Pennsylvania Clean Streams Law, Nutrient Management Act and Conservation District Law; and provides assistance to conservation districts and other organizations to prevent pollution and restore streams and lakes to meet designated uses. Staff also perform monitoring and inspections, as well as periodically inspecting activities permitted under Chapters 102 and 105. The program assists in the implementation of county and watershed stormwater plans developed under Act 167 through technical guidance to counties, local governments and the public.

About Your DEP Regional Office

Oil and Gas Program – Issues permits and conducts inspections to ensure compliance with Pennsylvania’s Oil and Gas Act. Regulates drilling, the alteration and plugging of oil and gas wells, and related activities. Responsible for all environmental issues relating to the exploration, development and production of oil and natural gas, including the protection of individual and public water well supplies. The Oil and Gas Program is co-located in the Northwest Regional Office, to cover northwestern Pennsylvania; the Southwest Regional Office, to cover southwestern Pennsylvania; and the Northcentral Regional Office to cover central and eastern Pennsylvania.

Radiation Protection Program – Promotes radiation safety and compliance with state and federal regulations for all users of X-ray producing machines and radioactive material throughout Pennsylvania. In cooperation with the Federal Food and Drug Administration, inspects mammography facilities to promote strict quality standards for facilities performing breast radiography for cancer screening. Maintains a strict licensing standard for accelerator facilities used to treat cancers and conduct industrial radiographic operations. Safety of these operations is enhanced through an inspection and investigation program. In conjunction with waste management, the program monitors Pennsylvania landfills for the unintentional disposal of radioactive material by ensuring that all waste processors maintain radiation detection systems and response plans capable of detecting radiation sources in the waste stream. Also maintains a quick response capacity to react to incidents at the state’s nuclear power facilities by assembling teams to monitor unintentional radiation releases. The program also certifies Radon mitigators, testers and laboratories to ensure they meet quality standards necessary to safely serve consumers.

District Offices – Serves as satellite locations at the farther reaches of DEP regions. Inspectors and other staff assigned to perform fieldwork in these areas are often stationed at the district offices. Inspectors also may be stationed at the DEP regional office or DEP district mining offices for faster access to their assigned field areas. District mining offices oversee the permitting and inspection of coal and industrial minerals extraction and quarry operations. They also accept complaints related to mining issues.

DEP Office of Oil & Gas Management

The Office of Oil and Gas Management is responsible for the statewide oil and gas conservation and environmental programs to facilitate the safe exploration, development and recovery of Pennsylvania's oil and gas reservoirs in a manner that will protect the commonwealth's natural resources and the environment. The office develops and implements policy and programs for the regulation of oil and gas development and production pursuant to the 2012 Oil and Gas Act, Coal and Gas Resource Coordination Act and the Oil and Gas Conservation Law; oversees the oil and gas permitting and inspection programs; develops statewide regulations and standards; conducts training programs for industry; and works with the Interstate Oil and Gas Compact Commission and the Oil and Gas Technical Advisory Board. For bureau director contact information, please see the DEP Central Office Directory section on pages 6-8.

Bureau of Oil and Gas Planning and Program Management

This bureau develops regulations, policies and technical guidelines, as well as manages various components of the oil and gas regulatory program including well pad development, storm water management, waste disposal and reuse, pollution prevention, spill response and clean up, well site restoration, resource conservation and development, underground gas storage reservoirs, coal and gas coordination issues, coal bed methane development and well construction standards. It is also responsible for developing and conducting outreach and training for all oil and gas staff, industry representatives and the general public. The bureau also implements the abandoned/orphaned well plugging program, and develops and maintains information on well production and activities.

Bureau of District Oil and Gas Operations

The Bureau of District Oil and Gas Operations is responsible for the implementation of the Oil and Gas Program statewide. Program staff is responsible for permitting, inspections and enforcement of all environmental regulations governing the exploration, development and production of oil and natural gas, including the protection of individual and public water supplies. The bureau also provides guidance to oil and gas well operators and the public regarding DEP's environmental protection programs.

Contact the Southwest District Oil and Gas Office if you are in the Southwest.
Contact the Northwest District Oil and Gas Office if you are in the Northwest.
Contact the North-central District Oil and Gas Office if you are in the North-central, Northeast, South-central or Southeast areas.
For all other permit applications, please contact your regional office.

Statewide Environmental Hotline

To report any cases of suspected water contamination that may be associated with the development of oil and gas resources or any other environmental complaint, please call 1-866-255-5158.

DEP Active & Abandoned Mine Operations

The Office of Active and Abandoned Mine Operations is responsible for the policies and implementation of programs that regulate or impact mineral extraction, including industrial minerals and coal. It consists of four bureaus with distinct, yet interrelated program responsibilities. For bureau director contact information, please see the DEP Central Office directory section on pages 6-8. Three of the bureaus have field offices located across the commonwealth. Please see the contact information below.

Bureau of District Mining Operations Offices and Directory

The Bureau of District Mining Operations includes six district offices that oversee Pennsylvania's active mining program. Their duties include licensing, bonding, permitting and inspecting all surface and underground anthracite and bituminous coal mines, coal preparation plants, coal refuse disposal and industrial mineral quarries. The staff also concentrates on industry compliance assistance and all aspects of pollution prevention advocacy.

Pottsville District Mining Office

DEP Financial and Technical Assistance

A. ADVANCED & ALTERNATIVE ENERGY/ ENERGY EFFICIENCY

1. Pennsylvania Energy Development Authority (PEDA)

PEDA is an independent public financing authority that finances clean, advanced energy projects in Pennsylvania. Projects that may qualify for funding from the authority include solar energy, wind, low-impact hydropower, geothermal, biomass, landfill gas, fuel cells, IGCC, waste coal, coal-mine methane and demand management measures. Tax-exempt and taxable bond financing alternative energy projects also are available through the Pennsylvania Economic Development Financing Authority.

Contact: Dave Altoff, Acting Director, DEP Office of Pollution Prevention and Energy Assistance at 717-772-5942 or visit www.dep.state.pa.us, keyword PEDA .

2. Alternative Fuels Incentive Grant (AFIG)

AFIG was established under Act 166 of 1992. Its primary goals are to improve Pennsylvania's air quality and reduce consumption of imported oil through the use of homegrown, alternative fuels that will help the state's economy and environment. The AFIG program allows DEP to offer a wide range of incentives to eligible applicants for innovative, advanced fuel and vehicle technology projects resulting in cleaner advanced transportation within the commonwealth. Potential projects include: retrofitting fleet vehicles to operate on alternative fuels, incremental cost of the purchase of a bi-fuel, dual-fuel hybrid or dedicated fleet vehicle, costs to install fleet refueling equipment for dedicated vehicles, next phase research, training and development related to alternative fuel vehicles, incremental cost to purchase biofuel, purchase and install refueling equipment for biofuel for school districts, municipal authorities, political subdivisions and non-profits, and reimbursement of up to 10 cents per gallon of renewable fuels produced in a calendar year up to 12.5 million gallons. AFIG application opportunities for some or all of the eligible projects above will be announced on DEP's website at www.dep.state.pa.us, keyword: Alternative Fuels Incentive Grant Program.

Contact: DEP Office of Pollution Prevention and Energy Assistance at 717-783-8411 or via email at epafiginfo@pa.gov.

DEP Financial and Technical Assistance

B. SMALL BUSINESS ASSISTANCE

1. PA Small Business Ombudsman

The Ombudsman's Office provides confidential compliance assistance to small businesses, administers grant and loan programs to help finance energy efficiency and pollution prevention projects for small businesses, and is the primary advocate for small businesses within DEP.

Contact: Jay Moyer, Small Business Ombudsman at 717-783-8411 or visit www.dep.state.pa.us, keyword: Ombudsman.

2. PA Small Business Development Centers – Environmental Management Assistance Program (EMAP)

The Small Business Environmental Assistance Program, currently managed through the Pennsylvania Small Business Development Centers (SBDCs) EMAP, provides free, confidential environmental assistance to small business owners through a toll-free hotline and on-site visits. The SBDCs also provide assistance with permit applications, grant loan applications, emissions calculations and regulatory paperwork or plan approvals. They can refer the small business to general business and financial assistance professionals if appropriate. The SBDC's EMAP staff is located at 18 college and university-based centers around the state. Information is available by calling 1-877-ASK-EMAP or through www.askemap.org.

3. Small Business Advantage Grants

This program funds Pollution Prevention and Energy Efficiency projects for small businesses in Pennsylvania. The grant provides a 50 percent matching share and will fund up to \$7,500 of the eligible project costs. If funding remains available, the next grant round for the Small Business Advantage Grant will open after July 2012. For additional information visit www.dep.state.pa.us, keyword: SBAdvantage.

DEP Financial and Technical Assistance

4. Small Business Pollution Prevention Assistance Account (PPAA) Loan Program

PPAA provides low-interest loans to small businesses purchasing equipment that increases energy efficiency or reduces waste and/or pollution. Loans will be used to fund up to 75 percent of the total eligible project cost. The maximum loan amount is \$100,000. The loan interest rate is fixed at two percent and has a maximum term of 10 years. This funding can help small businesses increase the economic benefits of preventing pollution and using energy more efficiently in their operations. For additional information visit www.dep.state.pa.us, keyword: PPAA.

5. Emerging Technology Applications Center (ETAC)

ETAC helps small businesses gain a competitive advantage by applying alternative technologies to improve heating, drying, coating and curing processes, as well as reducing their energy usage and carbon footprint. ETAC helps businesses research new equipment, materials and processes before making large investments or production changes. For more information visit www.northampton.edu.

C. COASTAL ZONE & CHESAPEAKE BAY PROTECTION

1. Chesapeake Bay Special Project Program

The purpose of this grant program is to protect and improve water quality by reducing the amount of nitrogen and phosphorous in the Chesapeake Bay, specifically by implementing best management practices. The program is open to landowners in pre-designated areas of 38 counties within Pennsylvania's Susquehanna or Potomac river basins - also known as the Chesapeake Bay watershed. Landowners must apply to their county conservation district for funding.

Contact: DEP's Bureau of Conservation and Restoration at 717-5267 or visit www.dep.state.pa.us, keyword: Chesapeake Bay.

DEP Financial and Technical Assistance

2. Streambank Fencing Program

Under this program, DEP covers all costs associated with the installation of high tensile fence and crossings/ramps, as well as off stream watering for landowners with existing livestock operations along streams in the Susquehanna or Potomac river basins in Pennsylvania.

Contact: Tom Juengst, DEP's Bureau of Conservation and Restoration at 717-772-5646 or via email at tjuengst@pa.gov for more information. Information and assistance may also be obtained through county conservation district offices in the Chesapeake Bay watershed.

3. Coastal Resource Management Program

The National Oceanic and Atmospheric Administration provides funding for this program, which provides funding and technical assistance to implement studies, plans, designs, programs, land acquisition, research and minor construction projects within the Delaware Estuary and Lake Erie coastal zones as well as select Chesapeake Bay drainage areas. Grant proposals are typically solicited in September and October of each year. Eligible applicants include political sub-divisions, registered non-profit organizations and schools, colleges and universities. Certain restrictions apply.

Contact: Don Benczkowski, DEP's Coastal Resource Management Program at 717-772-4785 or via email at dbenczkowski@pa.gov or visit www.dep.state.pa.us, select DEP Programs A - Z and select Coastal Zone for more information.

D. WATERSHED PROTECTION & RESTORATION

1. Growing Greener

Growing Greener authorizes DEP to allocate funding for grants to address acid mine drainage abatement, mine cleanup efforts, abandoned oil and gas well plugging and local watershed-based conservation projects. Growing Greener supports local projects to clean up non-point sources of pollution throughout Pennsylvania. These projects may include watershed assessments and

DEP Financial and Technical Assistance

development of watershed restoration or protection plans, implementation of watershed restoration or protection projects (stormwater management wetlands, riparian buffer fencing and planting, stream bank restoration and agricultural BMPs), construction of mine drainage remediation systems, reclamation of previously mined lands, and demonstration/education projects and outreach activities. Eligible applicants include counties, municipalities, authorities, councils of government, county conservation districts, watershed organizations, and other organizations involved in the restoration and protection of Pennsylvania's environment.

Contacts: DEP regional office's Watershed Manager has information about potential grant projects (see below). For contact information, see the DEP Regional Offices Directory on page 14. For statewide program information, contact the Bureau of Conservation and Restoration at 717-787-5267. For a copy of the grant application package, contact the DEP Grants Center at 717-705-5400.

Northwest Region - Tim Bruno, 814-332-6917

Southwest Region - Jeff Fliss, 412-442-4207

North-central Region – Jason Fellon, 570-327-3593

South-central Region - Jineen Boyle, 717-705-4916

Northeast Region - Ron Yablonsky, 570-826-2509

Southeast Region - Dave Burke, 484-250-5822

2. Stream Improvement Program

The Stream Improvement Program reviews flooding and erosion problems directly affecting permanently occupied structures, businesses, and industrial buildings when funding is available. The Stream Improvement Program will design and oversee the construction of eligible remedial projects to alleviate flooding and erosion problems. Projects require a sponsor which must be a municipality, conservation district, or other local or county governmental agency. Project sponsor duties include acquiring rights-of-entry for project construction and maintaining the completed project. The program also may enter into a cooperative agreement with the project sponsor so that the

DEP Financial and Technical Assistance

the funding for the project is paid to the sponsor after project completion. The sponsor oversees contract administration and project construction.

Contact: Bill Kcenich, DEP's Bureau of Waterways Engineering at 717-783-0369 or via email at wkcenich@pa.gov for assistance or more information.

3. Non-point Source Implementation Program

Provides funding for projects that address restoration of impaired waters or protection of high quality waters through implementation, education, monitoring, demonstration or innovative practices to control or reduce non-point sources of pollution. Applications are solicited through the Growing Greener program. See "EPA Section 319 Non-point Source Grant" in the current Growing Greener application package for the list of priorities for funding.

Contact: DEP's Bureau of Conservation and Restoration at 717-787-5267 for more information.

4. Dirt , Gravel and Low Volume Road Maintenance Program

Act 89 of 2013 was signed into law on Nov. 25, 2013. The act created the Dirt, Gravel and Low Volume Road Maintenance program, that is intended to fund safe, efficient and environmentally sound maintenance of dirt, gravel and low-volume roads. Act 89 of 2013 provided \$28 million to fund the program. Details concerning the distribution of those funds are under development.

Contact: State Conservation Commission (717) 787-2103, the county conservation district or the Center for Dirt & Gravel Road Studies at 1-866-668-6683 or visit www.dirtandgravelroads.org for more information.

DEP Financial and Technical Assistance

5. Abandoned Mine Drainage (AMD) Abatement and Treatment

This program works to identify, assess, evaluate, prioritize and implement projects that will reduce the impacts of AMD to Pennsylvania's streams and rivers. The program uses federal OSM set-aside, growing greener, and federal 319 nonpoint source funding to implement projects across the bituminous and anthracite coal regions of the Commonwealth. The program also operates several large volume active AMD treatment plants.

Contact: DEP's Bureau of Conservation and Restoration's (BCR) bituminous operations in the Cambria District Office at 814-472-1800 or the BCR's anthracite operations in the Wilkes-Barre District office at 570-826-2371.

FLOOD PROTECTION & STORMWATER MANAGEMENT

1. Federal Flood Protection Project Assistance to Local Project Sponsors

The purpose of this program is to assist federal flood protection project sponsors in funding non-federal costs of federal flood protection projects approved for design and construction. A 50 percent match is required.

Contact: DEP's Bureau of Waterways Engineering and Wetlands at 717-787-3411 for more information.

2. Commonwealth Financing Authority (CFA) Flood Prevention Funding

The Act 13 Marcellus Legacy Fund provides funding to the Commonwealth Financing Authority to provide critical resources to local governments for flood mitigation and environmental conservation projects. Under the Flood mitigation guidelines, funding is available to: acquire land, rights-of-way and easements necessary to construct eligible projects. Eligible projects include construction, improvement, expansion, repair or rehabilitation of flood control projects; engineering costs; inspection costs; and permitting fees. *Contact 1-866-466-3972 or visit www.newPA.com.*

DEP Financial and Technical Assistance

3. Stormwater Management Planning and Implementation Grants and Reimbursements

Stormwater Management Planning and Implementation is the responsibility of the six regional offices.

Stormwater Management Planning and Implementation Grant Reimbursements (if funding is available from legislature) is the responsibility of the Bureau of Point and Non-Point Source Management.

Contact: Ron Furlan, DEP Bureau of Point and Non-Point Source Regulation at 717-783-5017 or via email at banewman@pa.gov or visit DEP's website at www.dep.state.pa.us, keyword: Stormwater, and click on "General Information" for more information.

WATER & WASTEWATER SYSTEMS OPERATOR SUPPORT

1. Operator Certification Program

DEP and the State Board for Certification of Water and Wastewater Systems Operators administer the Operator Certification Program. Most drinking water or wastewater systems require a certified operator.

Contact: DEP's Bureau of Safe Drinking Water at 717-787-5236 or by email at csansoni@pa.gov or visit www.dep.state.pa.us, keyword: Operators.

2. EarthWise Academy

DEP's EarthWise Academy allows DEP-certified water and wastewater operators to take online courses that count towards their continuing education requirements. Operators may also check their continuing education course transcripts and search the catalog of all Pennsylvania DEP-approved operator training courses.

Contact: DEP's Bureau of Safe Drinking Water, training section, at 717-787-0122 or visit www.dep.state.pa.us, keyword: EarthWise Academy for more information.

DEP Financial and Technical Assistance

3. Drinking Water & Wastewater Outreach On-Site Technical Assistance

This program provides hands on technical, managerial and financial assistance, at no charge for systems throughout Pennsylvania. This non-regulatory program has a team of professionals that can provide assistance on process control, operations and maintenance, asset management, energy efficiency, safety and computerization.

Contact: For wastewater assistance contact Tom Brown with the Bureau of Point and Non-Point Source Management at 814-472-1900 or by email at thbrown@pa.gov.

For drinking water contact Jerry Yeasted with the Bureau of Safe Drinking Water at 570-621-3488 or by email at jyeasted@pa.gov.

DRINKING WATER MANAGEMENT

1. Source Water Assessment and Protection Program (SWAP)

This program helps municipalities or community water systems assess the susceptibility of public drinking water sources to pollution. Source water protection programs are locally designed, voluntary efforts to protect drinking water sources used by community water systems based on the results of the state provided source water assessment. SWAP provides technical support and funds the development and start-up of source water protection programs to protect drinking water sources. These programs usually involve wellhead protection for groundwater sources or watershed protection for surface water sources or both. Source water protection efforts are designed to provide public health and economic benefit by preventing costly contamination of community drinking water sources. They also complement watershed protection and management through sound land-use planning and pollution prevention activities.

Contact Parimal Parikh, Bureau of Safe Drinking Water at 717-772-4048 or by email at pparikh@pa.gov or visit www.dep.state.pa.us, keyword: Source Water Protection.

DEP Financial and Technical Assistance

2. Drinking Water Infrastructure Assistance

The Pennsylvania Infrastructure Investment Authority (PENNVEST) provides low-interest loans for design, engineering and construction of public water system infrastructure for communities in need of clean drinking water. Interest rates are typically between one to 3.5 percent depending on the service area and the resulting user rates. Repayment term is typically 20 years.

Contact: Lou Buffington, PENNVEST at 717-787-8138 or visit www.pennvest.state.pa.us for more information.

WASTEWATER / SEWAGE MANAGEMENT

1. Wastewater Infrastructure Assistance

The PENNVEST provides low-interest loans for design, engineering and construction of public/private wastewater system infrastructure for systems that have projects that impact water quality. Interest rates are typically between 1 and 3.5 percent depending on the service area and resulting user rates. The repayment term typically is 20 years.

Contact: Lou Buffington, PENNVEST at 717-787-8138 or via email at lbuffingto@pa.gov or visit www.pennvest.state.pa.us for more information.

2. On-lot Sewage Disposal Funds

PENNVEST provides low-cost financing for wastewater systems across the commonwealth. Eligible projects include rehabilitation, improvement, repair or replacement of an existing system located on a single family, or owner-occupied property that is the primary resident of the owner. Project costs may include construction fees and costs, permit fees, loan origination fees and legal fees. To be eligible, family income must not exceed 150 percent of the statewide median household income, adjusted annually for inflation.

Contact: Lou Buffington, PENNVEST at 717-787-8138 or via email or visit www.pennvest.state.pa.us for more information.

DEP Financial and Technical Assistance

3. Act 537 Funding

Act 13 Marcellus Legacy Fund will provide funding to the Commonwealth Financing Authority to assist municipalities with Act 537 municipal planning and enforcement. CFA is still developing the criteria for program implementation.

For the latest information, visit www.newPA.com or call 1-866-466-3972.

ENVIRONMENTAL CLEANUP AND BROWNFIELDS

1. Act 32 - Underground Heating Oil Tank Cleanup Program

This program provides reimbursement for owners of underground storage tanks with a capacity up to 3,000 gallons and used for storing heating oil for consumption on the storage premises, in order to reduce the costs of corrective action in response to a release. The release must have occurred on or after Jan. 30, 1998. Reimbursement is limited to the actual costs of corrective action or \$4,000, whichever is less, and the owner must pay a \$1,000 deductible. Legislation extends the funding provision for this program through June 2017.

Contact: DEP'S Bureau of Environmental Cleanup and Brownfields, Division of Site Remediation at 717 7870886 or via email at tankcleanup@pa.gov or visit www.dep.state.pa.us, keyword: Underground Heating Oil Tank Cleanup Reimbursement Grant Program for more information.

2. Pump & Plug Program (Pollution Prevention Reimbursement)

This program provides reimbursement of up to \$2,500 per regulated tank to eligible tank owners with six or fewer regulated underground storage tanks (USTs) in Pennsylvania. The tanks must be regulated underground tanks that have not been upgraded to comply with technical requirements of federal and state regulations and that are registered with DEP prior to tank closure. This program covers pumping regulated product out of the tank, disposal of the product, tank cleaning and grouting the fill pipe. It does not include costs associated with tank removal or closure, site assessment or remediation.

DEP Financial and Technical Assistance

Contact: DEP'S Bureau of Environmental Cleanup and Brownfields, Division of Storage Tanks, at 717-772-5599 or via email at tanks@pa.gov. Additional information may also be found on DEP's website (click on 'DEP Programs A-Z', then 'Storage Tanks', then 'Pump and Plug Program').

3. Industrial Sites Reuse Program

The Industrial Sites Reuse Program provides grants and low-interest loans for environmental assessments and remediation. The program is designed to promote cleanup of environmental contamination at industrial sites, thereby bringing blighted land into productive reuse. Public entities, private nonprofit economic development entities and companies that are involved in the reuse of former industrial land and did not cause or contribute to its environmental contamination are eligible for grant and/or low-interest loan financing to perform phase I, II and III environmental site assessments and remediation of hazardous substances. Applicants can receive grants and loans up to \$200,000 for environmental assessments and up to \$1 million for remediation. The loan interest rate is two percent, terms are up to five years for assessments and 15 years for remediation projects, and a 25 percent match is required for both grant and loan projects.

4. Underground Storage Tank Indemnification Fund

The release of regulated substances stored in USTs poses a threat to the public health and safety of both the environment and the commonwealth's citizens. The U.S. Environmental Protection Agency and DEP have regulations governing the construction, upgrade and operation of USTs. The regulations also establish eligibility requirements in the event that a UST leaks. The Storage Tank and Spill Prevention Act created the Underground Storage Tank Indemnification Fund to assist owners and operators in meeting the EPA's

DEP Financial and Technical Assistance

financial responsibility requirement. The fund makes claim payments to eligible underground storage tank owners or operators for damages caused by a release from their tank. To be eligible, the release must have occurred on or after Feb. 1, 1994. There are eligibility requirements. The fund indemnifies tank owners for third-party liability that may occur when the release from a tank has injured another person or that person's property. Claim payments to eligible owners or operators shall be limited to the actual costs of corrective action and third-party liability. Payments shall not exceed an annual aggregate of \$1.5 million for each owner and operator. The per-occurrence limit is set at \$1.5 million. Claims are subject to a deductible of \$5,000 per tank. The fund is administered by the Pennsylvania Insurance Department.

Contact: The Pennsylvania Insurance Department at 717-787-0763, via email at rustif@pa.gov, or on the website at www.insurance.pa.gov.

5. PENNVEST Non-Point Source Pollution Projects to Protect Water Quality

The PENNVEST provides low-interest loans for designing, engineering and constructing of non-point source projects, including brownfield sites, that demonstrate a water quality benefit. Interest rates are typically between 1 and 3.5 percent depending on the service area and the resulting user rates. Repayment term can be as long as 20 years.

Contact: Lou Buffington, PENNVEST at 717-787-8138 or via email at lbuffingto@pa.gov or visit www.pennvest.state.pa.us.

WASTE MANAGEMENT/RECYCLING

1. Recycling Technical Assistance Program

The purpose of the program is to upgrade recycling programs to meet or exceed the commonwealth's 35 percent recycling goal. DEP, the Governor's Center for Local Government Services, the Pennsylvania State Association of Township Supervisors and the Solid Waste Association of North America have formed this training partnership for Pennsylvania's local governments interested in achieving higher recycling levels. Recycling technical assistance,

DEP Financial and Technical Assistance

up to a value of \$7,500, is available at no charge to Pennsylvania local governments selected to participate.

Contact: Todd Pejack, DEP's Bureau of Waste Management at 717-787-7382 or via email at tpejack@pa.gov or visit www.dep.state.pa.us, keyword: Recycling Technical Assistance.

2. Municipal Waste Planning Grant – Act 101, Section 901

Counties are eligible for 80 percent reimbursement for preparation of waste management plans and studies, as well as household hazardous waste education activities required by Act 101. There is no application deadline. The availability of this grant funding is \$2 million annually.

Contact: DEP regional office recycling coordinator to discuss current or potential planning grants.

3. Recycling Development and Implementation Grant Program – Act 101, Section 902

This is a competitive grant program for Pennsylvania municipalities seeking assistance to establish or expand a recycling program. The grant can pay up to 90 percent of the costs of recycling equipment, studies and informational efforts. The available budget is \$15 million annually. The maximum grant award to any one municipality is \$250,000. Applications and submittal deadlines will be published in the *PA Bulletin* and on DEP's website.

Contact: DEP regional office recycling coordinator to discuss the grants.

4. County Recycling Coordinators – Act 101, Section 903

Counties are eligible for reimbursement of 50 percent of county recycling coordinators' salary and expenses. The deadline for application is **April 30** of each calendar year.

Contact: JoAnne Yurcaba, DEP's Bureau of Waste Management, at 717-787-8688 or via email at jyurcaba@pa.gov or visit www.dep.state.pa.us, keyword: Recycling Coordinators Corner.

DEP Financial and Technical Assistance

5. Recycling Performance Grants – Act 101, Section 904

Recycling Program Performance Grants are available to all Pennsylvania local governments with recycling programs. The grant awards are based on the total tons recycled and the applicant's recycling rate. Post-consumer aluminum and steel cans, glass, plastics, corrugated cardboard, newspapers and other marketable grades of paper are materials eligible for the grants. All eligible materials collected from residents, business, schools, colleges, universities and community events can be factored into the grant awards. The deadline for submitting applications is September 30 of each calendar year.

Applicants must retain documentation demonstrating that materials claimed in the application were eligible for the grant, generated within the applicant's boundaries, and were recycled or marketed in the year covered by the application.

Contact: Mark Vottero, DEP's Bureau of Waste Management, at 717-787-7382 or via email at mvottero@pa.gov.

6. Host Municipality Programs

Municipalities that host municipal waste landfills; resource recovery or waste-to-energy facilities; or commercial hazardous waste treatment, storage and disposal facilities are eligible for reimbursement of up to 50 percent of the approved costs for employment of certified host municipality inspectors and may be eligible for reimbursement of costs for independent review of a permit application. Up to \$10,000 in grant money is available to host municipalities for independent review of permit applications pertaining to a new municipal waste landfill, resource recovery facility or expansion of an existing landfill or resource recovery facility. Reimbursements are also available up to \$50,000 to the host municipality and up to \$50,000 to the host county for independent review of permit application for commercial hazardous waste disposal facility or for a permit modification that would result in additional capacity for the facility. Visit www.dep.state.pa.us, keyword: Host Municipality Inspector, for more information or see the following contacts .

DEP Financial and Technical Assistance

Contact: Ali Tarquino Morris, DEP's Bureau of Waste Management at 717-783-2630 or via email at altarquino@pa.gov for more information on host municipality funds for municipal or hazardous waste facility inspectors.

Contact: ra-epmuniresidwaste@pa.gov, or telephone 717-787-7381, for more information on funds for host municipality review of municipal waste activity applications (Act 101).

Contact: Dwayne Womer, DEP's Bureau of Waste Management at 717-787-6239 or RA-HasWaste@pa.gov for more information on host municipality review of hazardous waste activity applications and for information regarding incentives for siting hazardous waste treatment facilities (Act 108).

7. Household Hazardous Waste Collection Program

Household hazardous wastes (HHW) are wastes generated by a household that are hazardous in nature such as oil-based paints and paint-related products, pesticides, pool chemicals, drain cleaners, degreasers and other car-care products as well as end-of-life consumer electronic products. Such consumer waste products, if carelessly managed, can create environmental and public health hazards. Counties, municipalities and other entities engaging in DEP-approved HHW collection and disposal programs may be eligible for up to 50 percent reimbursement of approved costs not to exceed \$100,000 for all collections in a county during a fiscal year.

Contact: Keith Ashley, DEPs Bureau of Waste Management ,at 717-787-7382 or email riashley@pa.gov or visit www.dep.state.pa.us, keyword: Household Hazardous Waste Program.

VECTOR MANAGEMENT

1. Black Fly Suppression Program

Black flies, commonly referred to as gnats, are pests to people as well as wild and domestic animals. The goal of the program is to reduce adult black fly populations to tolerable pest levels during the summer recreational season for

DEP Financial and Technical Assistance

Pennsylvania residents as well as tourists. DEP monitors streams for the presence of fly populations, and then treats selected areas with *Bacillus thuringiensis israelensis*, an environmentally safe, species-specific and naturally occurring soil bacterium to kill human-pest species of black flies before they can mature to the adult stage. Stream flow conditions, water temperatures, species identifications, larval size and counts determine when and where treatment will occur. DEP monitors populations before and after spraying to determine the effectiveness of treatments. Funding for the program comes from a combination of state legislature appropriations and participating county shares. Counties with suspect black fly problems should contact DEP to request a survey of black fly populations. DEP provides an analysis of the problem, and potential cost of participation in the Black Fly Suppression Program.

Contact: Andy Kyle of DEP's Black Fly Suppression Program in Vector Management at 717-346-82341, email akyle@pa.gov or Doug Orr at 717-346-8244, doorr@pa.gov for more information, or call your DEP regional office for concerns or questions specific to your area.

2. West Nile Virus Control Program

Human illness from West Nile virus first appeared in Pennsylvania in 2000. This disease was previously only found in Africa, eastern Europe and west Asia. West Nile virus is vectored by mosquitoes and maintained in the environment by overwintering mosquitoes that had obtained the virus from the previous season. Infected overwintering mosquitoes pass the virus to birds, amplifying the virus in the bird population, providing a reservoir to infect previously uninfected mosquitoes. These infected mosquitoes must be controlled to reduce the risk of human transmission. This cycle will cause the disease to remain in Pennsylvania for the foreseeable future.

To help detect, track and control the virus, the Pennsylvania Departments of Health (DOH), DEP and Agriculture (DOA) developed a comprehensive surveillance program. Pennsylvania's plan has four parts: education, source

DEP Financial and Technical Assistance

reduction, surveillance and control of mosquitoes. DOH conducts laboratory testing to confirm West Nile virus human cases, monitors human outbreak potential from mosquito infection rates, and educates health care providers about the signs and symptoms of West Nile virus. DOA monitors animal populations for signs of the virus, particularly suspected horse cases. DEP developed a mosquito surveillance and control network and works with counties to coordinate mosquito control activities. Thirty counties displaying the highest risk of human illness from West Nile virus are eligible for grant funding to conduct surveillance and control activities. DEP and DOH test mosquito samples to determine the presence of West Nile virus in the mosquito population. DEP tests wild dead birds submitted from county and DEP program staff.

Contact: For more information on the program and its implementation in your area call your local West Nile Coordinator through your county government offices or visit www.westnile.state.pa.us, or your regional DEP West Nile Program Coordinator.

Contact: For information on county grants, contact Matt Helwig or Andy Kyle, DEP Vector Management at 717-346-8238 or via email at mhelwig@pa.gov or akyle@pa.gov.

ENVIRONMENTAL EDUCATION

1. Watershed Protection / Non-point Source Pollution Education Grants

Water Resource Education Network will award 10 to 12 grants of up to \$5,000 each for community-based partnerships to conduct watershed protection education projects that raise awareness and educate Pennsylvania citizens and local officials about their roles as environmental stewards to protect, improve or remediate the watershed from the impacts of nonpoint source pollution also known as polluted runoff.

DEP Financial and Technical Assistance

To encourage awareness of land use impacts on water quality, a municipality is required to be an active partner in the project. Nonpoint source pollution includes: drainage or runoff from resource extraction, abandoned coal mines, oil or gas wells, inadequate erosion control practices during construction, urban runoff, improper agricultural practices such as erosion and sedimentation, nutrient management, pesticide application, improper timber harvesting practices, or failing on-lot septic systems or other abandoned waste disposal sites. Nonpoint source pollution also results from altered hydrology, changing the way water flows through an area, due to impervious surface area and stormwater.

Contact: Julie Kollar, WREN Project Director at 267-468-0555 or via email at juliekwren@verizon.net. More information, including the grant application forms, can be found at http://palwv.org/wren/grants/grants_wren.html.

2. Source Water Protection Education Grants

WREN will award three grants of up to \$7,000 each to initiate a county-wide partnership, known as the Source Water Environmental Education Team (SWEET) that will raise awareness and encourage county public water suppliers and communities to voluntarily implement source water protection in a practical, sustainable way through prevention and risk reduction activities and appropriate land management strategies.

The SWEET team will raise awareness about public water supply areas, potential contaminant sources in local communities, recommended management measures to reduce risk of contamination in source water areas, and provide assistance with contingency planning and emergency response plans in the county.

The goal is to ensure high quality drinking water now and for future generations, and keep water treatment costs down. At least one or more community water systems must be a member of the partnership. Projects are to be conducted between July 1, 2013 and June 30, 2014.

DEP Financial and Technical Assistance

Please check WREN's website for information on additional grant opportunities. Projects are subject to funding availability; therefore opportunities may vary each year.

Contact: Julie Kollar, WREN Project Director at 267-468-0555 or via email at juliekwren@verizon.net. More information, including the grant application forms, can be found at http://palwv.org/wren/grants/grants_wren.html.

3. Environmental Education Grants Program

This program provides financial assistance to schools, colleges and universities, non-profit environmental education organizations and county conservation districts to provide environmental education. Grants are awarded for up to \$3,000 for projects (no match requirement) to address specific topics identified as gaps in the environmental education community.

Contact: *Jack Farster, DEP Environmental Education Center at 717-772-1828 or via email at jfarster@pa.gov. Or, visit DEP's website, click on the Environmental Education link and follow the links to EE Grants.*

4. Environmental Education and Outreach

DEP's environmental education staff facilitates teacher training on energy, water, air, land use and grant writing strategies. Education staff also provides hands-on exhibits, activities and information for youth and adults at community events.

Contact: *Jack Farster, DEP Environmental Education Center at 717-772-1828 or via email at jfarster@pa.gov. Or, visit DEP's website, click on the Environmental Education link and then Contact: DEP Environmental Education to submit a request via email.*

eFACTS on the Web -- Pennsylvania's Environment Facility Application Compliance Tracking System (eFACTS) allows individuals to search for authorizations clients, sites and facilities. Users can also search the database to find inspection and pollution prevention visits as well as inspection results data, including enforcement information when violations are noted. DEP has also provided a name search to use when it is not known if the entity is a client, site or facility. It is **critical** for DEP to provide permitting, inspection and compliance information about individuals, businesses and local governments to the public. These entities are subject to environmental requirements and reporting is a fundamental part of all environmental protection programs. To use eFACTS, visit www.dep.state.pa.us/efacts.

DEP eNOTICE - eNOTICE is DEP's Electronic Notification System. Users can specify updates within eNOTICE by selecting items they wish to receive email notices (eNOTICES) when changes occur in the status of the particular item, or when new items are available for viewing. Items that can be selected include: permit applications, draft technical documents, regulations and Land Recycling Act 2 Notice. To use eNOTICE, visit www.dep.state.pa.us/enotice.

DEP Speakers' Bureau

DEP's Speakers' Bureau connects the department's professional staff with groups that need speakers with environmental expertise for meetings, conferences and other events. If you need a speaker for your event or meeting, fill out the [Speaker Request Form](#) (PDF). DEP will make every effort to accommodate your request. Requests for speakers must be made a minimum of 10 business days in advance of the event. Filling out the form does not guarantee a speaker. This form should not be used to request public meetings and/or hearings. Completed forms should be sent to the Community Relations Coordinator in your area listed on the back of the form. Please note that if you already use DEP employees in informal meetings, without the public and/or media being invited, a Speaker Request Form is not needed.

DEP YouTube Channel

Learn more about many of DEP's programs and success stories like how cleaning up brownfields sites is making a real difference in the quality of life in communities across Pennsylvania.

Calendar of Events

DEP's [Calendar of Events](#) lists all of DEP's official public meetings, hearings, advisory committee meetings or regional roundtable meetings taking place throughout the state. Events can be viewed in a calendar format or list view, or by county.

Pa. County Conservation Districts

In 1945, the conservation district law was passed authorizing the creation of county conservation districts. Today there is a conservation district established in every Pennsylvania county except Philadelphia. Conservation districts implement a variety of programs that address environmental issues unique to their counties. Some examples of these include environmental education, forest management, stormwater management, floodplain management, dirt and gravel roads, nutrient management, the Chesapeake Bay Program, abandoned mine reclamation, biosolids, stream and wetland encroachments, erosion and sedimentation pollution control, agricultural preservation and wildlife management.

Many Pennsylvania county conservation districts have been delegated responsibility from DEP to process general permits authorizing water obstruction and encroachment activities. This delegation bestows these conservation districts with the responsibility for receiving and investigating complaints, verifying compliance or noncompliance with applicable Pennsylvania laws, and referring noncompliance to DEP for follow up.

Each county conservation district has responsibilities under DEP's Erosion and Sedimentation Control (PA Code Title 25, Chapter 102) Program. Conservation districts can have one of three different levels of delegation of responsibilities under this program as follows:

Level I Delegation - Responsibilities include providing information about DEP's Erosion and Sediment Control Program, reviewing and processing of erosion and sediment control permit applications, and reviewing of erosion and sediment control plans.

Level II Delegation - Includes all level I responsibilities, plus the responsibility to conduct complaint investigations and site inspections.

Level III Delegation - Includes level I and II responsibilities, plus enforcement responsibilities such as administrative hearings, equity actions, summary or misdemeanor actions and assessment of civil penalties. In addition to the

Pa. County Conservation Districts

Erosion and Sediment Control (Chapter 102) Program, a number of level II and III conservation districts are also delegated responsibilities for processing National Pollutant Discharge Elimination System permits for stormwater discharges associated with construction activities.

Contact the Pennsylvania Association of Conservation Districts, Inc. or your county conservation district office for more information. A directory is provided on the following pages, as well as at www.pacd.org, where it is updated regularly.
