This list contains the original 660 Study Program Sites. Sixty-eight (68) of these sites were transferred to the Scheduled list. Subsequently three of those sites were resolved and twenty-two (22) of the sites were deferred. Thirty-six (36) sites were directly transferred to the Deferred List while the remaining 555 original Program Sites were Resolved. Study Program Sites were sites that the military components deemed no further action was warranted, but which the Department had not completed their review. The rationale for including sites on this list is provided in Section 2.03 of the Agreement.
