

# API Suggested Diesel Pump Labels

Compliant with EPA 40 CFR 80.570

- Titles of all labels (e.g., Low Sulfur Highway Diesel Fuel) are in 24-point type, Sulfur Level Cap Designations (e.g., [500 ppm Sulfur Maximum]) are in 20-point type, and all other required language is in 14-point type as approved by the EPA.
- Green is chosen as the background for the first two labels because of its strong association with diesel in the gasoline service station network.
- Labels shall be on the upper two-thirds of the pump in a location where they are clearly visible.
- Pumps must be labeled by June 1, 2006.
