DATA DICTIONARY

Column Header	Description
County	The name of the Pennsylvania county where the surface hole location of the well is located.
Municipality	The name of the Pennsylvania municipality where the surface hole location of the well is located.
Operator Name	The organization name designated as the well operator or operator on the permit application or well registration.
Farm Name	The name given to a well by the Well Operator, usually the landowner at the time of permitting, which does not change. The Farm Name and Well Number normally uniquely identify the well for the operator.
Latitude	The latitudinal value, in decimal degrees, for the well.
Longitude	The longitudinal value, in decimal degrees, for the well.
Formation Name	The name of the formation from which the unconventional well production is permitted (e.g., Marcellus, Utica, Helderberg, Mandata, Rhinestreet, Burket, Geneseo).
Horizontal	A yes or no indicator that will represent whether the well is a horizontal well, meaning a well that starts off being drilled vertically but which is eventually curved to become horizontal (or near horizontal) in order to parallel a particular geologic formation, or not. Includes intentionally deviated wells.
API	The American Petroleum Institute (API) well number or API number is a "unique, permanent, numeric identifier" assigned to each well drilled for oil and gas.
Well Permit Number	A unique number assigned by DEP to each well permit application (first 10 digits of the API number).
