Re: Water Obstruction and Encroachment Permit (WOEP) Issuance  
Appalachian to Market II & Armagh & Entriken HP Replacement Project  
DEP Application No. E3883222-003  
APS ID No. 1068987; AUTH ID No. 1405847  
Bethel & Jackson Townships, Lebanon County

Dear Mr. McGaver:

Enclosed is your copy of your State Water Obstruction and Encroachment Permit (WOEP). Please review this permit so that you are aware of the extent of authorization and the conditions that apply to that authorization.

Please be advised that you do not have Federal authorizations for this project and such authorization is required prior to starting your project. In accordance with procedures established with the U.S. Army Corps of Engineers, you will be contacted directly by the Corps regarding Federal Authorization.

In addition to the above-referenced permit authorizations, the permittee has additional responsibilities:

1. **This WOEP is not effective until a copy of the Acknowledgment of Appraisal of Permit Conditions, signed by you, is received by the Department. Any work conducted prior to the Department's receipt of the signed Acknowledgment of Appraisal of Permit Conditions is a violation of the Dam Safety and Encroachments Act and the Clean Streams Law, and you may be subject to fines and penalties.** The Department will provide you with an acknowledgement letter upon receipt of your fully signed Acknowledgment of Appraisal of Permit Conditions.
2. A copy of the Permit, Acknowledgment of Appraisal of Permit Conditions, the Erosion and Sediment Control plan, this Issuance Letter, and any other applicable State and Federal authorizations, must be maintained on site during construction and available at the work site for inspection upon request by any officer or agent of the Department or any other Federal, State, County or Municipal agency.

3. A Completion Report must be submitted to this office within 30 days of completion of the approved project. The Completion Report form must be signed by you and the supervising engineer indicating that the work has been completed as approved.

Any person aggrieved by this action may challenge it in an appropriate legal forum. The state and federal courts are currently split on whether the proper forum to challenge a Department permit, authorization or approval for a facility or activity subject to the Federal Natural Gas Act, 15 U.S.C. § 717 *et seq.*, is the United States Court of Appeals for the Third Circuit or the Pennsylvania Environmental Hearing Board. *See Delaware Riverkeeper Network v. Sec'y, Dep't of Env'tl. Prot.*, 833 F.3d 360 (3d Cir. 2016); *Delaware Riverkeeper Network v. Sec'y, Dep't of Env'tl. Prot.*, 903 F.3d 65 (3d Cir. 2018), *cert. denied*, 139 S. Ct. 1648, 203 L. Ed. 899 (2019) and *Cole v. Dep't. of Env'tl. Prot.*, 1577 C.D. 2019 WL 2420667 (Pa. Cmwlth Ct. June 15, 2021) (Pet. for Allowance of Appeal pending); *West Rockhill Twp. v. Dep't of Env'tl. Prot.*, No. 1595 C.D. 2019 WL 2426014 (Pa. Cmwlth. June 15, 2021) (Pet. for Allowance of Appeal pending).

You should promptly consult with a lawyer on the steps to take if you wish to challenge this action and to best protect your interests.

**IMPORTANT LEGAL RIGHTS ARE AT STAKE. YOU SHOULD SHOW THIS DOCUMENT TO A LAWYER AT ONCE.**

**IF YOU WANT TO CHALLENGE THIS ACTION, YOUR APPEAL MUST BE FILED WITH AND RECEIVED BY THE BOARD WITHIN 30 DAYS OF RECEIPT OF NOTICE OF THIS ACTION.**

If you have additional questions, please contact Nick Rossi at 717.772.5667 or [nicrossi@pa.gov](mailto:nicrossi@pa.gov).

Sincerely,

Domenic Rocco, P.E.

**COMMONWEALTH OF PENNSYLVANIA  
DEPARTMENT OF ENVIRONMENTAL PROTECTION  
REGIONAL PERMIT COORDINATION OFFICE**

**WATER OBSTRUCTION AND ENCROACHMENT PERMIT**

The Department of Environmental Protection "Department", established by the Act of December 3, 1970, P.L. 834 (71 P.S. §§ 510.1 *et seq.*) and empowered to exercise certain powers and perform certain duties under and by virtue of the Act of November 26, 1978, P.L. 1375, as amended by the Act of October 23, 1979, P.L. 204 (32 P.S. §§ 693.1 *et seq.*) known as the "Dam Safety and Encroachments Act"; Act of October 4, 1978, P.L. 851, (32 P.S. §§ 679.101 *et seq.*) known as the "Flood Plain Management Act"; Act of June 22, 1937, P.L. 1987, (35 P.S. §§ 691.1 *et seq.*), known as "The Clean Streams Law"; and the Administrative Code, Act of April 9, 1929, P.L. 177, as amended, which empowers the Department to exercise certain powers and perform certain duties by law vested in and imposed upon the Water Supply Commission of Pennsylvania and the Water and Power Resources Board, hereby issues this permit to:

**Texas Eastern Transmission, LP  
890 Winter Street  
Suite 320  
Waltham, MA 02451**

giving its consent to:

**construct, operate, and maintain water obstructions and encroachments associated with the Lebanon County portion of the Appalachia to Market II Project which includes an approximately 2-mile long, 36-inch diameter pipeline and appurtenant facilities for improving the system reliability and providing additional natural gas to customers in New Jersey. The proposed project impacts in Lebanon County include a total of 26 feet of temporary impacts and 21 feet of permanent impacts to Deep Run (WWF, MF) and tributaries to Deep Run (WWF, MF); 0.14 acres of temporary floodway impacts, 0.09 acres of permanent floodway impacts; 0.48 acres of temporary impacts to PEM wetlands (Other); and 0.22 acres of permanent indirect impacts to PEM wetlands (Other). There is no permanent loss of aquatic resources.**

**The project starts at the existing receiver site off Halfway Drive (Latitude: 40.393475°; Longitude: -76.366350°) and ends at the proposed receiver site off East Rosebud Road (Latitude: 40.405699°; Longitude: -76.332384°), in Bethel and Jackson Townships, Lebanon County.**

If this work authorized by this permit is not completed on or before **December 31, 2027**, this permit, if not previously revoked or specifically extended by the Department in writing, shall become void without further notification.

This permit is issued in response to an application filed with the Department of Environmental Protection on **August 5, 2022**, and with the understanding that the work shall be performed in

accordance with the maps, plans, profiles and specifications filed with and made a part of the application on **April 25, 2023 and July 24, 2023**, subject to the provisions of the Dam Safety and Encroachments Act, the Flood Plain Management Act, the Clean Streams Law, the Administrative Code, the rules and regulations promulgated thereunder and the following conditions and restrictions:

1. The permittee shall sign the Acknowledgement of Appraisal of Permit Conditions thereby expressly certifying the permittee's acceptance of, and agreement to comply with, the terms and conditions of this permit. The permittee shall return a signed copy of the Acknowledgement of Appraisal of Permit Conditions to the Department. Unless the Acknowledgement of Appraisal of Permit Conditions form is completed and filed with the Department, this permit is void.
2. **Work may not commence until a signed copy of the Acknowledgement of Appraisal of Permit Conditions is received by the Department.** Any work authorized by this permit conducted prior to the Department's receipt of a signed copy of the Acknowledgement of Appraisal of Permit Conditions is a violation of the Dam Safety and Encroachments Act and the Clean Streams Law, and you may be subject to fines and penalties pursuant to those Acts.
3. The Department, in issuing this permit, has relied on the information and data which the permittee has provided in connection with this permit application. If, subsequent to the issuance of this permit, such information and data prove to be false, incomplete or inaccurate, this permit may be modified, suspended, or revoked, in whole or in part, and the Department may, in addition, institute appropriate legal proceedings.
4. This permit does not give any property rights, either in real estate or material, nor any exclusive privileges, nor shall it be construed to grant or confer any right, title, easement, or interest in, to, or over any land belonging to the Commonwealth of Pennsylvania; neither does it authorize any injury to private property or invasion of private rights, nor any infringement of Federal, State, or Local laws or regulations; nor does it obviate the necessity of obtaining Federal assent when necessary.
5. The work shall at all times be subject to supervision and inspection by representatives of the Department, and no changes in the maps, plans, profiles, and specifications as approved shall be made except with the written consent of the Department. The Department, however, reserves the right to require such changes or modifications in the maps, plans, profiles, and specifications as may be considered necessary. The Department further reserves the right to suspend or revoke this permit if in its opinion the best interest of the Commonwealth will be subserved thereby.
6. This permit authorizes the construction, operation, maintenance and normal repair of the permitted structures conducted within the original specifications for the water obstruction or encroachment, and in accordance with the regulations of the Department and terms and conditions of this permit. Any repairs or maintenance involving modifications of the water obstruction or encroachment from its original specifications, and any repairs or

reconstruction involving a substantial portion of the structure as defined by regulations of the Department shall require the prior written approval and permit of the Department.

7. All construction debris, excavated material, brush, rocks, and refuse incidental to this work shall be removed entirely from the stream channel and placed either on shore above the influence of flood waters, or at such dumping ground as may be approved by the Department.
8. There shall be no unreasonable interference with the free discharge of the river or stream or navigation during construction.
9. If future operations by the Commonwealth of Pennsylvania require modification of the structure or work, or if, in the opinion of the Department, the structure or work shall cause unreasonable obstruction to the free passage of floodwaters or navigation, the permittee shall, upon due notice remove or alter the structures, work or obstructions caused thereby, without expense to the Commonwealth of Pennsylvania, so as to increase the flood carrying capacity of the channel or render navigation reasonably free, easy, and unobstructed, in such manner as the Department may require. No claim shall be made against the Commonwealth of Pennsylvania on account of any such removal or alteration.
10. The permittee shall notify the Department, in writing, of the proposed time for commencement of work at least 15 days prior to the commencement of construction.
11. If construction work has not been completed within the time specified in this permit and the time limit specified in this permit has not been extended in writing by the Department or if this permit has been revoked for any reason, the permittee shall, at his own expense and in a manner that the Department may prescribe, remove all or any portion of the work as the Department requires and restore the watercourse and floodplain to their former condition.
12. The permittee shall fully inform the engineer or contractor, responsible for the supervision and conduct of the work, of the terms, conditions, restrictions and covenants of this permit. Prior to the commencement of construction, the permittee shall file with the Department in writing, on a form provided by the Department, a statement signed by the permittee and an individual responsible for the supervision or conduct of the work acknowledging and accepting the general and special conditions contained in this permit. Unless the acknowledgment and acceptance have been filed, this permit is void. A copy of this permit and the acknowledgment shall be available at the work site for inspection upon request by an officer or agent of the Department or another Federal, State, County or Municipal Agency.
13. The permittee shall operate and maintain the structure or work authorized herein in a safe condition in accordance with the permit terms and conditions and the approved maps, plans, profiles and specifications.
14. This permit may not be transferred without prior written approval from the Department, such approval being considered upon receipt of the properly executed "Application for Transfer of Permit" form.

15. If and when the permittee desires to discontinue use or abandon the activity authorized herein, the permittee must remove all or part of the structure or work authorized and take other actions as are necessary to protect safety and the environment in accordance with a permit issued by the Department.
16. If the use of explosives in any waterways is required, the permittee shall secure the prior written permit from the Pennsylvania Fish and Boat Commission, pursuant to the Pennsylvania Fish and Boat Code, Act 1980-175 Title 30 Pennsylvania Consolidated Statutes, Section 2906. Requests should be directed to the Pennsylvania Fish and Boat Commission, Division of Environmental Services, 595 East Rolling Ridge Drive, Bellefonte, PA 16823-9685, telephone 814.359.5250.
17. Permittee shall implement and monitor an Erosion and Sedimentation Control Plan prepared in accordance with 25 Pa. Code Chapter 102 so as to minimize erosion and prevent excessive sedimentation into the receiving watercourse or body of water.
18. The project site shall at all times be available for inspection by authorized officers and employees of the Pennsylvania Fish and Boat Commission. Prior to commencement and upon completion of the work authorized by this permit, the permittee shall notify the Pennsylvania Fish and Boat Commission's Southcentral Regional Office:

Southcentral Regional Office  
1704 Pine Road  
Newville, PA 17241  
Telephone: (717) 486-7087.

19. The project site shall at all times be available for inspection by authorized officers and employees of the County Conservation District. Prior to commencement and upon completion of the work authorized by this permit, the permittee shall notify the Lebanon Conservation District:

Lebanon Valley Ag. Center  
2120 Cornwall Rd., Suite 5  
Lebanon, PA 17042-9788  
Phone: (717) 277-5275.

20. **SPECIAL CONDITIONS:** Permittee shall be responsible for compliance with each of the following special conditions.

**Water Supplies:**

- A. If the project results in a pollution event or other adverse impact to any public or private water supplies, the permittee shall immediately notify the Department and the potentially affected public or private water supplies of the pollution event.
- B. In the event that the permittee's work related to this authorization causes adverse impacts to a public or private water supply source, the permittee shall address the restoration or

replacement of the impacted water supply and mitigate and/or remediate any pollution resulting from the project in accordance with applicable legal requirements.

- C. At least 72 hours in advance of beginning construction of a pipeline stream crossing, the permittee shall notify all identified users of private water supply wells within 150-ft of pipeline construction.
- D. If the Department determines that the project adversely affects a public or private water supply, the permittee shall restore or replace the affected water supply with an alternate source of water adequate in quantity or quality for the purposes served by the supply.
- E. At least 72 hours in advance of beginning construction of a pipeline stream crossing, the permittee shall notify all users of surface water intakes within one mile downstream of the crossing. These include but are not limited to, drinking water users, industrial, and commercial users that may be impacted by turbidity or water quality changes.
- F. The permittee shall notify such downstream water users immediately of any pollution event or incident at its site that may endanger downstream users. The permittee shall also immediately implement its approved contingency plan to prevent further adverse impacts and remediate all adverse impacts as a result of the pollution event or incident.
- G. If a public or private drinking water source not previously identified by the permittee is discovered by the permittee during construction, the permittee shall immediately notify the Department of the identified water source and shall notify that source of the permittee's construction activities.

**Historic, Cultural, or Archaeological Resources:**

- H. The permittee and its agents shall visually inspect for historic, cultural, and archaeological resources that may be encountered during construction of the project and shall immediately cease earth disturbance activities in the vicinity of the archaeological artifacts upon encountering such potential artifacts.
- I. If potential historic, cultural, or archaeological resources are discovered, the permittee shall immediately notify the Pennsylvania Historical and Museum Commission (PHMC) at P.O. Box 1026, Harrisburg, PA 17120-1026, telephone 717.783.8947, and shall concurrently notify the Department.
- J. The permittee shall not adversely impact any historic, cultural, and archaeological resources that are identified by the latest published version of the Pennsylvania Inventory of Historical Places and the National Register of Historical Places.

**Temporary Road Crossings:**

- K. All temporary road crossings of streams and wetlands must meet all of the following conditions:
1. The permittee shall restore and stabilize all temporary crossing sites immediately after termination of its permitted use.
  2. The permittee shall ensure that all culverts associated with temporary stream crossings provide a waterway area sufficient to adequately discharge the normal flow of the watercourse or stream, and that culverts are of sufficient length to extend beyond the toe of the clean rock fill.
  3. Road and causeway embankments shall only consist of clean rock material to prevent stream channel sedimentation during placement, removal, and periods of overtopping.
  4. Bridges must be structurally stable and shall be single span from top of bank to top of bank, unless approved by the Department.
  5. Approach roads to temporary road crossings shall utilize original grades. However, clean rock material or gravel to a depth of six inches above original grade can be utilized for approaches, as necessary.
  6. The waterway opening of the temporary road crossings shall be kept open and functioning at all times by maintaining the crossings free of debris and other obstructions.
  7. The permittee shall promptly repair any damage resulting from increased backwater caused by a temporary road crossing. When warranted, in advance of major storms, the permittee shall remove temporary road crossings in the event of high waters to prevent increased backwater.
  8. All wetland crossing sites shall be stabilized by appropriate means, including, but not limited to, using removable, temporary mats, pads, or other similar devices to ensure minimization of impact on the ecology of the wetland.
  9. The permittee shall remove all or any portion of a temporary road crossing upon written notification to the permittee from the Department in the event the project is causing an adverse impact on public health, safety, or the environment or in any other manner violates the requirements of the Pennsylvania Clean Streams Law, the Pennsylvania Dam Safety and Encroachments Act, and/or 25 Pa. Code Chapter 105.

**Site Field Verification, Restoration, and Monitoring:**

- L. All wetlands within the project area shall be appropriately demarcated per the approved plans prior to the start of construction activities and shall remain demarcated until earth disturbance activities are completed, and the site has been stabilized. An acceptable

- means of demarcation of wetlands includes, but not limited to, the use of an orange construction safety fence and/or flags.
- M. The permittee shall prepare and maintain a detailed record of pre-construction and post-construction conditions of each stream and wetland crossing, which shall include sufficient photographs to compare pre-construction and post-construction conditions. The permittee shall submit this documentation to the Department within ninety (90) days after completion of work under the respective permit.
  - N. Excess fill from disturbed areas and construction activities shall be located outside of the floodway, floodplain, or other bodies of water. The permittee is responsible for stabilizing any excess materials spoiled onsite or offsite, whether the permittee owns the site or others own the site.
  - O. Wetland excavation shall include the segregation of the soil horizons, unless written approval is received from the Department. Soil horizons shall be replaced to match pre-construction conditions. In areas where bore pits are proposed in or adjacent to wetlands, or if a restrictive layer, including but not limited to clay or fragipans, is encountered during the trench excavation, the permittee shall have knowledgeable personnel with appropriate technical expertise on-site to oversee backfilling of the trench and installation of trench plugs, to ensure that wetland hydrology is maintained.
  - P. Backfilled trenches shall not create the formation of a permanent ridge in a streambed or wetland.
  - Q. Rock riprap shall only be used in the stream bed when written approval is received from the Department.
  - R. Upon completion of final earthmoving activities, the permittee shall restore all disturbed wetland areas to original contours and replant with indigenous wetland vegetation in accordance with the restoration plans as presented in the permit application.
  - S. Wetland disturbances shall be minimized and stabilized within four (4) calendar days of final earthmoving activities.
  - T. Streambank disturbance shall be minimized and stabilized with indigenous vegetation immediately upon completion of final earthmoving activities.
  - U. Stream pipeline crossings shall be restored and properly stabilized upon completion of work. Restored streams shall use a minimum of six (6) inches of native stream bed material. For streams where riprap is necessary to prevent scour, the riprap shall be depressed sufficiently to allow six (6) inches of native stream bed material over the riprap. The restored streambed elevation shall not exceed the pre-existing streambed elevation.
  - V. For a period of up to five (5) years following construction, the permittee shall monitor the stream and wetlands in the project area. Monitoring reports shall be submitted to the

Department in the spring (May 15) and fall (November 15) for the first two (2) calendar years following construction and annually (November 15) for three (3) years thereafter.

1. All wetland monitoring reports shall contain information describing the wetland sites at the time of inspection, documented indicators of wetland hydrology, hydric soils, an inventory of the plant species and percent aerial coverage, and photographs of the wetland sites with plans showing the location and orientation of each of the photographs. The monitoring reports shall demonstrate that the existing wetlands on-site are maintaining pre-construction wetland conditions and delineated acreages. If the wetlands on-site are not maintaining pre-construction wetland conditions and delineated acreages, a written plan shall be submitted to correct any deficiencies identified during the monitoring phase.
  2. All stream monitoring reports shall contain information describing the stream at the time of inspection and demonstrating that the existing streams on-site are maintaining pre-construction conditions and hydrology.
  3. Monitoring may be terminated or extended by the Department upon written request by the permittee.
- W. For a period of up to five (5) years following construction, the permittee shall monitor for secondary impacts to hydrology, i.e., the loss of hydrology, to all watercourses with a drainage area of less than 100 acres, including those watercourses that originate within the project ROW. Reports shall be submitted to the Department in the spring and fall for the first two (2) calendar years following construction and annually for three (3) years thereafter.
1. The monitoring reports shall contain information describing the presence or absence of hydrology at the time of inspection, a narrative comparison to hydrology present in the watercourse during pre-permitting field investigation(s), and photographs of the watercourse.
  2. If the monitoring identifies a diminution or complete loss of hydrology, the permittee shall evaluate whether the activities authorized by this Permit caused the loss of hydrology and submit this evaluation to the Department for review.
  3. If the Department determines that the activities authorized by this Permit are contributing to the loss of hydrology, the permittee shall prepare a written plan to correct the loss of hydrology to the watercourse. Within thirty (30) days of the Department informing permittee about its determination that authorized activities contributed to the loss of hydrology, the permittee shall submit a plan to address the loss of hydrology to the Department for review and approval. If the Department identifies any deficiencies with permittee's plan, then the permittee shall provide the Department a written response to address the stated deficiencies within fifteen (15) days of receiving written notice of the Department-identified deficiencies, unless the Department extends that timeframe in writing.

4. The permittee shall implement the Department-approved plan within ninety (90) days of receiving written approval from the Department, unless the Department extends that timeframe in writing.
5. In the event that loss of hydrology from activities conducted under this Permit cannot be restored, the permittee shall submit a mitigation plan to the Department that sets forth the manner in which full loss of hydrology and associated water will be compensated for. If the Department identifies any deficiencies with the permittee's mitigation plan, then the permittee shall provide the Department a written response to address the stated deficiencies within fifteen (15) days of receiving written notice of the Department-identified deficiencies, unless the Department extends that timeframe in writing. The permittee shall implement the Department-approved mitigation plan within ninety (90) days of receiving written approval from the Department, unless the Department extends that timeframe in writing.
6. Based upon the monitoring results, the Department may terminate monitoring upon written request by the permittee and may extend the monitoring period by providing written notice to the permittee.

**Trenchless Technology (TT) Aquatic Resource Crossings:**

- X. In accordance with the PPC Plan, the permittee shall take measures to avoid drilling activities in the vicinity of mine voids and utilities.
- Y. To prevent impacts to water quality from TT operations, an environmental inspector shall be on site for the duration of the crossing operation. In the event of a release of sediment into a body of water, PFBC Bureau of Law Enforcement Regional Office must be notified within 24 hours.

**Open Trench Aquatic Resource Crossings:**

- Z. The permittee shall construct open trench pipeline crossings of streams in dry conditions by constructing during periods of no water flow and/or by installing stream flow bypass systems (flumed or pumped) through the affected area. Bypass systems must stay in use until streambeds and banks are adequately stabilized. Downstream flow must be maintained during the construction.
- AA. Each stream crossing shall be conducted in an uninterrupted process in the shortest period of time possible. Impacts to waters of the Commonwealth shall be avoided, to the extent practicable, and if not practicable, then minimized in accordance with the permittee's approved plans.
- BB. The permittee may cross dry channels, dry swales, and dry intermittent streams without the use of stream flow bypass systems if the channel has no flow and the stream crossing and stabilization can be completed in dry conditions and within twenty-four

(24) hours, unless approved in writing by the Department. Standby sandbag dams and pumps shall be located on-site and installed in the event of precipitation resulting in channel flow.

- CC. The permittee shall implement procedures that take into account the weather forecast and current conditions prior to commencing stream crossing installations to ensure that weather and stream conditions will not result in a pollution event. Such procedures could include a sign-off sheet documenting that the Environmental Inspector, Foreman, and any other responsible individual agree that the crossing can be constructed during that specific time.

**Miscellaneous:**

- DD. Pollution of any waterway with harmful chemicals, fuels, oils, greases, bituminous material, acid, or other harmful or polluting materials, is prohibited.
- EE. Herbicide spraying of wetlands is not authorized by this Permit. Additionally, with the exception of a 10-foot wide area centered over the pipeline, maintenance mowing of wetlands is not authorized by this Permit. The permittee shall place and maintain signs or other demarcation around the boundary of each wetland to clearly delineate the areas where this maintenance is not authorized. The permittee shall place the signs or other demarcations when all restoration work is completed and prior to permit termination.
- FF. This permit does not convey any real property rights or interests or authorization to trespass on privately-owned riparian land. By accepting this Permit, the permittee certifies that he/she holds title, easement, right, or other real interest in the riparian land. Any dispute over property ownership and/or right of legal access is solely a matter for private litigation.
- GG. Riprap and stone used throughout the project, including the construction of causeways and coffer dams, shall be free of fines and silts, or other non-erodible material.
- HH. All temporary water withdrawal intake structures and all appurtenant works shall be removed from the watercourse, body of water, floodway, and floodplains as prescribed within the permit application. Deviations from the approved permit application shall require prior written approval from the Department.
- II. If the permittee encounters a groundwater seep during excavation, the permittee shall place a trench plug at ten (10) feet from each side of the seep.
- JJ. Any french drains installed as part of temporary de-watering for construction activities shall be removed or otherwise rendered inoperable prior to final site restoration.
- KK. Water pumped from any construction area shall be directed through a sediment trap, basin, or a filter bag discharging into an appropriate vegetated filter area to prevent a discharge of sediment into any waters of the Commonwealth.

- LL. This permit authorizes only those impacts to waters of the Commonwealth that were specifically described in the approved permit application(s) and revisions. Any additional impacts to waters of the Commonwealth from water obstruction or encroachment activities including, but not limited to, temporary access roads, lay-down areas, staging areas, or temporary work spaces, that have not been specifically identified in the approved permit application are not authorized. Any proposed changes regarding the specific impacts will require a permit amendment.
- MM. No deviation in the construction methodology or project design shown on the approved drawings is authorized unless approved through an amendment of this Permit by the Department in writing. If the specific resource crossing has pre-approved primary, secondary, or tertiary methods, the permittee shall send a written notification to the Department and the respective county conservation district prior to the change in method.
- NN. This permit does not relieve the permittee of the obligation of complying with all Federal, interstate compact, State laws, regulations and standards, and local ordinances applicable to the construction, operation or maintenance of the water obstruction or encroachment.
- OO. The permittee shall follow the measures specified in the Preparedness, Prevention, and Contingency (PPC) Plan during construction. The permittee shall maintain a copy of the PPC Plan on-site at all times during construction, train all staff to use and implement this plan, and have this plan available to provide at the request of any Department inspector.
- PP. In accordance with the Erosion and Sediment Control Plan, all synthetic erosion control features (e.g. silt fencing, netting, mats), which are intended for temporary use during construction, will be completely removed and properly disposed in a timely manner. Only natural fiber materials which will degrade over time will be used as permanent erosion control measures, or if used temporarily, may be abandoned in place.
- QQ. A copy of the Permit, Acknowledgment of Appraisal of Permit Conditions, the Erosion and Sediment Control Plans, and any other applicable plans or State and Federal authorizations, must be maintained on site during construction and available at the work site for inspection upon request by any officer or agent of the Department or any other Federal, State, County or Municipal agency.
