DEP Williamsport PA

Hope you will think about how wrong this pipeline is for Lancaster. It's wrong for the environment, the productive farm land and the health and safety of the citizens.

RECEIVED

JUN 01 2017

WATERWAYS & WETLANDS

Why is no one listening to the citizens? It's all about greed — and Williams does not have the best safety record.

Please — fracking is wrong not good for the environment there are earthquakes and this gas is not for PA or the USA It's for overseas — Please think of the citizens and how they oppose it — for so many valid reasons. NY denied a permit + we hope PA will also!

Kind regards — Mimi Shapiro
+ Paul Engleheart
