Dear DEP

That's the "Dept of  
Environmental Protection" So  
When are you going to stand  
up for the environment & do  
your jobs?

This review by the dept  
engineers and regulatory requirements  
that are involved to me is  
already biased. For almost three  
years I've been researching all  
things Fracking, Gas companies  
and the powers that fund this  
industry are going to win this  
battle. All your pretense of  
having the concerned parties  
come and voice their thoughts to  
no avail time after time is  
getting old. For years you have  
rubber stamped this industry  
that's killing off air and water.  
All up and down this 193 mile  
route the gas company has

I wished its so called "grant money" to soften any resistance that there could have been.

I'm sure you know of the hundreds of thousands of dollars that bought the "good words" that were given

for it. I have a real problems with these farm holders they have commissioners, fire companies,

and other unwilling agencies that don't realize how they have been

used. Anybody that could further the project were targeted early

before information of how detrimental this 42" timebomb was. This

pipeline is nothing but a fast track to the countries that

have contracts. Atlantic Sunrise is taking our property and

putting our four families that live on this farm in the "Hazard

Zone". I don't have to tell you what that means

for our chances if it ruptures  
or explodes. My youngest son's  
house always has young children  
in it. They will be 300 feet  
from this pipe. Can you in  
your sane existence imagine  
the fear everyday we would  
live with if this unnecessary  
product goes thru? I have  
lost 15 lbs. and haven't slept  
a decent 4 hrs. since 2014  
when we were told if we  
didn't sign they would take  
it imminent domain. I can't  
put into words the pain in  
my heart and the absolute  
anger I have for this pipeline  
And it has accomplished  
its objective with relevant  
ease.

So I ask you, if you  
will find a way to help your

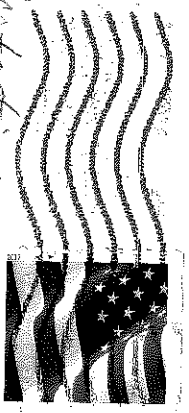

people and this planet or  
just be another way the industry  
gets what they want?

Sincerely  
Susan Jantatore
