Re: Atlantic Sunrise Project
Columbia County
Pennsylvania Acts 14, 67, 68, 127, and 167 Notification

Dear Columbia County Commissioners:

In accordance with Section 1905-A of the Commonwealth Administrative Code, as amended by Act 14, written notification of proposed construction activities must be provided to all applicable municipalities and counties at least 30 days prior to the issuance of Pennsylvania Department of Environmental Protection (PADEP) permits; therefore, the purpose of this letter is to inform the Commissioners that TRC Solutions (TRC) intends to submit a Chapter 105 Water Obstruction and Encroachment Permit (Chapter 105) to the PADEP and an Erosion and Sediment Control General Permit (ESCGP-2) to the Columbia County Conservation District on behalf of the Transcontinental Gas Pipeline Company, LLC (Transco), a subsidiary of Williams Partners L.P. (Williams) for the above referenced Project.

Additionally, this notification serves as Act 167 notification related to Stormwater Consistency, and required by the Chapter 105 and ESCGP-2 permit applications.

Transcontinental Gas Pipe Line Company, LLC. (Transco), a subsidiary of Williams Partners L.P. (Williams), submitted an application to the Federal Energy Regulatory Commission (FERC or Commission) for a Certificate of Public Convenience and Necessity (Certificate) for the Project on March 25, 2015.

The Project is an expansion of the existing Transco natural gas transmission system that will enable Transco to provide 1.7 million dekatherms per day (MMDth/d) of incremental firm transportation of natural gas from the Marcellus Shale production areas in northern Pennsylvania to its existing market areas, extending to as far south as the Station 85 Pooling Point in Choctaw County, Alabama. The Project includes modifications to the existing Transco Mainline system to reverse the direction of flow, enabling new north-to-south capabilities (bi-directional flow) to transport this new source of natural gas to existing markets. The Project consists of the following primary components within Pennsylvania:

- 57.3 miles of new 30-inch-diameter and 125.2 miles of 42-inch-diameter greenfield pipeline;
- 2.9 miles of new 36-inch-diameter and 8.6 miles of 42-inch-diameter pipeline loops;
- Two new compressor stations;
- Additional ancillary facilities, such as mainline valves (MLVs), cathodic protection, communication facilities, and internal inspection device (e.g., pig) launchers and receivers;
- Two new meter stations and three new regulator stations with interconnecting piping;
- Additional compression and related modifications to one existing compressor stations; and
- Modification to an existing meter station for use of shared facilities with a new meter station;

If FERC issues a Certificate for the Project and Transco obtains the applicable permits and authorizations, Transco anticipates that construction of the Project will begin by July 2016 to meet an in-service date of July 1, 2017.

Re: Atlantic Sunrise Project
Franklin Township, Columbia County
Pennsylvania Acts 14, 67, 68, 127, and 167 Notification

Dear Franklin Township Supervisors:

In accordance with Section 1905-A of the Commonwealth Administrative Code, as amended by Act 14, written notification of proposed construction activities must be provided to all applicable municipalities and counties at least 30 days prior to the issuance of Pennsylvania Department of Environmental Protection (PADEP) permits; therefore, the purpose of this letter is to inform the Supervisors that TRC Solutions (TRC) intends to submit a Chapter 105 Water Obstruction and Encroachment Permit (Chapter 105) to the PADEP and an Erosion and Sediment Control General Permit (ESCGP-2) to the Columbia County Conservation District on behalf of the Transcontinental Gas Pipeline Company, LLC (Transco), a subsidiary of Williams Partners L.P. (Williams) for the above referenced Project.

Additionally, this notification serves as Act 167 notification related to Stormwater Consistency, and required by the Chapter 105 and ESCGP-2 permit applications.

Transcontinental Gas Pipe Line Company, LLC. (Transco), a subsidiary of Williams Partners L.P. (Williams), submitted an application to the Federal Energy Regulatory Commission (FERC or Commission) for a Certificate of Public Convenience and Necessity (Certificate) for the Project on March 25, 2015.

The Project is an expansion of the existing Transco natural gas transmission system that will enable Transco to provide 1.7 million dekatherms per day (MMDth/d) of incremental firm transportation of natural gas from the Marcellus Shale production areas in northern Pennsylvania to its existing market areas, extending to as far south as the Station 85 Pooling Point in Choctaw County, Alabama. The Project includes modifications to the existing Transco Mainline system to reverse the direction of flow, enabling new north-to-south capabilities (bi-directional flow) to transport this new source of natural gas to existing markets. The Project consists of the following primary components within Pennsylvania:

- 57.3 miles of new 30-inch-diameter and 125.2 miles of 42-inch-diameter greenfield pipeline;
- 2.9 miles of new 36-inch-diameter and 8.6 miles of 42-inch-diameter pipeline loops;
- Two new compressor stations;
- Additional ancillary facilities, such as mainline valves (MLVs), cathodic protection, communication facilities, and internal inspection device (e.g., pig) launchers and receivers;
- Two new meter stations and three new regulator stations with interconnecting piping;
- Additional compression and related modifications to one existing compressor stations; and
- Modification to an existing meter station for use of shared facilities with a new meter station;

If FERC issues a Certificate for the Project and Transco obtains the applicable permits and authorizations, Transco anticipates that construction of the Project will begin by July 2016 to meet an in-service date of July 1, 2017.

Re: Transcontinental Gas Pipeline Company, LLC
Atlantic Sunrise Pipeline
Franklin Township, Columbia County

The municipality of Franklin Township states that it:

- has adopted a municipal or multi-municipal comprehensive plan.
If yes, please provide date of adoption: _____
- has not adopted a municipal or multi-municipal comprehensive plan.

The County of Columbia states that it:

- has adopted a county zoning ordinance, or a municipal or joint-municipal zoning ordinance.
- has not adopted a county zoning ordinance, or a municipal or joint-municipal zoning ordinance.

If applicable:

The municipality of Franklin Township states that its zoning ordinance is generally consistent with its municipal comprehensive plan and the county comprehensive plan.

The above referenced proposed project

- meets the provisions of the local zoning ordinance

If zoning approval is required for the project to proceed, the above referenced project:

- has received zoning approval.
- has not received zoning approval.

If the proposed project has not received zoning approval:

What is the status of the zoning request for the proposed project? (e.g., Special Exception Approval from the Zoning Hearing Board required, Conditional Use approval from the Governing Body required)

Is there a legal challenge by the applicant with regard to zoning for the proposed project?

195 Rupert Drive
Bloomsburg, PA 17815

Re: Atlantic Sunrise Project
Montour Township, Columbia County
Pennsylvania Acts 14, 67, 68, 127, and 167 Notification

Dear Montour Township Supervisors:

In accordance with Section 1905-A of the Commonwealth Administrative Code, as amended by Act 14, written notification of proposed construction activities must be provided to all applicable municipalities and counties at least 30 days prior to the issuance of Pennsylvania Department of Environmental Protection (PADEP) permits; therefore, the purpose of this letter is to inform the Supervisors that TRC Solutions (TRC) intends to submit a Chapter 105 Water Obstruction and Encroachment Permit (Chapter 105) to the PADEP and an Erosion and Sediment Control General Permit (ESCGP-2) to the Columbia County Conservation District on behalf of the Transcontinental Gas Pipeline Company, LLC (Transco), a subsidiary of Williams Partners L.P. (Williams) for the above referenced Project.

Additionally, this notification serves as Act 167 notification related to Stormwater Consistency, and required by the Chapter 105 and ESCGP-2 permit applications.

Transcontinental Gas Pipe Line Company, LLC. (Transco), a subsidiary of Williams Partners L.P. (Williams), submitted an application to the Federal Energy Regulatory Commission (FERC or Commission) for a Certificate of Public Convenience and Necessity (Certificate) for the Project on March 25, 2015.

The Project is an expansion of the existing Transco natural gas transmission system that will enable Transco to provide 1.7 million dekatherms per day (MMDth/d) of incremental firm transportation of natural gas from the Marcellus Shale production areas in northern Pennsylvania to its existing market areas, extending to as far south as the Station 85 Pooling Point in Choctaw County, Alabama. The Project includes modifications to the existing Transco Mainline system to reverse the direction of flow, enabling new north-to-south capabilities (bi-directional flow) to transport this new source of natural gas to existing markets. The Project consists of the following primary components within Pennsylvania:

- 57.3 miles of new 30-inch-diameter and 125.2 miles of 42-inch-diameter greenfield pipeline;
- 2.9 miles of new 36-inch-diameter and 8.6 miles of 42-inch-diameter pipeline loops;
- Two new compressor stations;
- Additional ancillary facilities, such as mainline valves (MLVs), cathodic protection, communication facilities, and internal inspection device (e.g., pig) launchers and receivers;
- Two new meter stations and three new regulator stations with interconnecting piping;
- Additional compression and related modifications to one existing compressor stations; and
- Modification to an existing meter station for use of shared facilities with a new meter station;

If FERC issues a Certificate for the Project and Transco obtains the applicable permits and authorizations, Transco anticipates that construction of the Project will begin by July 2016 to meet an in-service date of July 1, 2017.

Re: Transcontinental Gas Pipeline Company, LLC
Atlantic Sunrise Pipeline
Montour Township, Columbia County

The municipality of Montour Township states that it:

- has adopted a municipal or multi-municipal comprehensive plan.
If yes, please provide date of adoption: _____
- has not adopted a municipal or multi-municipal comprehensive plan.

The County of Columbia states that it:

- has adopted a county zoning ordinance, or a municipal or joint-municipal zoning ordinance.
- has not adopted a county zoning ordinance, or a municipal or joint-municipal zoning ordinance.

If applicable:

The municipality of Montour Township states that its zoning ordinance is generally consistent with its municipal comprehensive plan and the county comprehensive plan.

The above referenced proposed project

- meets the provisions of the local zoning ordinance

If zoning approval is required for the project to proceed, the above referenced project:

- has received zoning approval.
- has not received zoning approval.

If the proposed project has not received zoning approval:

What is the status of the zoning request for the proposed project? (e.g., Special Exception Approval from the Zoning Hearing Board required, Conditional Use approval from the Governing Body required)

Is there a legal challenge by the applicant with regard to zoning for the proposed project?

Re: Atlantic Sunrise Project
Mount Pleasant Township, Columbia County
Pennsylvania Acts 14, 67, 68, 127, and 167 Notification

Dear Mount Pleasant Township Supervisors:

In accordance with Section 1905-A of the Commonwealth Administrative Code, as amended by Act 14, written notification of proposed construction activities must be provided to all applicable municipalities and counties at least 30 days prior to the issuance of Pennsylvania Department of Environmental Protection (PADEP) permits; therefore, the purpose of this letter is to inform the Supervisors that TRC Solutions (TRC) intends to submit a Chapter 105 Water Obstruction and Encroachment Permit (Chapter 105) to the PADEP and an Erosion and Sediment Control General Permit (ESCGP-2) to the Columbia County Conservation District on behalf of the Transcontinental Gas Pipeline Company, LLC (Transco), a subsidiary of Williams Partners L.P. (Williams) for the above referenced Project.

Additionally, this notification serves as Act 167 notification related to Stormwater Consistency, and required by the Chapter 105 and ESCGP-2 permit applications.

Transcontinental Gas Pipe Line Company, LLC. (Transco), a subsidiary of Williams Partners L.P. (Williams), submitted an application to the Federal Energy Regulatory Commission (FERC or Commission) for a Certificate of Public Convenience and Necessity (Certificate) for the Project on March 25, 2015.

The Project is an expansion of the existing Transco natural gas transmission system that will enable Transco to provide 1.7 million dekatherms per day (MMDth/d) of incremental firm transportation of natural gas from the Marcellus Shale production areas in northern Pennsylvania to its existing market areas, extending to as far south as the Station 85 Pooling Point in Choctaw County, Alabama. The Project includes modifications to the existing Transco Mainline system to reverse the direction of flow, enabling new north-to-south capabilities (bi-directional flow) to transport this new source of natural gas to existing markets. The Project consists of the following primary components within Pennsylvania:

- 57.3 miles of new 30-inch-diameter and 125.2 miles of 42-inch-diameter greenfield pipeline;
- 2.9 miles of new 36-inch-diameter and 8.6 miles of 42-inch-diameter pipeline loops;
- Two new compressor stations;
- Additional ancillary facilities, such as mainline valves (MLVs), cathodic protection, communication facilities, and internal inspection device (e.g., pig) launchers and receivers;
- Two new meter stations and three new regulator stations with interconnecting piping;
- Additional compression and related modifications to one existing compressor stations; and
- Modification to an existing meter station for use of shared facilities with a new meter station;

If FERC issues a Certificate for the Project and Transco obtains the applicable permits and authorizations, Transco anticipates that construction of the Project will begin by July 2016 to meet an in-service date of July 1, 2017.
