Lancaster County Commissioners

Re: Atlantic Sunrise Project
Lancaster County
Pennsylvania Acts 14, 67, 68, 127, and 167 Notification

Dear Lancaster County Commissioners:

In accordance with Section 1905-A of the Commonwealth Administrative Code, as amended by Act 14, written notification of proposed construction activities must be provided to all applicable municipalities and counties at least 30 days prior to the issuance of Pennsylvania Department of Environmental Protection (PADEP) permits; therefore, the purpose of this letter is to inform the Commissioners that TRC Solutions (TRC) intends to submit a Chapter 105 Water Obstruction and Encroachment Permit (Chapter 105) to the PADEP and an Erosion and Sediment Control General Permit (ESCGP-2) to the Lancaster County Conservation District on behalf of the Transcontinental Gas Pipeline Company, LLC (Transco), a subsidiary of Williams Partners L.P. (Williams) for the above referenced Project.

Additionally, this notification serves as Act 167 notification related to Stormwater Consistency, and required by the Chapter 105 and ESCGP-2 permit applications.

Transcontinental Gas Pipe Line Company, LLC. (Transco), a subsidiary of Williams Partners L.P. (Williams), submitted an application to the Federal Energy Regulatory Commission (FERC or Commission) for a Certificate of Public Convenience and Necessity (Certificate) for the Project on March 25, 2015.

The Project is an expansion of the existing Transco natural gas transmission system that will enable Transco to provide 1.7 million dekatherms per day (MMDth/d) of incremental firm transportation of natural gas from the Marcellus Shale production areas in northern Pennsylvania to its existing market areas, extending to as far south as the Station 85 Pooling Point in Choctaw County, Alabama. The Project includes modifications to the existing Transco Mainline system to reverse the direction of flow, enabling new north-to-south capabilities (bi-directional flow) to transport this new source of natural gas to existing markets. The Project consists of the following primary components within Pennsylvania:

- 57.3 miles of new 30-inch-diameter and 125.2 miles of 42-inch-diameter greenfield pipeline;
- 2.9 miles of new 36-inch-diameter and 8.6 miles of 42-inch-diameter pipeline loops;
- Two new compressor stations;
- Additional ancillary facilities, such as mainline valves (MLVs), cathodic protection, communication facilities, and internal inspection device (e.g., pig) launchers and receivers;
- Two new meter stations and three new regulator stations with interconnecting piping;
- Additional compression and related modifications to one existing compressor stations; and
- Modification to an existing meter station for use of shared facilities with a new meter station;

If FERC issues a Certificate for the Project and Transco obtains the applicable permits and authorizations, Transco anticipates that construction of the Project will begin by July 2016 to meet an in-service date of July 1, 2017.

Re: Transcontinental Gas Pipeline Company, LLC
Atlantic Sunrise Pipeline
Lancaster County

The municipality of _____ states that it:

- has adopted a municipal or multi-municipal comprehensive plan.
If yes, please provide date of adoption: _____
- has not adopted a municipal or multi-municipal comprehensive plan.

The County of Lancaster states that it:

- has adopted a county zoning ordinance, or a municipal or joint-municipal zoning ordinance.
- has not adopted a county zoning ordinance, or a municipal or joint-municipal zoning ordinance.

If applicable:

The municipality of _____ states that its zoning ordinance is generally consistent with its municipal comprehensive plan and the county comprehensive plan.

The above referenced proposed project

- meets the provisions of the local zoning ordinance

If zoning approval is required for the project to proceed, the above referenced project:

- has received zoning approval.
- has not received zoning approval.

If the proposed project has not received zoning approval:

What is the status of the zoning request for the proposed project? (e.g., Special Exception Approval from the Zoning Hearing Board required, Conditional Use approval from the Governing Body required)

Is there a legal challenge by the applicant with regard to zoning for the proposed project?

July 15, 2015

Steve Crescenzo
TRC Environmental Corporation
2200 Liberty Avenue, Suite 100

Re: Atlantic Sunrise Project
Acts 14, 67, 68, 127 and 167 Notifications

Dear Mr. Crescenzo:

I have reviewed the information that you have provided regarding the Atlantic Sunrise Project and offer the following comments:

Zoning and Land Use Consistency

1. Pipelines are not a permitted use within the Floodplain Zone. It appears from the schematic submitted, there are crossings of floodplain areas. Under the terms of the Drumore Township Zoning Ordinance a zoning variance is required for this land use.
2. The plans are not of sufficient detail to determine compliance with the Drumore Township Zoning Ordinance including but not limited to Article 3, Natural Resources Protection.
3. The applicant shall be required to obtain highway occupancy permits and driveway permits for any utilities placed within the road right of way as well as driveway permits for any new access points.
4. Page 3 of 8 (Project Description) states that local zoning is preempted. The Township's position is that certain aspects of local zoning are not preempted and therefore compliance is required.

Stormwater Management Consistency

1. Additional information is required prior to a determination of stormwater consistency. While the project may propose minimal additional impervious area, the amount of earth disturbance within a high quality and exceptional value water will have significant impacts. The Drumore Township Stormwater Ordinance states " The purpose of this ordinance is to promote health, safety, and welfare by minimizing the harms and maximizing the benefits described in Section 102 through provisions designed to help preserve and protect exceptional natural resources, and conserve and restore natural resource systems."

103 Fite Way Suite C Quarryville, PA 17566
Phone: 717-786-0355 Fax: 717-786-8030
Email: mark@solancoengineering.com

2. Based on the definition of regulated activity, a stormwater permit is required for the earth disturbance activities within Drumore Township.

General Comments

1. The cover letter states Drumore Township, Clinton County. This discrepancy shall be resolved.

2. The Township desires maps of legible scale, at least 1" = 100', in all future correspondence. The scale of the maps provided serve no beneficial purpose.

3. The Williams Pipeline Atlantic Sunrise website graphically shows (symbol in legend) a new compressor station at the intersection of the existing Transco Pipeline and the proposed Atlantic Sunrise project. Although, information depicted elsewhere calls out River Road Regulator Station, as previously understood by Drumore Township. If this is a proposed compressor station, please note that Drumore Township Zoning Ordinance , as amended regulates the installation of Compressor Stations as permitted by State Law.

Please feel free to contact me if you have any questions regarding this correspondence.

Sincerely,

Pennsylvania Acts 14, 67, 68, 127, and 167 Notification

Dear East Donegal Township Supervisors:

In accordance with Section 1905-A of the Commonwealth Administrative Code, as amended by Act 14, written notification of proposed construction activities must be provided to all applicable municipalities and counties at least 30 days prior to the issuance of Pennsylvania Department of Environmental Protection (PADEP) permits; therefore, the purpose of this letter is to inform the Supervisors that TRC Solutions (TRC) intends to submit a Chapter 105 Water Obstruction and Encroachment Permit (Chapter 105) to the PADEP and an Erosion and Sediment Control General Permit (ESCGP-2) to the Lancaster County Conservation District on behalf of the Transcontinental Gas Pipeline Company, LLC (Transco), a subsidiary of Williams Partners L.P. (Williams) for the above referenced Project.

Additionally, this notification serves as Act 167 notification related to Stormwater Consistency, and required by the Chapter 105 and ESCGP-2 permit applications.

Transcontinental Gas Pipe Line Company, LLC. (Transco), a subsidiary of Williams Partners L.P. (Williams), submitted an application to the Federal Energy Regulatory Commission (FERC or Commission) for a Certificate of Public Convenience and Necessity (Certificate) for the Project on March 25, 2015.

The Project is an expansion of the existing Transco natural gas transmission system that will enable Transco to provide 1.7 million dekatherms per day (MMDth/d) of incremental firm transportation of natural gas from the Marcellus Shale production areas in northern Pennsylvania to its existing market areas, extending to as far south as the Station 85 Pooling Point in Choctaw County, Alabama. The Project includes modifications to the existing Transco Mainline system to reverse the direction of flow, enabling new north-to-south capabilities (bi-directional flow) to transport this new source of natural gas to existing markets. The Project consists of the following primary components within Pennsylvania:

- 57.3 miles of new 30-inch-diameter and 125.2 miles of 42-inch-diameter greenfield pipeline;
- 2.9 miles of new 36-inch-diameter and 8.6 miles of 42-inch-diameter pipeline loops;
- Two new compressor stations;
- Additional ancillary facilities, such as mainline valves (MLVs), cathodic protection, communication facilities, and internal inspection device (e.g., pig) launchers and receivers;
- Two new meter stations and three new regulator stations with interconnecting piping;
- Additional compression and related modifications to one existing compressor stations; and
- Modification to an existing meter station for use of shared facilities with a new meter station;

If FERC issues a Certificate for the Project and Transco obtains the applicable permits and authorizations, Transco anticipates that construction of the Project will begin by July 2016 to meet an in-service date of July 1, 2017.

Re: Transcontinental Gas Pipeline Company, LLC
Atlantic Sunrise Pipeline
East Donegal Township, Lancaster County

The municipality of East Donegal Township states that it:

- has adopted a municipal or multi-municipal comprehensive plan.
If yes, please provide date of adoption: _____
- has not adopted a municipal or multi-municipal comprehensive plan.

The County of Lancaster states that it:

- has adopted a county zoning ordinance, or a municipal or joint-municipal zoning ordinance.
- has not adopted a county zoning ordinance, or a municipal or joint-municipal zoning ordinance.

If applicable:

The municipality of East Donegal Township states that its zoning ordinance is generally consistent with its municipal comprehensive plan and the county comprehensive plan.

The above referenced proposed project

- meets the provisions of the local zoning ordinance

If zoning approval is required for the project to proceed, the above referenced project:

- has received zoning approval.
- has not received zoning approval.

If the proposed project has not received zoning approval:

What is the status of the zoning request for the proposed project? (e.g., Special Exception Approval from the Zoning Hearing Board required, Conditional Use approval from the Governing Body required)

Is there a legal challenge by the applicant with regard to zoning for the proposed project?

Re: Proposed Contractor yard within Eden Township

Dear Mr. Crescenzo:

We have received your letter concerning a proposed contractor yard within Eden Township.

We cannot sign any Township approval letter without further information. That information should include:

- 1 – a plan showing what you intend to do on the property, including lot coverage, type of materials, setbacks, storage material type
- 2 – an E&S plan for the property
- 3 – storm water plan showing how the water will be handled, with no effect on the adjoining property owners
- 4 – how the yard will be accessed include E&S and storm water for the driveway also

If you have any questions regarding this matter feel free to contact me.

Sincerely,

Geraldine A Parker

Re: Transcontinental Gas Pipeline Company, LLC
Atlantic Sunrise Pipeline
Martic Township, Lancaster County

The municipality of Martic Township, Lancaster County states that it has adopted a multi-municipal comprehensive plan on January 1991.

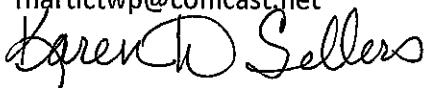

The municipality of Martic Township, Lancaster County states that it has adopted a municipal zoning ordinance, last amended on November 4, 2002.

The municipality of Martic Township, Lancaster County states that its zoning ordinance is generally consistent with its municipal comprehensive plan and the county comprehensive plan.

The applicant has not provided the Township with sufficient information concerning the precise facilities to be installed within the Township and the location of such facilities to enable the Township to determine the zoning district, property boundaries, and other matters. The applicant has stated its position that "local zoning is preempted" on page 3 of 8 of Attachment A to the material provided to the Township. The Township has been provided with insufficient information to determine whether the project meets the requirements of the Zoning Ordinance or any Township Ordinance. The Township has not been provided with any FERC determination.

Re: Atlantic Sunrise Project
Mount Joy Borough, Lancaster County
Pennsylvania Acts 14, 67, 68, 127, and 167 Notification

Dear Mount Joy Borough Council:

In accordance with Section 1905-A of the Commonwealth Administrative Code, as amended by Act 14, written notification of proposed construction activities must be provided to all applicable municipalities and counties at least 30 days prior to the issuance of Pennsylvania Department of Environmental Protection (PADEP) permits; therefore, the purpose of this letter is to inform the Council that TRC Solutions (TRC) intends to submit a Chapter 105 Water Obstruction and Encroachment Permit (Chapter 105) to the PADEP and an Erosion and Sediment Control General Permit (ESCGP-2) to the Lancaster County Conservation District on behalf of the Transcontinental Gas Pipeline Company, LLC (Transco), a subsidiary of Williams Partners L.P. (Williams) for the above referenced Project.

Additionally, this notification serves as Act 167 notification related to Stormwater Consistency, and required by the Chapter 105 and ESCGP-2 permit applications.

Transcontinental Gas Pipe Line Company, LLC. (Transco), a subsidiary of Williams Partners L.P. (Williams), submitted an application to the Federal Energy Regulatory Commission (FERC or Commission) for a Certificate of Public Convenience and Necessity (Certificate) for the Project on March 25, 2015.

The Project is an expansion of the existing Transco natural gas transmission system that will enable Transco to provide 1.7 million dekatherms per day (MMDth/d) of incremental firm transportation of natural gas from the Marcellus Shale production areas in northern Pennsylvania to its existing market areas, extending to as far south as the Station 85 Pooling Point in Choctaw County, Alabama. The Project includes modifications to the existing Transco Mainline system to reverse the direction of flow, enabling new north-to-south capabilities (bi-directional flow) to transport this new source of natural gas to existing markets. The Project consists of the following primary components within Pennsylvania:

- 57.3 miles of new 30-inch-diameter and 125.2 miles of 42-inch-diameter greenfield pipeline;
- 2.9 miles of new 36-inch-diameter and 8.6 miles of 42-inch-diameter pipeline loops;
- Two new compressor stations;
- Additional ancillary facilities, such as mainline valves (MLVs), cathodic protection, communication facilities, and internal inspection device (e.g., pig) launchers and receivers;
- Two new meter stations and three new regulator stations with interconnecting piping;
- Additional compression and related modifications to one existing compressor stations; and
- Modification to an existing meter station for use of shared facilities with a new meter station;

If FERC issues a Certificate for the Project and Transco obtains the applicable permits and authorizations, Transco anticipates that construction of the Project will begin by July 2016 to meet an in-service date of July 1, 2017.

Re: Transcontinental Gas Pipeline Company, LLC
Atlantic Sunrise Pipeline
Mount Joy Borough, Lancaster County

The municipality of Mount Joy Borough states that it:

- has adopted a municipal or multi-municipal comprehensive plan.
If yes, please provide date of adoption: _____
- has not adopted a municipal or multi-municipal comprehensive plan.

The County of Lancaster states that it:

- has adopted a county zoning ordinance, or a municipal or joint-municipal zoning ordinance.
- has not adopted a county zoning ordinance, or a municipal or joint-municipal zoning ordinance.

If applicable:

The municipality of Mount Joy Borough states that its zoning ordinance is generally consistent with its municipal comprehensive plan and the county comprehensive plan.

The above referenced proposed project

- meets the provisions of the local zoning ordinance

If zoning approval is required for the project to proceed, the above referenced project:

- has received zoning approval.
- has not received zoning approval.

If the proposed project has not received zoning approval:

What is the status of the zoning request for the proposed project? (e.g., Special Exception Approval from the Zoning Hearing Board required, Conditional Use approval from the Governing Body required)

Is there a legal challenge by the applicant with regard to zoning for the proposed project?

RE: Land Use Letter Request
Atlantic Sunrise Project

Dear Mr. Crescenzo,

The municipality of Mount Joy Borough, Lancaster County states that it has adopted a multi-municipal comprehensive plan on May 4, 2009.

The municipality of Mount Joy Borough, Lancaster County states that it has adopted a municipal zoning ordinance, last amended on July 12, 1999.

The municipality of Mount Joy Borough, Lancaster County states that its zoning ordinance is generally consistent with its municipal comprehensive plan and the county comprehensive plan.

The applicant has not provided the Borough with sufficient information concerning the precise facilities to be installed within the Borough and the location of such facilities to enable the Borough to determine the zoning district, property boundaries, and other matters. The applicant has stated its position that "local zoning is preempted" on page 3 of 8 of Attachment A to the material provided to the Borough. The Borough has been provided with insufficient information to determine whether the project meets the requirements of the Zoning Ordinance or any Borough Ordinance. The Borough has not been provided with any FERC determination.

Sincerely,

MOUNT JOY BOROUGH

Re: Atlantic Sunrise Project

Pequea Township, Lancaster County
Pennsylvania Acts 14, 67, 68, 127, and 167 Notification

Dear Pequea Township Supervisors:

In accordance with Section 1905-A of the Commonwealth Administrative Code, as amended by Act 14, written notification of proposed construction activities must be provided to all applicable municipalities and counties at least 30 days prior to the issuance of Pennsylvania Department of Environmental Protection (PADEP) permits; therefore, the purpose of this letter is to inform the Supervisors that TRC Solutions (TRC) intends to submit a Chapter 105 Water Obstruction and Encroachment Permit (Chapter 105) to the PADEP and an Erosion and Sediment Control General Permit (ESCGP-2) to the Lancaster County Conservation District on behalf of the Transcontinental Gas Pipeline Company, LLC (Transco), a subsidiary of Williams Partners L.P. (Williams) for the above referenced Project.

Additionally, this notification serves as Act 167 notification related to Stormwater Consistency, and required by the Chapter 105 and ESCGP-2 permit applications.

Transcontinental Gas Pipe Line Company, LLC. (Transco), a subsidiary of Williams Partners L.P. (Williams), submitted an application to the Federal Energy Regulatory Commission (FERC or Commission) for a Certificate of Public Convenience and Necessity (Certificate) for the Project on March 25, 2015.

The Project is an expansion of the existing Transco natural gas transmission system that will enable Transco to provide 1.7 million dekatherms per day (MMDth/d) of incremental firm transportation of natural gas from the Marcellus Shale production areas in northern Pennsylvania to its existing market areas, extending to as far south as the Station 85 Pooling Point in Choctaw County, Alabama. The Project includes modifications to the existing Transco Mainline system to reverse the direction of flow, enabling new north-to-south capabilities (bi-directional flow) to transport this new source of natural gas to existing markets. The Project consists of the following primary components within Pennsylvania:

- 57.3 miles of new 30-inch-diameter and 125.2 miles of 42-inch-diameter greenfield pipeline;
- 2.9 miles of new 36-inch-diameter and 8.6 miles of 42-inch-diameter pipeline loops;
- Two new compressor stations;

FEDERAL EXPRESS TRACKING (8077 7145 0015)

West Hempfield Township Board of Supervisors
3401 Marietta Avenue
Lancaster, PA 17601

Re: Atlantic Sunrise Project
West Hempfield Township, Lancaster County
Pennsylvania Acts 14, 67, 68, 127, and 167 Notification

Dear West Hempfield Township Supervisors:

In accordance with Section 1905-A of the Commonwealth Administrative Code, as amended by Act 14, written notification of proposed construction activities must be provided to all applicable municipalities and counties at least 30 days prior to the issuance of Pennsylvania Department of Environmental Protection (PADEP) permits; therefore, the purpose of this letter is to inform the Supervisors that TRC Solutions (TRC) intends to submit a Chapter 105 Water Obstruction and Encroachment Permit (Chapter 105) to the PADEP and an Erosion and Sediment Control General Permit (ESCGP-2) to the Lancaster County Conservation District on behalf of the Transcontinental Gas Pipeline Company, LLC (Transco), a subsidiary of Williams Partners L.P. (Williams) for the above referenced Project.

Additionally, this notification serves as Act 167 notification related to Stormwater Consistency, and required by the Chapter 105 and ESCGP-2 permit applications.

Transcontinental Gas Pipe Line Company, LLC. (Transco), a subsidiary of Williams Partners L.P. (Williams), submitted an application to the Federal Energy Regulatory Commission (FERC or Commission) for a Certificate of Public Convenience and Necessity (Certificate) for the Project on March 25, 2015.

The Project is an expansion of the existing Transco natural gas transmission system that will enable Transco to provide 1.7 million dekatherms per day (MMDth/d) of incremental firm transportation of natural gas from the Marcellus Shale production areas in northern Pennsylvania to its existing market areas, extending to as far south as the Station 85 Pooling Point in Choctaw County, Alabama. The Project includes modifications to the existing Transco Mainline system to reverse the direction of flow, enabling new north-to-south capabilities (bi-directional flow) to transport this new source of natural gas to existing markets. The Project consists of the following primary components within Pennsylvania:

- 57.3 miles of new 30-inch-diameter and 125.2 miles of 42-inch-diameter greenfield pipeline;
- 2.9 miles of new 36-inch-diameter and 8.6 miles of 42-inch-diameter pipeline loops;
- Two new compressor stations;
- Additional ancillary facilities, such as mainline valves (MLVs), cathodic protection, communication facilities, and internal inspection device (e.g., pig) launchers and receivers;
- Two new meter stations and three new regulator stations with interconnecting piping;
- Additional compression and related modifications to one existing compressor stations; and
- Modification to an existing meter station for use of shared facilities with a new meter station;

If FERC issues a Certificate for the Project and Transco obtains the applicable permits and authorizations, Transco anticipates that construction of the Project will begin by July 2016 to meet an in-service date of July 1, 2017.

East Donegal Township Board of Supervisors
190 Rock Point Road
Marietta, PA 17547

Re: Atlantic Sunrise Project
East Donegal Township, Lancaster County
Pennsylvania Acts 14, 67, 68, 127, and 167 Notification
****RESEND****

Dear East Donegal Township Supervisors:

This letter supplements the letter we sent to you on July 2, 2015 regarding the Atlantic Sunrise Project. Please note that there have been no significant revisions to this Project. This resubmission simply provides a corrected address for the Pennsylvania Department of Environmental Protection's reviewing Regional Office. No attachments are included with this revised letter.

In accordance with Section 1905-A of the Commonwealth Administrative Code, as amended by Act 14, written notification of proposed construction activities must be provided to all applicable municipalities and counties at least 30 days prior to the issuance of Pennsylvania Department of Environmental Protection (PADEP) permits; therefore, the purpose of this letter is to inform the Supervisors that TRC Solutions (TRC) intends to submit a Chapter 105 Water Obstruction and Encroachment Permit (Chapter 105) to the PADEP and an Erosion and Sediment Control General Permit (ESCGP-2) to the Lancaster County Conservation District on behalf of the Transcontinental Gas Pipeline Company, LLC (Transco), a subsidiary of Williams Partners L.P. (Williams) for the above referenced Project.

Additionally, this notification serves as Act 167 notification related to Stormwater Consistency, and required by the Chapter 105 and ESCGP-2 permit applications.

Transcontinental Gas Pipe Line Company, LLC. (Transco), a subsidiary of Williams Partners L.P. (Williams), submitted an application to the Federal Energy Regulatory Commission (FERC or Commission) for a Certificate of Public Convenience and Necessity (Certificate) for the Project on March 25, 2015.

The Project is an expansion of the existing Transco natural gas transmission system that will enable Transco to provide 1.7 million dekatherms per day (MMDth/d) of incremental firm transportation of natural gas from the Marcellus Shale production areas in northern Pennsylvania to its existing market areas, extending to as far south as the Station 85 Pooling Point in Choctaw County, Alabama. The Project includes modifications to the existing Transco Mainline system to reverse the direction of flow, enabling new north-to-south capabilities (bi-directional flow) to transport this new source of natural gas to existing markets. The Project consists of the following primary components within Pennsylvania:

- 57.3 miles of new 30-inch-diameter and 125.2 miles of 42-inch-diameter greenfield pipeline;
- 2.9 miles of new 36-inch-diameter and 8.6 miles of 42-inch-diameter pipeline loops;
- Two new compressor stations;
- Additional ancillary facilities, such as mainline valves (MLVs), cathodic protection, communication facilities, and internal inspection device (e.g., pig) launchers and receivers;
- Two new meter stations and three new regulator stations with interconnecting piping;

- Additional compression and related modifications to one existing compressor stations; and
- Modification to an existing meter station for use of shared facilities with a new meter station;

If FERC issues a Certificate for the Project and Transco obtains the applicable permits and authorizations, Transco anticipates that construction of the Project will begin by July 2016 to meet an in-service date of July 1, 2017.

This letter supplements the letter we sent to you on July 2, 2015 regarding the Atlantic Sunrise Project. Please note that there have been no significant revisions to this Project. This resubmission simply provides a corrected address for the Pennsylvania Department of Environmental Protection's reviewing Regional Office. No attachments are included with this revised letter.

In accordance with Section 1905-A of the Commonwealth Administrative Code, as amended by Act 14, written notification of proposed construction activities must be provided to all applicable municipalities and counties at least 30 days prior to the issuance of Pennsylvania Department of Environmental Protection (PADEP) permits; therefore, the purpose of this letter is to inform the Council that TRC Solutions (TRC) intends to submit a Chapter 105 Water Obstruction and Encroachment Permit (Chapter 105) to the PADEP and an Erosion and Sediment Control General Permit (ESCGP-2) to the Lancaster County Conservation District on behalf of the Transcontinental Gas Pipeline Company, LLC (Transco), a subsidiary of Williams Partners L.P. (Williams) for the above referenced Project.

Additionally, this notification serves as Act 167 notification related to Stormwater Consistency, and required by the Chapter 105 and ESCGP-2 permit applications.

Transcontinental Gas Pipe Line Company, LLC. (Transco), a subsidiary of Williams Partners L.P. (Williams), submitted an application to the Federal Energy Regulatory Commission (FERC or Commission) for a Certificate of Public Convenience and Necessity (Certificate) for the Project on March 25, 2015.

The Project is an expansion of the existing Transco natural gas transmission system that will enable Transco to provide 1.7 million dekatherms per day (MMDth/d) of incremental firm transportation of natural gas from the Marcellus Shale production areas in northern Pennsylvania to its existing market areas, extending to as far south as the Station 85 Pooling Point in Choctaw County, Alabama. The Project includes modifications to the existing Transco Mainline system to reverse the direction of flow, enabling new north-to-south capabilities (bi-directional flow) to transport this new source of natural gas to existing markets. The Project consists of the following primary components within Pennsylvania:

- 57.3 miles of new 30-inch-diameter and 125.2 miles of 42-inch-diameter greenfield pipeline;
- 2.9 miles of new 36-inch-diameter and 8.6 miles of 42-inch-diameter pipeline loops;
- Two new compressor stations;
- Additional ancillary facilities, such as mainline valves (MLVs), cathodic protection, communication facilities, and internal inspection device (e.g., pig) launchers and receivers;
- Two new meter stations and three new regulator stations with interconnecting piping;
- Additional compression and related modifications to one existing compressor stations; and
- Modification to an existing meter station for use of shared facilities with a new meter station;

If FERC issues a Certificate for the Project and Transco obtains the applicable permits and authorizations, Transco anticipates that construction of the Project will begin by July 2016 to meet an in-service date of July 1, 2017.

Re: Transcontinental Gas Pipeline Company, LLC
Atlantic Sunrise Pipeline
Mount Joy Borough, Lancaster County

The municipality of Mount Joy Borough states that it:

- has adopted a municipal or multi-municipal comprehensive plan.
If yes, please provide date of adoption: _____
- has not adopted a municipal or multi-municipal comprehensive plan.

The County of Lancaster states that it:

- has adopted a county zoning ordinance, or a municipal or joint-municipal zoning ordinance.
- has not adopted a county zoning ordinance, or a municipal or joint-municipal zoning ordinance.

If applicable:

The municipality of Mount Joy Borough states that its zoning ordinance is generally consistent with its municipal comprehensive plan and the county comprehensive plan.

The above referenced proposed project

- meets the provisions of the local zoning ordinance

If zoning approval is required for the project to proceed, the above referenced project:

- has received zoning approval.
- has not received zoning approval.

If the proposed project has not received zoning approval:

What is the status of the zoning request for the proposed project? (e.g., Special Exception Approval from the Zoning Hearing Board required, Conditional Use approval from the Governing Body required)

Is there a legal challenge by the applicant with regard to zoning for the proposed project?

Lancaster, PA 17601

Re: Atlantic Sunrise Project
West Hempfield Township, Lancaster County
Pennsylvania Acts 14, 67, 68, 127, and 167 Notification
****RESEND****

Dear West Hempfield Township Supervisors:

This letter supplements the letter we sent to you on July 2, 2015 regarding the Atlantic Sunrise Project. Please note that there have been no significant revisions to this Project. This resubmission simply provides a corrected address for the Pennsylvania Department of Environmental Protection's reviewing Regional Office. No attachments are included with this revised letter.

In accordance with Section 1905-A of the Commonwealth Administrative Code, as amended by Act 14, written notification of proposed construction activities must be provided to all applicable municipalities and counties at least 30 days prior to the issuance of Pennsylvania Department of Environmental Protection (PADEP) permits; therefore, the purpose of this letter is to inform the Supervisors that TRC Solutions (TRC) intends to submit a Chapter 105 Water Obstruction and Encroachment Permit (Chapter 105) to the PADEP and an Erosion and Sediment Control General Permit (ESCGP-2) to the Lancaster County Conservation District on behalf of the Transcontinental Gas Pipeline Company, LLC (Transco), a subsidiary of Williams Partners L.P. (Williams) for the above referenced Project.

Additionally, this notification serves as Act 167 notification related to Stormwater Consistency, and required by the Chapter 105 and ESCGP-2 permit applications.

Transcontinental Gas Pipe Line Company, LLC. (Transco), a subsidiary of Williams Partners L.P. (Williams), submitted an application to the Federal Energy Regulatory Commission (FERC or Commission) for a Certificate of Public Convenience and Necessity (Certificate) for the Project on March 25, 2015.

The Project is an expansion of the existing Transco natural gas transmission system that will enable Transco to provide 1.7 million dekatherms per day (MMDth/d) of incremental firm transportation of natural gas from the Marcellus Shale production areas in northern Pennsylvania to its existing market areas, extending to as far south as the Station 85 Pooling Point in Choctaw County, Alabama. The Project includes modifications to the existing Transco Mainline system to reverse the direction of flow, enabling new north-to-south capabilities (bi-directional flow) to transport this new source of natural gas to existing markets. The Project consists of the following primary components within Pennsylvania:

- 57.3 miles of new 30-inch-diameter and 125.2 miles of 42-inch-diameter greenfield pipeline;
- 2.9 miles of new 36-inch-diameter and 8.6 miles of 42-inch-diameter pipeline loops;
- Two new compressor stations;
- Additional ancillary facilities, such as mainline valves (MLVs), cathodic protection, communication facilities, and internal inspection device (e.g., pig) launchers and receivers;
- Two new meter stations and three new regulator stations with interconnecting piping;
- Additional compression and related modifications to one existing compressor stations; and

- Modification to an existing meter station for use of shared facilities with a new meter station;

If FERC issues a Certificate for the Project and Transco obtains the applicable permits and authorizations, Transco anticipates that construction of the Project will begin by July 2016 to meet an in-service date of July 1, 2017.

Applicant Contact: Roberta Zwier
Manager, Environmental Permitting, Atlantic-Gulf Operating Area
2800 Post Oak Blvd., Level 6
Houston, Texas 77056

Section 1905A of the Commonwealth Administrative Code, as amended by Act 14, requires applicants for PA DEP permits to provide written notice to municipalities and counties where the project is located 30 days in advance of PA DEP's decision to issue or deny the permit.

Please submit any comments concerning the landuse aspects of the Chapter 105 application for portions of the Project located in your township within 30 days from the date of receipt of this letter to the Waterways and Wetland Program at the following address:

PADEP Southcentral Regional Office
909 Elmerton Avenue
Harrisburg, Pennsylvania 17110
717-705-4802

Please submit any comments concerning the landuse aspects of the Chapter 102 application for portions of the Project located in your township within 30 days from the date of receipt of this letter to the Waterways and Wetland Program, attention Mark Lonergan, at the following address:

Mark Lonergan
Reading District Office
1005 Cross Roads Boulevard
Reading, PA 19605
Phone: (610) 916-0100

Enclosed is the General Information Form (GIF) (**Attachment A**) for the permit application, a project location map (**Attachment B**), and a Municipal Land Use letter (**Attachment C**) that is to be submitted with the permit application to PADEP. In addition, per ESCGP-2 requirements, the completed ESCGP-2 Notice of Intent (NOI) is included as **Attachment D**.

Please complete the Municipal Land Use Letter (Attachment C) and return **within 30 days** of the receipt of this letter to:

Steve Crescenzo
TRC Environmental Corporation
2200 Liberty Avenue, Suite 100
Pittsburgh, PA 15222

Please do not send this letter to the PADEP, as we must include it with our permit application. Should you have any questions or concerns regarding this notification, please contact John Zimmer at (978)-697-0854 or via email at zimmer@trcsolutions.com.

Sincerely,

Steve Crescenzo
Senior Environmental Scientist

Pittsburgh, PA 15222

From: Lancaster County

Re: Transcontinental Gas Pipeline Company, LLC
Atlantic Sunrise Pipeline
West Hempfield Township, Lancaster County

The municipality of West Hempfield Township states that it:

- has adopted a municipal or multi-municipal comprehensive plan.
If yes, please provide date of adoption: _____
- has not adopted a municipal or multi-municipal comprehensive plan.

The County of Lancaster states that it:

- has adopted a county zoning ordinance, or a municipal or joint-municipal zoning ordinance.
- has not adopted a county zoning ordinance, or a municipal or joint-municipal zoning ordinance.

If applicable:

The municipality of West Hempfield Township states that its zoning ordinance is generally consistent with its municipal comprehensive plan and the county comprehensive plan.

The above referenced proposed project

- meets the provisions of the local zoning ordinance

If zoning approval is required for the project to proceed, the above referenced project:

- has received zoning approval.
- has not received zoning approval.

If the proposed project has not received zoning approval:

What is the status of the zoning request for the proposed project? (e.g., Special Exception Approval from the Zoning Hearing Board required, Conditional Use approval from the Governing Body required)

Is there a legal challenge by the applicant with regard to zoning for the proposed project?

Name and Contact Information for Municipal Zoning Officer:
