

Atlantic Sunrise Pipeline Project

This information sheet serves as a summary overview of the project

Additional information on the review of submitted permit applications will be shared as it becomes available.

The Atlantic Sunrise is a natural gas pipeline proposed by Transcontinental Gas Pipe Line Company, LLC (Transco). The proposed Atlantic Sunrise Pipeline Project is designed to supply natural gas by connecting producing regions in northeastern Pennsylvania to markets in the Mid-Atlantic and southeastern states.

The overall pipeline project is regulated by the Federal Energy Regulatory Commission (FERC). Safety regulations for the pipeline are administered by U.S. Department of Transportation through the Pipeline Hazardous Materials Safety Administration.

WHERE

The proposed project involves the construction, operation and maintenance of: approximately 183 miles of new pipeline referred to as the Central Penn North & Central Penn South Line; two pipeline capacity expansion loops totaling about 12 miles and referred to as the Chapman Loop and Unity Loop; and two new compressor facilities in Pennsylvania. The project also involves upgrades to 2 existing compressor stations. The project crosses three regions of the Pennsylvania Department of Environmental Protection (DEP): 4 counties in the Northeast Region, 4 counties in North-Central Region, and 2 counties in the South-Central Region.

PADEP PERMIT REQUIREMENTS

The project requires several permits from DEP:

- **State Water Quality Certification (WQC):** Prior to obtaining authorization from FERC to construct an interstate natural gas transmission pipeline project, an applicant must provide FERC with a WQC from each state through which the pipeline will be constructed. Unless a state waives its right to issue a WQC, each state must evaluate whether the proposed project will be constructed in a manner that achieves the state's water quality standards. The WQC may be conditioned upon the applicant acquiring permits, authorizations, or approvals required under existing state water quality programs.
- **Chapter 105 – Water Obstruction and Encroachment Permits:** These permits are required as a condition of the WQC for proposed activities located in, along, across or projecting into a watercourse, floodway or body of water, including wetlands.
 - The applicant has submitted Chapter 105 permit applications for each county that will be crossed for a total of 10 Chapter 105 permit applications. Eight of the Chapter 105 permit applications relate to the proposed Central Penn Line and two of the Chapter 105 permit applications relate to the proposed Unity and Chapman Loops.
- **Chapter 102 – Erosion & Sediment Control General Permit (ESCGP-2):** This permit is required as a condition of the WQC for proposed earth disturbances associated with oil and gas exploration, production, processing or treatment operations or transmission facilities where earth disturbance is five acres or greater.
 - One ESCGP-2 Notice of Intent (NOI) has been submitted, and review is being coordinated with the applicable county conservation districts. ESCGP-2 NOIs were also received in the applicable County Conservation Districts for the Unity and Chapman Loops.

- **NPDES Permit for Hydrostatic Test Water Discharges (PAG-10):** This general permit is required as a condition of the WQC for proposed discharges of wastewater generated from pressure testing the proposed pipeline.
 - The Department has received 1 PAG-10 permit application for the proposed project.
- **Air Quality Permits:** These permits are needed to ensure that the sources that are constructed are operated in compliance with applicable requirements in the Pennsylvania Air Pollution Control Act, the Federal Clean Air Act and regulations adopted under the Federal Clean Air Act.
 - The North-Central Region has received two air quality permits for upgrades to existing facilities.

CURRENT STATUS

- Following technical review and opportunity for public comment, the Department issued a WQC for the proposed project on April 5, 2016. The WQC is conditioned upon the applicant obtaining certain discharge permits, erosion and sediment control permits, and water obstruction and encroachment permits.
- For the Chapman Loop in Clinton County, the Clinton County Conservation District acknowledged the ESCGP-2 permit on April 29, 2016 and the Department issued the Chapter 105, Water Obstruction and Encroachment permit on April 29, 2016.
- Following a technical review of the application that was received December 29, 2016, the Department issued an authorization to use the PAG-10 general permit on April 11, 2017 authorizing the discharge of hydrostatic test water from the proposed project.
- The North-Central Region has issued one permit for compressor station upgrades and continues to review another. A permit (19-00007B) was issued for an upgrade to Station 517 in Jackson Township, Columbia County on February 1, 2017.
- The Chapter 102 NOI and Chapter 105 application for the Unity Loop in Lycoming County are under technical review by the North-Central Regional Office and Lycoming County Conservation District.
- During the week of May 1, 2017, DEP received updated application material for the Central Penn Line from Transco in response to the technical deficiency letters that were sent on February 24, 2017.

NEXT STEPS

- For the pending air quality permit application (41-00001B) for upgrades at Station 520 in Mifflin Township, Lycoming County, the Department will consider testimony from the April 19, 2017 public hearing, any submitted public comments that were provided in response to the published notice in the *Pennsylvania Bulletin* and will continue its technical review of the permit application.
- The Department will continue to conduct its technical review of the Chapter 105 applications and Chapter 102 NOI for the Central Penn Line. Notice of the applications and NOI will be published in the *Pennsylvania Bulletin* on May 27, 2017 and DEP will accept written comments through Monday, June 26, 2017.
- DEP will hold 4 public hearings to take comments from the public on the Chapter 105 permit applications and Chapter 102 NOI. Each hearing will begin at 6:00 p.m. and end at 9:00 p.m. The dates and locations are as follows:
 - Monday, June 12, 2017 — Tunkhannock Middle School Auditorium, Tunkhannock Middle School, 200 Franklin Avenue, Tunkhannock PA 18657
 - Monday, June 12, 2017 — Max Smith Auditorium, Lancaster Farm and Home Center, 1383 Arcadia Rd, Lancaster, PA 17601
 - Tuesday, June 13, 2017 — Auditorium, Bloomsburg High School, 1200 Railroad Street, Bloomsburg, PA 17815
 - Wednesday, June 14, 2017 — Lutz Hall, Lebanon Valley College, 101 North College Avenue, Annville, PA 17003

MORE INFORMATION

- For more information, and to track updates, visit DEP's Atlantic Sunrise Web Page (dep.pa.gov/pipelines).
- For region-specific questions, send an email to the following respective regional address: Northeast Regional Office: RA-EPWW-NERO@PA.GOV OR North-Central Regional Office: RA-EPWW-NCRO@PA.GOV . Project-wide inquiries may be directed to the DEP's Northeast Regional Office.
