

ANNEX A

TITLE 25. ENVIRONMENTAL PROTECTION
PART I. DEPARTMENT OF ENVIRONMENTAL PROTECTION
Subpart C. PROTECTION OF NATURAL RESOURCES
ARTICLE II. WATER RESOURCES

CHAPTER 93. WATER QUALITY STANDARDS

* * * * *

GENERAL PROVISIONS

§ 93.1. Definitions.

The following words and terms, when used in this chapter, have the following meanings, unless the context clearly indicates otherwise:

* * * * *

[Critical use—The most sensitive designated or existing use the criteria are designed to protect.]

* * * * *

Point source discharge—A pollutant source regulated under the National Pollutant Discharge Elimination System (NPDES) as defined in § [92.1] **92a.2** (relating to definitions).

* * * * *

ANTIDegradation REQUIREMENTS

* * * * *

§ 93.4c. Implementation of antidegradation requirements.

* * * * *

(b) *Protection of High Quality and Exceptional Value Waters*

(1) *Point source discharges.* The following applies to point source discharges to High Quality or Exceptional Value Waters.

* * * * *

(ii) *Public participation requirements for discharges to High Quality or Exceptional Value Waters.* The following requirements apply to discharges to High Quality or Exceptional Value Waters, as applicable:

DRAFT - This Document not to be Cited, Distributed or Referenced in Any Way. – **DRAFT**

(A) The Department will hold a public hearing on a proposed new, additional or increased discharge to Exceptional Value Waters when requested by an interested person on or before the termination of the public comment period on the discharge.

(B) For new or increased point source discharges, in addition to the public participation requirements in §§ [92.61, 92.63 and 92.65] 92a.81, 92a.82, 92a.83, 92a.85 (relating to public notice of permit application and public hearing; public access to information; and notice to other government agencies), the applicant shall identify the antidegradation classification of the receiving water in the notice of complete application in § [92.61(a)] 92a.86 (relating to notice of issuance or final action on a permit).

* * * * *

(c) *Special provisions for sewage facilities in High Quality or Exceptional Value Waters.*

(1) *SEJ approval in sewage facilities planning and approval in High Quality Waters.* A proponent of a new, additional, or increased sewage discharge in High Quality Waters shall include an SEJ impact analysis as part of the proposed revision or update to the official municipal sewage facilities plan under Chapter 71 (relating to administration of sewage facilities planning program). The Department will make a determination regarding the consistency of the SEJ impact analysis with subsection (b)(1)(iii). The determination will constitute the subsection (b)(1)(iii) analysis at the National Pollutant Discharge Elimination System (NPDES) permit review stage under Chapter 92a (relating to National Pollutant Discharge Elimination System permitting, monitoring and compliance), unless there is a material change in the project or law between sewage facilities planning and NPDES permitting, in which case the proponent shall recommence sewage facilities planning and perform a new social or economic justification impact analysis.

* * * * *

§ 93.4d. Processing of petitions, evaluations and assessments to change a designated use.

(a) *Public notice of receipt of [evaluation] petition, or assessment of waters, for High Quality or Exceptional Value Waters redesignation.* The Department will publish in the *Pennsylvania Bulletin* and **[in a local newspaper of general circulation] by other means designed to effectively reach a wide audience**, notice of receipt of a complete **[evaluation] petition** which has been accepted by the EQB recommending a High Quality or Exceptional Value Waters redesignation, or notice of the Department’s intent to assess surface waters for potential redesignation as High Quality or Exceptional Value Waters. The assessments may be undertaken in response to a petition or on the Department’s own initiative. The notice will request submission of information concerning the water quality of the waters subject to the evaluation, or to be assessed, for use by the Department to supplement any studies which have been performed. The Department will send a copy of the notice to all municipalities containing waters subject to the **[evaluation] petition** or assessment.

* * * * *

§ 93.7. Specific water quality criteria.

DRAFT - This Document not to be Cited, Distributed or Referenced in Any Way. – **DRAFT**

(a) Table 3 displays specific water quality criteria and associated critical uses. The criteria associated with the Statewide water uses listed in § 93.4, Table 2 apply to all surface waters, unless a specific exception is indicated in § § 93.9a—93.9z. **These exceptions will be indicated on a stream-by-stream or segment-by-segment basis by the words “Add” or “Delete” followed by the appropriate symbols described elsewhere in this chapter.** Other specific water quality criteria apply to surface waters as specified in § § 93.9a—93.9z. All applicable criteria shall be applied in accordance with this chapter, Chapter 96 (relating to water quality standards implementation) and other applicable State and Federal laws and regulations.

TABLE 3

<i>Parameter</i>	<i>Symbol</i>	<i>Criteria</i>	<i>Critical Use*</i>

Chloride	Ch ₁	Maximum 250 mg/L	PWS
	<u>Ch₂</u>	<p><u>Shall not exceed, in freshwater, the concentration calculated (in mg/L) by the following equations:</u></p> <p><u>1 hour average Criteria Maximum Concentration (CMC) criterion:</u></p> $\text{CMC} = \frac{287.8(\text{Hardness})^{0.205797}(\text{Sulfate})}{0.07452}$ <p><u>4 day average Criteria Continuous Concentration (CCC) criterion:</u></p> $\text{CCC} = \frac{177.87(\text{Hardness})^{0.205797}(\text{Sulfate})}{0.07452}$ <p>Hardness (in mg/L as CaCO₃) and sulfate (in mg/L) values shall be based on receiving water natural quality.</p>	<u>CWF, WWF, TSF, MF</u>
Dissolved Oxygen		*****	
		The following specific dissolved oxygen criteria recognize the natural process of stratification in lakes, ponds and impoundments. These criteria apply to flowing [waters] <u>freshwater</u> and to the epilimnion of a naturally stratified lake, pond or impoundment. The hypolimnion in a naturally stratified lake, pond or impoundment is protected by the narrative water quality criteria in §93.6 (relating to general water quality criteria). For	

nonstratified lakes, ponds or impoundments, the dissolved oxygen criteria apply throughout the lake, pond or impoundment to protect the critical uses.

	DO ₁	For flowing waters, [minimum daily] 7-day average 6.0 mg/l; minimum 5.0 mg/l. <u>For naturally reproducing Salmonid early life stages, 7-day average 9.0 mg/l; minimum 8.0 mg/l, in accordance with (e).</u> For lakes, ponds and impoundments, minimum 5.0 mg/l.	CWF [HQ- WWF] [HQ-TSF]
	DO ₂	[Minimum daily average 5.0 mg/l; minimum 4.0 mg/l.] 7-day average 5.5 mg/l; minimum 5.0 mg/l.	WWF
	DO ₃	For the period February 15 to July 31 of any year, [minimum daily] 7-day average 6.0 mg/l; minimum 5.0 mg/l. For the remainder of the year, [minimum daily] 7-day average [5.0] 5.5 mg/l; minimum [4.0] 5.0 mg/l.	TSF
	[DO ₄	Minimum 7.0 mg/l.	HQ- CWF]
		* * * * *	
Sulfate	Sul ₁	Maximum 250 mg/L	PWS
	Sul ₂	<u>Shall not exceed the lesser of either 2,000 mg/L, or the result of the appropriate hardness and chloride based conditional numeric limits (in mg/L sulfate) as described below. Hardness (in mg/L as CaCO₃) and chloride (in mg/L) values used in the determination of the sulfate water quality standard shall be based on receiving water natural quality.</u>	<u>LWS, AWS, CWF, WWF, TSF, MF</u>
		<u>A.) 500 mg/L, if the hardness concentration is less than 100 mg/L, or chloride concentration is less than 5 mg/L.</u>	
		<u>B.) The result of the following equations (in mg/L sulfate) when the hardness value is greater than or equal to 100 mg/L, but less than or equal to 500 mg/L:</u>	
		<u>1.) if the chloride value is greater than or equal to 5 mg/L, but less than 25 mg/L:</u>	

$S = [-57.478 + 5.79 (\text{hardness}) + 54.163 (\text{chloride})] * 0.65$
where, S = sulfate concentration; or

2.) if the chloride value is greater than or equal to 25 mg/L:
 $S = [1276.7 + 5.508 (\text{hardness}) - 1.457 (\text{chloride})] * 0.65$
where, S = sulfate concentration

C.) 2,000 mg/L, if the hardness concentration is greater than 500 mg/L and the chloride concentration is 5 mg/L or greater.

Temperature

Maximum temperatures in the receiving water body resulting from heated waste sources regulated under Chapters [92] **92a**, 96 table. and other sources where temperature limits are necessary to protect designated and existing uses. Additionally, these wastes may not result in a change by more than 2°F during a 1-hour period.

See the following

(b) [Table 4 contains specific water quality criteria that apply to the water uses to be protected. When the symbols listed in Table 4 appear in the Water Uses Protected column in § § 93.9a—93.9z, they have the meaning listed in the second column of Table 4. Exceptions to these standardized groupings will be indicated on a stream-by-stream or segment-by-segment basis by the words “Add” or “Delete” followed by the appropriate symbols described elsewhere in this chapter.

TABLE 4

<i>Symbol</i>	<i>Water Uses Protected</i>	<i>Specific Criteria</i>

EV Statewide list plus Exceptional Value Waters Existing quality]

[Reserved]

* * * * *

(e) For naturally reproducing Salmonids, protected early life stages include: all embryonic and larval stages and all juvenile forms to 30 days after hatching. The DO₁ standard for naturally reproducing Salmonid early life stages shall apply during October 1 through May 31.

The DO₁ standard for naturally reproducing Salmonid early life stages applies unless it can be demonstrated to the Department’s satisfaction, that the following conditions are documented: 1) the absence of young of the year Salmonids measuring less than 150 mm in the surface water; and 2) the absence of multiple age classes of Salmonids in the surface water. These conditions shall only apply to Salmonids resulting from natural reproduction occurring in the surface waters. Additional biological information may be considered by the Department which evaluates the presence or absence of early life stages.

* * * * *

§ 93.8b. Metals criteria.

Dissolved criteria are footnoted in Table 5, and have been developed by applying the most current EPA conversion factors to the total recoverable criteria. The EPA factors are listed in the following Conversion Factors Table.

Conversion Factors Table

	<i>Chronic</i>	<i>Acute</i>	<i>Source</i>
Arsenic	1.000 (As3+)	1.000 (As3+)	1,2
Cadmium	1.101672- (ln[H] x 0.041838)	1.136672- (ln[H] x 0.041838)	2
<u>Chromium III</u>	<u>.860</u>	<u>.316</u>	<u>1,2</u>
Chromium VI	0.962	0.960	1, 2

* * * * *

§ 93.8d. Development of site-specific water quality criteria.

* * * * *

f) If the Department determines that site-specific criteria are appropriate in accordance with subsection (a), the Department will do the following:

(1) Publish the site-specific criterion in the *Pennsylvania Bulletin*, along with other special conditions under [§ 92.61(a)(5)] **§§ 92a.82 and 92a.83** (relating to public notice of permit application; and public hearing) and provide for public participation and public hearing in accordance with § [92.61 and § 92.63 and 92.65] **92a.81, 92a.82, 92a.83 and 92a.85** (relating to public access to information; and notice to other government agencies).
