

Annex A

TITLE 25. ENVIRONMENTAL PROTECTION

PART I. DEPARTMENT OF ENVIRONMENTAL PROTECTION

Subpart C. PROTECTION OF NATURAL RESOURCES

ARTICLE II. WATER RESOURCES

CHAPTER 102. EROSION AND SEDIMENT CONTROL AND
STORMWATER MANAGEMENT

GENERAL PROVISIONS

ENFORCEMENT

GENERAL PROVISIONS

§ 102.1. Definitions.

The following words and terms, when used in this chapter, have the following meanings, unless the context clearly indicates otherwise:

ABACT--Antidegradation best available combination of technologies—COST EFFECTIVE TREATMENT [~~Treatment~~], land disposal, pollution prevention and stormwater reuse BMPs that will individually or collectively manage the difference in the net change IN [~~from preexisting~~] stormwater volume, rate, and quality for storm events up to and including the 2-year/24-hour storm WHEN COMPARED TO THE STORMWATER RATE, VOLUME [~~that is not fully managed by nondischarge alternative BMPs~~] and QUALITY PRIOR TO THE EARTH DISTURBANCE ACTIVITIES TO [~~that will~~] maintain and protect the existing quality of the receiving surface water.

* * * * *

Act 167--The Storm Water Management Act (32P. S. §§ 680.1--680.17)

Agricultural operation--The management and use of farming resources for the production of crops, livestock, or poultry, or for equine activity.

Agricultural plowing or tilling activity--

(i) Earth disturbance activity involving the preparation and maintenance of soil for the production of agricultural crops.

(ii) **The term includes no-till cropping methods WHICH ARE THE PRACTICE OF PLANTING CROPS WITH MINIMAL MECHANICAL TILLAGE.**

Along--Touching or contiguous; to be in contact with; to abut upon.

Animal heavy use area--Barnyard, feedlot, loafing area, exercise lot, or other similar area on an agricultural operation where because of the concentration of animals it is not possible to establish and maintain vegetative cover of a density capable of minimizing accelerated erosion and sedimentation by usual planting methods. THIS TERM DOES NOT INCLUDE ENTRANCES, PATHWAYS AND WALKWAYS BETWEEN AREAS WHERE ANIMALS ARE HOUSED OR KEPT IN CONCENTRATION.

*BMPs--Best management practices--Activities, facilities, measures, **planning** or procedures used to minimize accelerated erosion and sedimentation **and manage stormwater** to protect, maintain, reclaim, and restore the quality of waters and the existing and designated uses of waters within this Commonwealth **before, during, and after earth disturbance activities.***

* * * * *

~~*[Collector--A channel, dike or other conveyance, constructed downslope of an earth disturbance activity for the purpose of collecting stormwater runoff from [an existing or proposed disturbed] that area and conveying it to facilities for sediment retention or removal.*~~

*[County conservation] Conservation district--A conservation district, as defined in section 3(c) of the Conservation District Law (3 P. S. § 851(c)), which has the authority under a delegation agreement executed with the Department to administer and enforce all or a portion of the erosion **[and]**, sediment **[control]**, **and stormwater management** program in this Commonwealth.*

*Conservation Plan--A plan that identifies conservation practices and includes site specific BMPs **[which minimize the potential for accelerated erosion and sediment from]** for agricultural plowing or tilling activities **and animal heavy use areas.***

[(i) BMPs for agricultural plowing or tilling activities, including soil loss tolerance values (T), are identified in the *Pennsylvania Soil and Water Conservation Technical Guide*, United States Department of Agriculture, Natural Resources Conservation Service, 1991.

(ii) The Conservation Plan shall include a schedule for the implementation of the BMPs.

Dewatering zone--The zone within a sediment basin where stormwater runoff is held and released in a controlled manner.]

* * * * *

~~[*Diversion*--A facility, including a channel, terrace or dike or a conveyance constructed up-slope of an earth disturbance activity for the purpose of diverting the disturbed area to divert clean offsite runoff away from an existing or proposed disturbed area the earth disturbance activity.]~~

Earth disturbance activity--A construction or other human activity which disturbs the surface of the land, including **[,but not limited to,]** land clearing and grubbing, grading, excavations, embankments, land development, agricultural plowing or tilling, **operation of animal heavy use areas**, timber harvesting activities, road maintenance activities, **oil and gas activities**, well drilling, mineral extraction, and the moving, depositing, stockpiling, or storing of soil, rock or earth materials.

* * * * *

E & S Permit--Erosion and Sediment Control Permit--A permit required for earth disturbance activities **[of 25 acres (10 hectares) or more]** where the earth disturbance is associated with timber harvesting **[or]**, road maintenance activities, **or oil and gas activities**.

E & S Plan--Erosion and Sediment Control Plan--A site-specific plan **[identifying]** consisting of both drawings and a narrative that identifies BMPs to minimize accelerated erosion and sedimentation **before, during and after earth disturbance activities**. **[For agricultural plowing or tilling activities, the Erosion and Sediment Control Plan is that portion of a conservation plan identifying BMPs to minimize accelerated erosion and sedimentation.]**

~~[*Forest Stewardship Plan*--A written plan that provides an overview of a woodland property in the context of a landowner's needs and objectives and serves as a means of communicating technical information in a concise form that is useful to the landowner.]~~

Intermittent stream--A body of water flowing in a channel or bed composed primarily of substrates associated with flowing water, which, during periods of the year, is below the local water table and obtains its flow from both surface runoff and groundwater discharges.

~~[K factor--The soil erosion factor used for determining the level of potential erosion based upon soil characteristics.]~~

~~*Licensed professional--Professional engineers, landscape architects, geologists and land surveyors licensed to practice in this Commonwealth.*~~

~~**LONG-TERM OPERATION AND MAINTENANCE--THE ROUTINE INSPECTION, MAINTENANCE REPAIR OR REPLACEMENT OF A BMP TO ENSURE PROPER FUNCTION FOR THE DURATION OF TIME THAT THE BMP IS NEEDED.**~~

~~*Municipality--[(i)] A county, city, borough, town, township, school district, institution or authority [created by any one or more of the foregoing] or another public body created by or pursuant to state law. [(ii)] For purposes of this definition, town includes an incorporated town.*~~

~~*NOI--Notice of Intent--A request, on a form provided by the Department [or county conservation district], for coverage under [a General] AN NPDES Permit for Stormwater Discharges Associated With Construction Activities.*~~

~~*NOT--Notice of Termination--A request, on a form provided by the Department, to terminate coverage under a [permit by rule,] General or Individual NPDES Permit for Stormwater Discharges Associated With Construction Activities or other permits under this chapter.*~~

~~*NPDES--National Pollutant Discharge Elimination System--The National system for the issuance of permits under section 402 of the Federal Clean Water Act (33 U.S.C.A. § 1342) including a state or interstate program which has been approved in whole or in part by the EPA, including the regulations codified in Chapter 92 (relating to National Pollutant Discharge Elimination System permitting, monitoring and compliance), and as specified in this chapter.*~~

~~*NPDES Permit for Stormwater Discharges Associated With Construction Activities--A permit required for the discharge or potential discharge of stormwater [into waters of this Commonwealth] INTO WATERS OF THIS COMMONWEALTH from construction activities, including clearing and grubbing, grading and excavation activities involving [5] [5].*~~

~~**(i) Equal to or greater than 1] ONE (1) acre [and less than 5 acres] (0.4 [to 2] hectares) OR MORE of earth disturbance ACTIVITY [with a point source discharge to surface waters of this Commonwealth,] or an earth disturbance ACTIVITY on any portion, part, or during any stage of, a larger common plan of development or sale that involves [equal to or greater than 1] ONE (1) acre [to less than 5 acres] (0.4 to 2 hectares) OR MORE of earth disturbance [with a point**~~

~~source discharge to surface waters of this Commonwealth]~~ over the life of the project.

[~~(ii) Five acres (2 hectares) or more of earth disturbance, or an earth disturbance on any portion, part or during any stage of, a larger common plan of development or sale that involves 5 acres (2 hectares) or more of earth disturbance over the life of the project.~~]

Nondischarge alternative--Environmentally sound and cost-effective BMPs that individually or collectively eliminate the net change IN [from preexisting] stormwater volume, rate and quality for storm events up to and including the 2-year/24-hour storm WHEN COMPARED TO THE STORMWATER RATE, VOLUME AND QUALITY PRIOR TO THE EARTH DISTURBANCE ACTIVITIES.

Normal pool elevation--

(i) For bodies of water which have no structural measures to regulate height of water, the height of water at ordinary stages of low water unaffected by drought.

(ii) For structurally regulated bodies of water, the elevation of the spillway, outlet control, or dam crest which maintains the body of water at a specified height.

(iii) The term does not apply to wetlands.

Oil and gas activities--Earth disturbance associated with oil and gas exploration, production, processing, or treatment operations or transmission facilities.

Operator--A person who has one or more of the following:

(i) Oversight responsibility of earth disturbance activity on a project site or a portion thereof [which] who has the ability to make modifications to the [Erosion and Sediment Control] E & S Plan, PCSM Plan or site specifications.

(ii) Day-to-day operational control over earth disturbance activity on a project site or a portion thereof to ensure compliance with the [Erosion and Sediment Control] E & S Plan or PCSM Plan.

Perennial stream--A body of water flowing in a channel or bed composed primarily of substrates associated with flowing waters and capable, in the absence of pollution or other manmade stream disturbances, of supporting a benthic macro-invertebrate community which is composed of two or more recognizable taxonomic groups of organisms which are large enough to be seen by the unaided eye and can be retained by a United States Standard No. 30 sieve (28 meshes per inch, 0.595 mm openings) and live at least part of their life cycles within or upon available substrates in a body of water or water transport system.

* * * * *

Person--[An] Any operator, [natural person, partnership, association or corporation or an agency, instrumentality or entity of Federal or State government, including a municipality] individual, public or private corporation, partnership, association, municipality or political subdivision of this Commonwealth, institution, authority, firm, trust, estate, receiver, guardian, personal representative, successor, joint venture, joint stock company, fiduciary; Department, agency or instrumentality of State, Federal or local government, or an agent or employee thereof; or any other legal entity.

* * * * *

Permanent pool--The area within a sediment basin which is designed to be inundated with water at all times.

Principal spillway--The structure within a sediment basin which controls the discharge of water from the facility.]

Point source--

~~—(i) Any discernible, confined and discrete conveyance, including any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, landfill leachate collection system, or vessel or other floating craft, from which pollutants are or may be discharged.~~

~~—(ii) The term includes concentrated or channelized flow associated with stormwater.~~

~~—(iii) The term does not include sheet flow associated with stormwater.]~~

Pollutant--Any contaminant or other alteration of the physical, chemical, biological or radiological integrity of surface water which causes or has the potential to cause pollution as defined in section 1 of The Clean Streams Law (35 P. S. § 691.1).

Post construction stormwater--Stormwater associated with a project site after the earth disturbance activity has been completed and the project site is permanently stabilized.

PCSM--Post construction stormwater management.

PCSM Plan--A site-specific plan identifying BMPs to manage changes in stormwater runoff volume, rate and water quality after earth disturbance activities have ended and the project site is permanently stabilized.

PPC Plan--Preparedness, Prevention and Contingency Plan--A written plan that identifies an emergency response program, material and waste inventory, spill and leak prevention and response, inspection program, housekeeping program, security and external factors, developed and implemented at the construction site to control potential discharges of pollutants other than sediment into waters of this Commonwealth.

Project site--The entire area of activity, development, lease, or sale including:

* * * * *

~~[ROC--Registration of coverage for the permit-by-rule]~~

ROAD MAINTENANCE ACTIVITIES--EARTH DISTURBANCE ACTIVITIES WITHIN THE EXISTING ROAD CROSS-SECTION OR RAILROAD RIGHT-OF-WAY INCLUDING: SHAPING OR RE-STABILIZING UNPAVED ROADS; SHOULDER GRADING; SLOPE STABILIZATION; CUTTING OF EXISTING CUT SLOPES; INLET AND ENDWALL CLEANING; RESHAPING AND CLEANING DRAINAGE DITCHES AND SWALES; PIPE CLEANING; PIPE REPLACEMENT; SUPPORT ACTIVITIES INCIDENTAL TO RESURFACING ACTIVITIES SUCH AS MINOR VERTICAL ADJUSTMENT TO MEET GRADE OF RESURFACED AREA; AND OTHER SIMILAR ACTIVITIES. THE EXISTING ROAD OR RAILROAD CROSS-SECTION CONSISTS OF THE ORIGINAL GRADED AREA BETWEEN THE EXISTING TOES OF FILL SLOPES AND TOPS OF CUT SLOPES ON EITHER SIDE OF THE ROAD OR RAILROAD AND ANY ASSOCIATED DRAINAGE FEATURES.

RIPARIAN BUFFER—A BMP THAT IS AN AREA OF PERMANENT VEGETATION ALONG SURFACE WATERS.

Riparian forest buffer—A ~~[BMP]~~ **TYPE OF RIPARIAN BUFFER** that is an area of permanent vegetation consisting of predominantly native trees, shrubs and forbs along surface waters that is maintained in a natural state or sustainably managed to protect and enhance water quality, stabilize stream channels and banks, and ~~[buffer]~~ **SEPARATE** land use activities from surface waters.

* * * * *

Sediment--Soils or other **erodible** materials transported by surface water as a product of erosion.

* * * * *

[Skim--To remove the uppermost portion of water within a sediment basin.]

Soil loss tolerance (T)--The maximum amount of soil loss, in tons/acre/year, that a given soil type can tolerate and still permit a high level of crop production to be sustained economically and indefinitely. Values for T for various soil types may be obtained from the *Pennsylvania Soil and Water Conservation Technical Guide*, USDA NRCS, 1991 (as amended and updated).

Stabilization--The proper placing, grading, constructing, reinforcing, lining, and covering of soil, rock or earth to **[insure] ensure** their resistance to erosion, sliding or other movement.

Stormwater--Runoff from precipitation, snowmelt,**[and]** surface runoff and drainage.

Surface waters--Perennial and intermittent streams, rivers, lakes, reservoirs, ponds, wetlands, springs, natural seeps, and estuaries, excluding water at facilities approved for wastewater treatment such as wastewater treatment impoundments, cooling water ponds, and constructed wetlands used as part of a wastewater treatment process.

* * * * *

Top of streambank--First substantial break in slope between the edge of the bed of the stream and the surrounding terrain. The top of streambank can either be a natural or constructed (that is, road or railroad grade) feature, lying generally parallel to the watercourse.

* * * * *

§ 102.2. Scope and purpose.

(a) This chapter requires persons proposing or conducting earth disturbance activities to develop, implement and maintain BMPs to minimize the potential for accelerated erosion and sedimentation **and to manage post construction stormwater**.

* * * * *

§ 102.4. Erosion and sediment control requirements.

(a) For agricultural plowing or tilling activities **or for animal heavy use areas**, the following erosion and sediment control requirements apply:

* * * * *

(2) Written **[Erosion and Sediment Control] E & S Plans** are required for agricultural plowing or tilling activities **or for animal heavy use areas** that disturb 5,000 square feet (464.5 square meters) or more of land.

(3) The landowner, and any lessee, renter, tenant or other land occupier, conducting or planning to conduct agricultural plowing or tilling activities, **or operating an animal heavy use area**, are jointly and individually responsible for developing a written **[Erosion and Sediment Control] E & S Plan** and implementing and maintaining BMPs, including those identified in the **[Erosion and Sediment Control] E & S Plan**.

(4) The **[Erosion and Sediment Control] E & S Plan [shall be] must include cost-effective and reasonable BMPs** designed to minimize the potential for accelerated erosion and sedimentation from agricultural plowing or tilling activities **and animal heavy use areas**.

(i) **For agricultural plowing or tilling activities, the E & S Plan must, at a minimum, limit soil loss from accelerated erosion to the soil loss tolerance (T) over the planned crop rotation.**

(ii) **For agricultural plowing and tilling activities that will occur on fields with less than 25% VEGETATIVE OR RESIDUAL CROP cover and within 100 feet of a river, or perennial or intermittent stream, additional BMPs shall be implemented to minimize accelerated erosion and sedimentation.**

(iii) **For animal heavy use areas, the E & S Plan must identify BMPs to minimize accelerated erosion and sedimentation. BMPs and their design standards are listed in the current amended and updated version of the appropriate National Resources conservation CONSERVATION Service conservation practice standards such as Heavy Use Area Protection, Critical Area Planting, Fencing, Wastewater Treatment Strip, Constructed Wetland, Use Exclusion, Animal Trails and Walkways, Diversions, and Roof Runoff Structure.**

(5) The **[Erosion and Sediment Control] E & S Plan [shall] must** contain plan maps **[, soils maps,] that show the location of features including surface waters [of this Commonwealth,] and drainage patterns, field and property boundaries, buildings and farm structures, animal heavy use areas, roads and crossroads, and BMPs; soils maps; and a description of BMPs including animal heavy use area practices and procedures, tillage systems, schedules, and crop rotations[, and cost effective and technically practical conservation measures]. The plan must be consistent with the current conditions and activities on the agricultural operation.**

(6) **The E & S Plan must contain an implementation schedule. The plan shall be implemented according to the schedule, and the BMPs shall be operated and maintained as long as there are agricultural plowing or tilling activities or animal heavy use areas, on the agricultural operation.**

(7) **The portion of a conservation plan that identifies BMPs to minimize accelerated erosion and sedimentation from agricultural plowing or tilling activities,**

or from operation of animal heavy use areas, may be used to satisfy the E & S Plan requirements of this subsection if it meets the requirements of paragraphs (4)--(6).

(8) The [Erosion and Sediment Control] E & S Plan shall be available for review and inspection at the [project site during each stage of the agricultural plowing or tilling activity] agricultural operation.

(9) Nothing in this section negates the requirements under other provisions of this chapter, such as those applicable to construction activities.

(b) For earth disturbance activities other than agricultural plowing or tilling or animal heavy use areas, the following erosion and sediment control requirements apply:

(1) The implementation and maintenance of [erosion and sediment control] E & S BMPs are required to minimize the potential for accelerated erosion and sedimentation, including for those activities which disturb less than 5,000 square feet (464.5 square meters).

(2) A person proposing earth disturbance activities shall develop and implement a written [Erosion and Sediment Control] E & S Plan under this chapter if one or more of the following criteria apply:

* * * * *

(i) The person proposing the earth disturbance activities is required to develop an [Erosion and Sediment Control] E & S Plan [~~pursuant to~~] UNDER this chapter OR under OTHER Department regulations [~~other than those contained in this chapter~~].

* * * * *

(3) The [Erosion and Sediment Control] E & S Plan shall be prepared by a person trained and experienced in [erosion and sediment] E & S control methods and techniques [, and shall be designed to minimize the potential for accelerated erosion and sedimentation] APPLICABLE TO THE SIZE AND SCOPE OF THE PROJECT BEING DESIGNED.

(4) [Earth disturbance activities shall be planned and conducted to minimize the extent and duration of the disturbance.] Unless otherwise authorized by the Department or conservation district after consultation with the Department, earth disturbance activities shall be planned and implemented to the extent practicable in accordance with the following:

(i) Minimize the extent and duration of the earth disturbance.

(ii) Maximize protection of existing drainage features and vegetation.

(iii) **Minimize soil compaction.**

(iv) **Utilize other measures or controls that prevent or minimize the generation of increased stormwater runoff.**

~~[(v) **Protect, maintain, reclaim and restore the quality of water and the existing and designated uses of waters within this Commonwealth.**]~~

(5) The **[Erosion and Sediment Control] E & S Plan [shall] must contain drawings and narrative which describe** the following:

* * * * *

(iv) The **[amount] volume and rate** of runoff from the project **[area] site** and its upstream watershed area.

(v) The location of **all surface waters [of this Commonwealth]** which may receive runoff within or from the project site and their classification under ~~[to]~~ Chapter 93.

(vi) A **[written depiction] narrative description** of the location and type of perimeter and onsite BMPs used before, during and after the earth disturbance activity.

(vii) A sequence of BMP installation and removal in relation to the scheduling of earth disturbance activities, prior to, during and after earth disturbance activities **that ensure the proper functioning of all BMPs.**

(viii) Supporting calculations **and measurements.**

* * * * *

(x) A maintenance program which provides for **the operation and maintenance of BMPs and the inspection of BMPs on a weekly basis and after each [measurable rainfall] stormwater event, including the repair OR REPLACEMENT of the BMPs to ensure effective and efficient operation. The program must provide for completion of a written report documenting each inspection and all BMP repair, OR REPLACEMENT and maintenance activities.**

* * * * *

(xii) ~~[Identify]~~ **IDENTIFICATION OF THE naturally occurring geologic formations or soil conditions that may have the potential to cause pollution during earth disturbance activities and include BMPs to avoid or minimize potential pollution and its impacts from the formations.**

(xiii) ~~[Evaluate the]~~ IDENTIFICATION OF potential ~~[for]~~ thermal impacts to surface waters from the earth disturbance activity ~~[and include]~~ INCLUDING BMPs to avoid, minimize or mitigate potential pollution from thermal impacts.

(xiv) The E & S Plan shall be planned, designed and implemented to be consistent with the PCSM Plan under § 102.8 (relating to PCSM requirements). Unless otherwise approved by the Department, the E & S Plan must be separate from the PCSM Plan and labeled "E & S" or "Erosion and Sediment Control Plan" and be the final plan for construction.

(xv) ~~[Identify]~~ IDENTIFICATION OF existing and proposed riparian forest buffers.

(6) E&S ANTIDegradation Implementation for Special Protection Waters. In order to satisfy the Antidegradation Implementation Requirements of 25 Pa Code Section 93.4c(b), the person proposing [Where] an earth disturbance activity [may result in a discharge to a water of this Commonwealth] THAT REQUIRES A PERMIT UNDER THIS CHAPTER AND FOR WHICH ANY RECEIVING SURFACE WATER IS classified as High Quality or Exceptional Value ~~[under]~~ UNDER Chapter 93, the person proposing the activity shall IN THEIR PERMIT APPLICATION: [as applicable, use] [the following Special Protection]

(i) EVALUATE AND INCLUDE nondischarge alternatives IN THE E&S PLAN, UNLESS A PERSON DEMONSTRATES THAT NONDISCHARGE ALTERNATIVES DO NOT EXIST FOR THE PROJECT.

(ii) IF THE PERSON MAKES THE DEMONSTRATION IN (i) THAT NONDISCHARGE ALTERNATIVES DO NOT EXIST FOR THE PROJECT, THE E&S PLAN SHALL INCLUDE [and] ABACT, [BMPs to maintain and protect the water from degradation]:] EXCEPT AS PROVIDED IN § 93.4C(B)(1)(iii) (RELATING TO SEJ).

(iii) FOR PURPOSES OF THIS CHAPTER, NONDISCHARGE [Nondischarge] alternatives and ABACT [BMPs] and their design standards are listed in the Erosion and Sediment Pollution Control Program Manual, Commonwealth of Pennsylvania, Department of Environmental Protection, No. 363-2134-008 (April 2000), as amended and updated.

[(i) Special sediment basin requirements.

(A) Principal spillways shall be designed to skim water from the top 6 inches (15 centimeters) of the dewatering zone, or shall have permanent pools greater than or equal to 18 inches (46 centimeters) deep.

(B) The basin shall be designed with a flow length to basin width ratio of 4:1 or greater.

(C) The basin shall be designed so that it dewateres in at least 4 days and no more than 7 days when at full capacity.

(ii) Channels, collectors and diversions shall be lined with permanent vegetation, rock, geotextile or other nonerosive materials.

(iii) BMPs that divert or carry surface water shall be designed to have a minimum capacity to convey the peak discharge from a 5-year frequency storm.

(iv) Upon completion or temporary cessation of the earth disturbance activity, or any stage thereof, the project site shall be immediately stabilized.

(v)] The Department [or county conservation district] may approve alternative BMPs which will maintain and protect existing water quality and existing and designated uses.

(7) The [Erosion and Sediment Control] E & S Plan, inspection reports and monitoring records shall be available for review and inspection by the Department or the [county] conservation district at the project site during all stages of the earth disturbance activity.

(8) Upon complaint or site inspection, the Department or [county] conservation district may require that the E & S Plan be submitted for review and approval to ensure compliance with this chapter.

(c) The Department may require, or [county] the conservation district [may require] after consultation with the Department may require, other information necessary to adequately review a plan, or may require additional BMPs, on a case-by-case basis, when necessary to ensure the maintenance and protection of water quality and existing and designated uses.

(d) A person proposing or conducting an earth disturbance activity shall obtain the other necessary permits and authorizations from the Department or conservation district, related to the earth disturbance activity, before commencing with the earth disturbance activity.

(e) Persons proposing an earth disturbance activity that requires permit coverage under § 102.5 (relating to requirements) shall have permit coverage prior to commencing the earth disturbance activity.

§ 102.5. Permit requirements.

(a) ~~[An NPDES permit stormwater discharges associated with construction activities.~~

~~(1)~~ Other than agricultural plowing or tilling activities, animal heavy use areas, timber harvesting activities or road maintenance activities, a person proposing an earth disturbance activity that involves equal to or greater than 1 acre ~~[and less than 5 acres]~~ (0.4 ~~[to 2]~~ hectares) of earth disturbance ~~[with a point source discharge to surface waters]~~, or an earth disturbance on any portion, part, or during any stage of, a larger common plan of development sale that involves equal to or greater than 1 acre ~~[and less than 5 acres]~~ (0.4 ~~[to 2]~~ hectares) of earth disturbance ~~[with a point source discharge to surface waters over the life of the project]~~, shall obtain an individual NPDES Permit or coverage under a general NPDES permit ~~[or NPDES permit by rule]~~ for Stormwater Discharges Associated with Construction Activities prior to commencing the earth disturbance activity.

~~(2)~~ ~~[Other than agricultural plowing or tilling activities, animal heavy use areas, timber harvesting activities or road maintenance activities, a person proposing an earth disturbance activity that involves 5 acres (2 hectares) or more of earth disturbance, or an earth disturbance on any portion, part, or during any stage of, a larger common plan of development or sale that involves 5 acres (2 hectares) or more of earth disturbance over the life of the project, shall obtain [a general or] an individual NPDES Permit for Stormwater Discharges Associated With Construction Activities or coverage under a general NPDES permit [or NPDES permit by rule] for Stormwater Discharges Associated with Construction Activities prior to commencing the earth disturbance activity.]~~

~~—(3)—~~ ~~[In addition to other applicable requirements, persons required to obtain an Individual NPDES Permit for Stormwater Discharges Associated with Construction Activities for projects proposed in special protection watersheds shall evaluate and use BMPs in accordance with [the] antidegradation requirements of [Chapter 93 (relating to water quality standards)] 102.4(b)(6) AND 102.8(h) regardless of whether the discharge is new, additional or increased.]~~

(b) A person proposing a timber harvesting or road maintenance activity involving 25 acres (10 hectares) or more of earth disturbance shall obtain an **[Erosion and Sediment Control Permit] E & S Permit** under this chapter prior to commencing the earth disturbance activity.

(c) A person proposing oil and gas activities that involve 5 acres (2 hectares) or more of earth disturbance over the life of the project shall obtain an E & S Permit under this chapter prior to commencing the earth disturbance activity.

(d) Other than agricultural plowing or tilling activities, animal heavy use areas, timber harvesting or road maintenance activities, a person proposing earth disturbance activities that involve 5 acres (2 hectares) or more of earth disturbance over the life of the project that do not require a permit under subsections (a), (b), **AND** (c), ~~[(g)]~~ and ~~[(i)]~~ shall obtain an E & S Permit under this chapter prior to commencing the earth disturbance activity.

(e) For earth disturbance activities authorized by a permit under this chapter, a preconstruction meeting ~~[is]~~ **MAY BE** required unless the permittee has been notified otherwise in writing by the Department or conservation district. The permittee shall ~~[contact]~~ **INVITE** the Department or conservation district **TO ATTEND THE PRECONSTRUCTION MEETING AND MUST PROVIDE** at least **SEVEN (7) days NOTICE OF THE PRECONSTRUCTION MEETING TO ALL INVITED ATTENDEES** ~~[but not more than 30 days prior to the commencement of construction]~~. Permittees, co-permittees, operators, and licensed professionals or designees responsible for **THE EARTH DISTURBANCE ACTIVITY INCLUDING IMPLEMENTATION OF E&S AND PCSM PLANS AND** critical stages of **IMPLEMENTATION OF THE APPROVED PCSM PLAN** ~~[construction]~~ must attend a preconstruction meeting ~~[along with the Department or conservation district]~~.

(f) A person proposing earth disturbance activities requiring a permit or permit coverage under this chapter shall be responsible to ensure implementation ~~[and long-term operation and maintenance]~~ of the PCSM Plan.

(g) A person proposing or conducting an earth disturbance activity approved under a Department permit issued under a chapter other than Chapter 92 (relating to National Pollutant Discharge Elimination System permitting, monitoring and compliance) or this chapter, which includes requirements to comply with Chapter 92 and this chapter, need not obtain an additional **[Erosion and Sediment Control] E & S Permit** or NPDES Permit for Stormwater Discharges Associated With Construction Activities.

(h) Operators who are not the permittee shall be co-permittees.

(i) A person proposing or conducting an earth disturbance activity associated with discharging dredged or fill material to waters of the United States which is required to obtain a permit or coverage under a permit under section 404 of the Clean Water Act (33 U.S.C.A. § 1344) need not obtain an additional **E & S Permit** or NPDES Permit for Stormwater Discharges Associated with Construction Activities for the area of disturbance covered by the Clean Water Act section 404 permit.

~~[(d)]~~(j) A person proposing or conducting agricultural plowing or tilling activities or **animal heavy use areas** is not required to obtain an **[Erosion and Sediment Control] E & S Permit**, or an NPDES Permit for Stormwater Discharges Associated With Construction Activities, for these activities under this chapter.

~~[(e)]~~(k) A person proposing or conducting an earth disturbance activity who is not required to obtain a Permit under this chapter shall comply with the other provisions of this chapter.

(l) PREPARE AND IMPLEMENT A PPC PLAN WHEN STORING, USING OR TRANSPORTING MATERIALS INCLUDING: FUELS, CHEMICALS,

SOLVENTS, PESTICIDES, FERTILIZERS, LIME, PETROCHEMICALS, WASTEWATER, WASH WATER, CORE DRILLING WASTEWATER, CEMENT, SANITARY WASTES, SOLID WASTES, OR HAZARDOUS MATERIALS ONTO, ON, OR FROM THE PROJECT SITE DURING EARTH DISTURBANCE ACTIVITIES. THE PPC PLAN SHALL BE AVAILABLE UPON REQUEST BY THE DEPARTMENT OR CONSERVATION DISTRICT.

(m) THE DEPARTMENT MAY ISSUE GENERAL PERMITS FOR ACTIVITIES NOT SUBJECT TO NPDES REQUIREMENTS.

(1) AUTHORIZATION. THE DEPARTMENT MAY ISSUE A GENERAL PERMIT ON A REGIONAL OR STATEWIDE BASIS OR LIMITED TO SPECIFIC WATERSHEDS, PARTICULAR CATEGORIES OF STREAMS OR DESIGNATED GEOGRAPHIC REGIONS, FOR A CATEGORY OF ACTIVITIES NOT SUBJECT TO THE NPDES REQUIREMENTS, BUT REGULATED UNDER THIS CHAPTER, IF THE DEPARTMENT DETERMINES THE FOLLOWING:

(i) THE PROJECTS IN THE CATEGORY ARE SIMILAR IN NATURE.

(ii) THE PROJECTS IN THE CATEGORY CAN BE ADEQUATELY REGULATED UTILIZING STANDARDIZED SPECIFICATIONS AND CONDITIONS, INCLUDING REFERENCE TO SPECIFIC CRITERIA AND REQUIREMENTS ADOPTED BY ANOTHER FEDERAL OR STATE AGENCY WHICH ADEQUATELY REGULATE THE PARTICULAR CATEGORY OF ACTIVITIES.

(iii) THE PROJECTS WHICH ARE IN THE CATEGORY AND MEET THE SPECIFICATIONS AND CONDITIONS WILL COMPLY WITH THE REQUIREMENTS OF THIS CHAPTER.

(iv) IN THE OPINION OF THE DEPARTMENT, ARE MORE APPROPRIATELY CONTROLLED UNDER A GENERAL PERMIT THAN UNDER INDIVIDUAL PERMITS.

(v) INDIVIDUALLY AND CUMULATIVELY DO NOT HAVE THE POTENTIAL TO CAUSE SIGNIFICANT ADVERSE ENVIRONMENTAL IMPACT.

(2) CONTENTS OF GENERAL PERMITS. EACH GENERAL PERMIT ISSUED BY THE DEPARTMENT WILL INCLUDE THE FOLLOWING CONTENTS:

(i) A CONCISE DESCRIPTION OF THE CATEGORY OF ACTIVITY COVERED BY THE GENERAL PERMIT, INCLUDING EXCEPTIONS TO THAT CATEGORY.

(ii) A SPECIFICATION OF THE WATERSHEDS, STREAMS OR GEOGRAPHIC AREAS WHERE THE GENERAL PERMIT IS EFFECTIVE.

(iii) A SET OF STANDARDIZED SPECIFICATIONS FOR THE PARTICULAR CATEGORY OF ACTIVITY OR A REFERENCE TO SPECIFIC CRITERIA AND REQUIREMENTS ADOPTED BY ANOTHER FEDERAL OR STATE AGENCY WHICH ADEQUATELY REGULATES THE PARTICULAR CATEGORY OF ACTIVITY.

(iv) A SET OF CONDITIONS GOVERNING THE ACTIVITIES, OPERATION, MAINTENANCE, INSPECTION AND MONITORING OF THE PROJECTS COVERED BY THE GENERAL PERMIT AS ARE NECESSARY TO ASSURE COMPLIANCE WITH THIS CHAPTER AND WITH OTHER LAWS ADMINISTERED BY THE DEPARTMENT.

(v) A SPECIFICATION OF THE PROCESS FOR OBTAINING COVERAGE UNDER AND AUTHORIZATION TO USE THE GENERAL PERMIT.

(3) PROCEDURE FOR ISSUANCE.

(i) AT LEAST 30 DAYS PRIOR TO ISSUANCE OF A GENERAL PERMIT, THE DEPARTMENT WILL:

(A) PUBLISH NOTICE IN THE PENNSYLVANIA BULLETIN OF INTENT TO ISSUE A GENERAL PERMIT, INCLUDING THE TEXT OF THE PROPOSED GENERAL PERMIT.

(B) AN OPPORTUNITY SHALL BE PROVIDED FOR INTERESTED MEMBERS OF THE PUBLIC, FEDERAL AND STATE AGENCIES TO PROVIDE WRITTEN COMMENTS ON A PROPOSED GENERAL PERMIT.

(C) THE DEPARTMENT MAY, AT ITS DISCRETION, HOLD A PUBLIC HEARING ON A PROPOSED GENERAL PERMIT FOR THE PURPOSES OF GATHERING INFORMATION AND COMMENTS.

(ii) UPON ISSUANCE OF A GENERAL PERMIT, THE DEPARTMENT WILL PLACE A NOTICE IN THE PENNSYLVANIA BULLETIN OF THE AVAILABILITY OF THE GENERAL PERMIT.

(4) COMPLIANCE WITH PERMIT CONDITIONS, REGULATIONS AND LAWS. A PERSON WHO CONDUCTS AN ACTIVITY PURSUANT TO A GENERAL PERMIT ISSUED UNDER THIS SUBSECTION SHALL COMPLY WITH THE TERMS AND CONDITIONS OF THE GENERAL PERMIT, WITH THIS CHAPTER AND OTHER APPLICABLE LAWS.

(5) ADMINISTRATION OF GENERAL PERMITS. GENERAL PERMITS MAY BE ISSUED, AMENDED, SUSPENDED, REVOKED, REISSUED OR TERMINATED UNDER THIS CHAPTER. ISSUANCE OF A GENERAL PERMIT DOES NOT EXEMPT A PERSON FROM COMPLIANCE WITH THIS TITLE.

(6) DENIAL OF COVERAGE. THE DEPARTMENT MAY DENY, REVOKE, SUSPEND OR TERMINATE COVERAGE UNDER A GENERAL PERMIT FOR FAILURE TO COMPLY WITH THE CLEAN STREAMS LAW, THIS CHAPTER OR THE CONDITIONS OF THE GENERAL PERMIT AND THE DEPARTMENT MAY REQUIRE THE PERSON TO APPLY FOR AN INDIVIDUAL PERMIT.

§ 102.6. Permit applications and fees.

(a) *Permit requirements.* A person proposing or conducting an earth disturbance activity which requires **[an Erosion and Sediment Control Permit or an NPDES Permit for Stormwater Discharges Associated with Construction Activities]** a permit under § 102.5 (relating to permit requirements), shall:

(1) Submit to the Department or a **[county]** conservation district a complete application **OR NOI [or notice of intent] [or ROC]**, an **[Erosion and Sediment Control] E & S Plan** meeting the requirements of § 102.4 (relating to erosion and sediment control requirements), **a PCSM Plan meeting the requirements of § 102.8 (relating to PCSM requirements)**, and other information the Department may require.

(2) Provide proof of consultation with the Pennsylvania Natural **[Diversity Inventory (PNDI)] Heritage Program (PNHP)** regarding the presence of a State or Federal threatened or endangered species on the project site. If the Department or **[county]** conservation district determines, based upon **[PNDI] PNHP** data or other sources, that the proposed earth disturbance activity may adversely impact the species or critical habitat, the person proposing the earth disturbance activity shall consult with the Department or **[county]** conservation district to avoid or prevent the impact. If the impact cannot be avoided or prevented, the person proposing the activity shall demonstrate how the impacts will be minimized in accordance with State and Federal laws pertaining to the protection of threatened or endangered flora and fauna and its habitat.

[(3) Prepare and implement a PPC Plan when storing, using or transporting materials including: fuels, chemicals, solvents, pesticides, fertilizers, lime, petrochemicals, wastewater, wash water, core drilling wastewater, cement, sanitary wastes, solid wastes, or hazardous materials onto, on, or from the project site during earth disturbance activities. The PPC Plan shall be available upon request by the Department or conservation district.]

(b) *Permit fees.*

(1) [Erosion and Sediment Control Permit applications for timber harvesting and road maintenance activities shall be accompanied by an application fee of \$500.

(2) Applications and Notices of Intent for an NPDES Permit for Stormwater Discharges Associated with Construction Activities shall be submitted and accompanied by the fee established pursuant to Chapter 92 (relating to National Pollutant Discharge Elimination System permitting, monitoring and compliance).]

A person submitting a permit application[⁷] OR NOI [or ROC] shall submit a fee as follows: A \$500.00 ADMINISTRATIVE FILING FEE FOR GENERAL PERMITS AND A \$1, 500 ADMINISTRATIVE FILING FEE FOR INDIVIDUAL PERMITS. IN ADDITION, A FEE OF \$100 FOR EACH DISTURBED ACRE IS REQUIRED TO BE ADDED TO THE BASE FEE FOR PROJECTS OF ONE ACRE OR GREATER OF DISTURBANCE. THE FEES WILL BE CALCULATED BASED UPON THE FOLLOWING FORMULA: BASE FEE PLUS \$100 FOR EACH DISTURBED ACRE. FOR FRACTIONAL ACREAGE, THE ACREAGE SHALL BE ROUNDED TO THE CLOSEST WHOLE NUMBER.

~~[(i) NPDES permit by rule - \$2,500.~~

~~-(ii) General NPDES Permit - \$2,500.~~

~~-(iii) Individual NPDES Permit - \$5,000.~~

~~-(iv) General E & S Permit - \$2,500.~~

~~-(v) Individual E & S Permit - \$5,000.]~~

(2) The Department will review the adequacy of the fees established in this section at least once every 3 years and provide a written report to the EQB. The report will identify any disparity between the amount of program income generated by the fees and the costs to administer these programs, and contain recommendations to adjust fees to eliminate the disparity, including recommendations for regulatory amendments.

(3) Conservation districts may charge additional fees in accordance with section 9 (13) of the Conservation District Law (3 P. S. § 857(13)).

(4) ANY FEDERAL OR STATE AGENCY OR INDEPENDENT STATE COMMISSION THAT PROVIDES FUNDING TO THE DEPARTMENT THROUGH TERMS AND CONDITIONS OF A MUTUAL AGREEMENT MAY BE EXEMPT FROM THE FEES IN THIS SECTION.

(5) FEES COLLECTED BY THE DEPARTMENT OR CONSERVATION DISTRICT UNDER THIS CHAPTER WILL BE DEPOSITED INTO A RESTRICTED REVENUE ACCOUNT KNOWN AS THE CLEAN WATER FUND

AND UTILIZED TO OFFSET THE OPERATING COSTS TO ADMINISTER THE PROGRAM.

(c) *Complete applications or NOI.*

(1) An application or NOI for a permit is not complete until the necessary information and requirements under The Clean Streams Law (35 P. S. § 691.1--691.1001) and this chapter have been satisfied by the applicant.

(2) When the Department OR CONSERVATION DISTRICT determines that an application or NOI is incomplete or contains insufficient information to determine compliance with this chapter, it will notify the applicant in writing. The applicant shall have 60 days to PROVIDE THE INFORMATION NECESSARY TO complete the application or NOI, or the Department OR CONSERVATION DISTRICT will consider the application to be withdrawn by the applicant. Requests for a specific extension may be sought by the applicant in writing. The applicant will be notified in writing when an application or NOI is considered withdrawn. When an application or NOI is considered withdrawn, the Department OR CONSERVATION DISTRICT will close the application file and take no ~~[further]~~ action to review the file.

(3) IF THE APPLICATION HAS BEEN WITHDRAWN IN ACCORDANCE WITH (C)(2) [the incomplete or deficient application is returned or withdrawn,] the fees associated with filing the application will not be refunded.

§ 102.7. Permit termination.

(a) Upon permanent stabilization of the earth disturbance activity under § 102.22[(c)](a)(2) (relating to permanent stabilization), AND INSTALLATION OF BMPS IN ACCORDANCE WITH AN APPROVED PLAN PREPARED AND IMPLEMENTED IN ACCORDANCE WITH §§ 102.4 AND 102.8 (RELATING TO E&S AND PCSM REQUIREMENTS), the ~~[person who obtains permit coverage under this chapter]~~ PERMITTEE OR CO-PERMITTEE shall submit [a notice of termination] AN NOT to the Department or ~~[county]~~ conservation district.

(b) The ~~[notice of termination]~~ NOT ~~[shall]~~ must include:

* * * * *

(5) An identification of the persons who HAVE AGREED TO AND WHO will be responsible for LONG TERM operation and maintenance of the PCSM BMPs in accordance with SECTION 102.8 (m) [the approved PCSM Plan], AND PROOF OF COMPLIANCE WITH 102.8(m)(2).

(c) Until the permittee OR CO-PERMITTEE has received written ~~[acknowledgement]~~ APPROVAL OF an NOT, the permittee OR CO-PERMITTEE

will remain responsible for compliance with the permit terms and conditions including LONG TERM operation and maintenance of all PCSM BMPs on the project site and is responsible for violations occurring on the project site. THE DEPARTMENT OR CONSERVATION DISTRICT WILL CONDUCT A FINAL INSPECTION AND APPROVE OR DENY THE NOT WITHIN 30 DAYS.

§ 102.8. PCSM requirements.

(a) PCSM APPLICABILITY. A person proposing an earth disturbance activity that requires [NPDES] permit coverage under this chapter or other Department permit that requires compliance with this chapter shall be responsible to ensure that a written PCSM Plan is developed, implemented, operated and maintained.

(b) GENERAL PCSM PLANNING AND DESIGN. The management of post construction stormwater shall be planned and conducted to the extent practicable in accordance with the following:

(1) Preserve the integrity of stream channels and MAINTAIN AND protect the physical, biological and chemical qualities of the receiving stream.

(2) Prevent an increase in the rate of stormwater runoff.

(3) Minimize any increase in stormwater runoff volume.

(4) Minimize impervious areas.

(5) Maximize the protection of existing drainage features and existing vegetation.

(6) Minimize land clearing and grading.

(7) Minimize soil compaction.

(8) Utilize other [~~measures or controls~~] STRUCTURAL OR NON-STRUCTURAL BMPS that prevent or minimize [~~the generation of increased~~] CHANGES IN stormwater runoff [~~and pollutants~~].

~~[(9) Protect, maintain, reclaim and restore the quality of water and the existing and designated uses of waters within this Commonwealth.]~~

(c) CONSISTENCY WITH E&S PLAN. The PCSM Plan shall be planned, designed and implemented to be consistent with the E & S Plan under § 102.4(b) (relating to erosion and sediment [and] control requirements).

(d) SEPARATE PLAN. Unless otherwise approved by the Department, the PCSM Plan must be separate from the E & S Plan and labeled "PCSM" or "Post Construction Stormwater Management Plan" and be the final plan for construction.

(e) **PCSM PLAN PREPARER REQUIREMENTS.** The PCSM Plan shall be prepared by a person trained and experienced in PCSM design methods and techniques **APPLICABLE TO THE SIZE AND SCOPE OF THE PROJECT BEING DESIGNED.**

(f) **PCSM PLAN CONTENTS.** The PCSM Plan must contain drawings and A narrative **CONSISTENT WITH THE** requirements ~~[as described within]~~ **OF** this chapter~~[and other supporting documentation]~~. The PCSM Plan shall be designed to minimize the threat to human health, safety and the environment to the greatest extent practicable. PCSM Plans must contain at a minimum the following:

- (1) The existing topographic features of the project site and the immediate surrounding area.
- (2) The types, depth, slope, locations and limitations of the soils and geologic formations.
- (3) The characteristics of the project site, including the past, present and proposed land uses and the proposed alteration to the project site.
- (4) Identification of the net change in volume and rate of stormwater from preconstruction hydrology to post construction hydrology for the entire project site and each drainage area.
- (5) Identification of the location of surface waters, which may receive runoff within or from the project site and their classification under Chapter 93 (relating to water quality standards).
- (6) A written description of the location and type of PCSM BMPs including construction details for permanent stormwater BMPs including permanent stabilization specifications and locations.
- (7) A sequence of PCSM BMP implementation or installation in relation to earth disturbance activities of the project site and a schedule of inspections for critical stages of PCSM BMP installation.
- (8) Supporting calculations.
- (9) Plan drawings.
- (10) A long-term operation and maintenance schedule, which provides for inspection of PCSM BMPs, including the repair, replacement, or other routine maintenance of the PCSM BMPs to ensure ~~[effective and efficient]~~ **PROPER FUNCTION AND** operation. The program must provide for completion of a written report documenting each inspection and all BMP repair and maintenance activities and how access to the PCSM BMPs will be provided.

(11) ~~[Identification of the persons responsible for long-term operation and maintenance of the PCSM BMPs.]~~

~~(12)~~ Procedures, which ensure that the proper measures for the recycling or disposal of materials associated with or from the PCSM BMPs are in accordance with Department laws, regulations and requirements.

~~(13)~~12 Identification of naturally occurring geologic formations or soil conditions that may have the potential to cause pollution after earth disturbance activities are completed and PCSM BMPs are operational, and development of a management plan to avoid or minimize potential pollution and its impacts.

~~(14)~~13 ~~[An evaluation]~~ IDENTIFICATION of potential thermal impacts from post construction stormwater to surface waters [and inclusion] INCLUDING BMPs to avoid, minimize or mitigate potential pollution from thermal impacts.

~~(15)~~14 A riparian forest buffer management plan when required under § 102.14 (relating to riparian ~~[forest]~~ buffer requirements).

~~(16)~~15 Additional information requested by the Department.

(g) PCSM PLAN STORMWATER ANALYSIS. EXCEPT FOR REGULATED ACTIVITIES THAT REQUIRE SITE RESTORATION OR RECLAMATION IDENTIFIED IN SUBPARAGRAPH (n), PCSM Plans for proposed activities requiring a permit under this chapter require the following additional information:

(1) ~~[Analytical testing and assessment]~~ PREDEVELOPMENT SITE CHARACTERIZATION AND ASSESSMENT of soil~~[s]~~ AND geology~~[, and other predevelopment site characteristics]~~ including APPROPRIATE infiltration and geotechnical studies that identify location and depths of test sites and methods used.

(2) Analysis demonstrating that the PCSM BMPs will meet the volume reduction and water quality requirements specified in an applicable Department approved and current Act 167 stormwater management watershed plan; or manage the net change for storms up to and including the 2-year/24-hour storm event when compared to preconstruction runoff volume and water quality. The analysis for the 2-year/24-hour storm event shall be conducted using the following minimum criteria:

(i) Existing predevelopment nonforested pervious areas must be considered meadow in good condition or its equivalent EXCEPT FOR REPAIR, RECONSTRUCTION, OR RESTORATION OF ROADWAYS, OR RAIL LINES, OR CONSTRUCTION, REPAIR, RECONSTRUCTION, OR RESTORATION OF UTILITY INFRASTRUCTURE, WHEN THE SITE WILL BE RETURNED TO EXISTING CONDITION.

(ii) When the existing project site contains impervious area, 20% of the existing impervious area to be disturbed must be considered meadow in good condition or better, except for repair, reconstruction or restoration of roadways, or RAIL LINES, OR CONSTRUCTION, REPAIR, RECONSTRUCTION, OR RESTORATION OF utility infrastructure, when the site will be returned to existing condition.

(iii) WHEN THE EXISTING SITE CONTAINS IMPERVIOUS AREA AND THE EXISTING SITE CONDITIONS HAVE PUBLIC HEALTH, SAFETY OR ENVIRONMENTAL LIMITATIONS, THE APPLICANT MAY DEMONSTRATE TO THE DEPARTMENT THAT IT IS NOT PRACTICABLE TO SATISFY THE REQUIREMENT IN (ii), BUT THE STORMWATER VOLUME REDUCTION AND WATER QUALITY TREATMENT WILL BE MAXIMIZED TO THE EXTENT PRACTICABLE IN ORDER TO MAINTAIN AND PROTECT EXISTING WATER QUALITY AND EXISTING AND DESIGNATED USES.

(iv) ANALYSIS OTHER THAN THAT REQUIRED BY (g)(2) MAY BE PROPOSED BY THE APPLICANT WHEN THE APPLICANT DEMONSTRATES TO THE DEPARTMENT THAT THE ALTERNATIVE WILL MAINTAIN AND PROTECT EXISTING WATER QUALITY AND EXISTING AND DESIGNATED USES.

(3) Analysis demonstrating that the PCSM BMPs will meet the rate requirements specified in an applicable Department approved and current Act 167 stormwater management watershed plan; or manage the net change in peak rate for the 2-, [~~5-~~] 10-, [~~25-~~] 50-, and 100-year/24-hour storm events in a manner not to exceed preconstruction rates.

(i) Hydrologic routing analysis is required to demonstrate this requirement is met.

(ii) Exempt from this requirement are Department approved direct discharges to tidal areas or Department-approved no detention areas.

(4) Identify the methodologies for calculating the total runoff volume and peak rate of runoff and provide supporting documentation and calculations.

(5) Construction techniques or special considerations to address soil and geologic limitations.

(6) The Department may require, or after consultation with the Department a conservation district may require, additional information necessary to adequately review a PCSM Plan or may require additional BMPs, on a case-by-case basis, when necessary to ensure the maintenance and protection of water quality and existing and designated uses.

(h) PCSM IMPLEMENTATION FOR SPECIAL PROTECTION WATERS. IN ORDER TO SATISFY THE ANTIDegradation IMPLEMENTATION REQUIREMENTS OF 25 PA CODE SECTION 93.4c(b), THE PERSON PROPOSING AN EARTH DISTURBANCE ACTIVITY THAT REQUIRES A PERMIT UNDER THIS CHAPTER AND FOR WHICH ANY RECEIVING WATER IS [When a PCSM Plan is being developed for an activity that may result in a discharge to a water of this Commonwealth] classified as High Quality or Exceptional Value under Chapter 93, the person proposing the activity shall IN THEIR PERMIT APPLICATION: [use]

(i) EVALUATE AND INCLUDE nondischarge ALTERNATIVES IN THE PCSM PLAN, UNLESS A PERSON DEMONSTRATES THAT NONDISCHARGE ALTERNATIVES DO NOT EXIST FOR THE PROJECT.

(ii) IF THE PERSON MAKES THE DEMONSTRATION IN (i) THAT NONDISCHARGE ALTERNATIVES DO NOT EXIST FOR THE PROJECT, THE PCSM PLAN SHALL INCLUDE [and] ABACT, [BMPs to maintain and protect the water from degradation,] EXCEPT AS PROVIDED IN § 93.4c(b)(1)(iii) (RELATING TO SEJ).

(iii) FOR PURPOSES OF THIS CHAPTER, [Specifically, the person proposing the activity shall use PCSM BMPs that collectively achieve no net change when compared to preconstruction discharges, in stormwater runoff volume, rate and water quality during storm events up to and including the 2-year/24-hour storm event. Nondischarge] NONDISCHARGE alternatives and ABACT [BMPs] and their design standards are listed in the Pennsylvania Stormwater Best Management Practices Manual Commonwealth of Pennsylvania, Department of Environmental Protection, No. 363-0300-002 (December 2006), as amended and updated.

(i) COMPLAINT OR SITE INSPECTION. Upon complaint or site inspection, the Department or conservation district may require that the PCSM Plan be submitted for review and approval to ensure compliance with this chapter.

(j) PCSM REPORTING AND RECORDKEEPING. The PCSM Plan, inspection reports and monitoring records shall be available for review and inspection by the Department or the conservation district.

(k) LICENSED PROFESSIONAL OVERSIGHT OF CRITICAL STAGES. A licensed professional or a designee shall be present onsite and **SHALL** be responsible during critical stages of implementation of the approved PCSM Plan. **THE CRITICAL STAGES MAY INCLUDE [including] underground treatment or storage BMPs, structurally engineered BMPs, or other BMPs as deemed appropriate by the Department.**

(l) **FINAL CERTIFICATION.** The permittee shall include with the notice of termination "Record Drawings" with a final certification statement from a licensed professional, which reads as follows:

"I (name) do hereby certify pursuant to the penalties of 18 Pa.C.S.A. § 4904 to the best of my knowledge, information and belief, that the accompanying record drawings accurately reflect the ~~[redline drawings]~~ **AS-BUILT CONDITIONS**, are true and correct, and are in conformance with Chapter 102 of the rules and regulations of the Department of ~~[Environment]~~ **ENVIRONMENTAL** Protection and that the project site was constructed in accordance with the approved PCSM Plan, **ALL APPROVED PLAN CHANGES** and accepted construction practices."

(1) The permittee shall retain a copy of the record drawings as a part of the approved PCSM Plan.

(2) The permittee shall provide a copy of the record drawings as a part of the approved PCSM Plan to the person identified in this section as being responsible for the **LONG TERM** operation and maintenance of the PCSM BMPs.

(m) **PCSM LONG TERM OPERATION AND MAINTENANCE REQUIREMENTS.**

(1) THE PERMITTEE OR CO-PERMITTEE SHALL BE RESPONSIBLE FOR LONG TERM OPERATION AND MAINTANENCE OF PCSM BMPS UNLESS [Unless] a different person is IDENTIFIED IN THE NOT AND HAS AGREED TO LONG TERM OPERATION AND MAINTENANCE OF PCSM BMPS[approved in writing by the Department, operation and maintenance of PCSM BMPs shall be the responsibility of the landowner of the property where the PCSM BMP is located].

(2) [The deed for] FOR any property containing a PCSM BMP, [shall] THE PERMITTEE OR CO-PERMITTEE SHALL RECORD AN INSTRUMENT WITH THE RECORDER OF DEEDS WHICH WILL ASSURE DISCLOSURE OF THE PCSM BMP AND THE RELATED OBLIGATIONS IN THE ORDINANRY COURSE OF A TITLE SEARCH OF THE SUBJECT PROPERTY. THE RECORDED INSTRUMENT MUST identify the PCSM BMP and provide notice that the responsibility for LONG TERM operation and maintenance of the PCSM BMP is a covenant that runs with the land [and] that is BINDING UPON AND enforceable by subsequent grantees, AND PROVIDE PROOF OF FILING WITH THE NOT UNDER 102.7(b)(5).

(3) FOR COMMONWEALTH OWNED-PROPERTY, A COVENANT THAT RUNS WITH THE LAND IS NOT REQUIRED UNTIL THE TRANSFER OF THE LAND CONTAINING A PCSM BMP. UPON TRANSFER OF THE COMMONWEALTH OWNED-PROPERTY CONTAINING A PCSM BMP, THE

DEED SHALL COMPLY WITH THE REQUIREMENTS CONTAINED IN THIS SUBSECTION.

(4) THE PERSON RESPONSIBLE FOR PERFORMING LONG TERM OPERATION AND MAINTENANCE MAY ENTER INTO AN AGREEMENT WITH ANOTHER PERSON INCLUDING A CONSERVATION DISTRICT, NONPROFIT ORGANIZATION, MUNICIPALITY, AUTHORITY, PRIVATE CORPORATION OR OTHER PERSON, TO TRANSFER THE RESPONSIBILITY FOR PCSM BMPs OR TO PERFORM LONG TERM OPERATION AND MAINTENANCE AND PROVIDE NOTICE THEREOF TO THE DEPARTMENT.

(5) A grantor that fails to TRANSFER LONG TERM OPERATION AND MAINTENANCE OF THE PCSM BMP OR OTHERWISE FAILS TO comply with this requirement shall remain jointly **AND SEVERABLY** responsible with the landowner for **LONG TERM** operation and maintenance of the PCSM BMPs located on the property.

(n) REGULATED ACTIVITIES THAT REQUIRE SITE RESTORATION OR RECLAMATION. The portion of a site reclamation or restoration plan that identifies PCSM BMPs to manage stormwater from oil and gas activities or mining activities permitted in accordance with Chapters 77 and 86--90¹; **OR TIMBER HARVESTING ACTIVITIES, PIPELINES, OTHER SIMILAR UTILITY INFRASTRUCTURE, or [a plan for]** abandoned mine land reclamation activities, **WHICH ARE PERMITTED IN ACCORDANCE WITH THIS CHAPTER,** may be used to satisfy the PCSM Plan requirements of this section if the reclamation **OR RESTORATION** plan meets the requirements of subsections (b), (c), (e), (f), (h), (i), **(l)** and (m).

**EROSION AND SEDIMENT CONTROL AND POST CONSTRUCTION
STORMWATER MANAGEMENT BMPs**

§ 102.11. General requirements.

(a) **BMP AND DESIGN STANDARDS.** A person conducting or proposing to conduct an earth disturbance activity shall **[design]:**

(1) **Design**, implement and maintain **E & S** BMPs to minimize the potential for accelerated erosion and sedimentation **[in order]** to protect, maintain, reclaim and restore water quality and existing and designated uses. Various **E & S** BMPs and their design standards are listed in the *Erosion and Sediment Pollution Control Program Manual* (Manual), Commonwealth of Pennsylvania, Department of Environmental Protection, No. 363-2134-008 **[(January 1996)] (April 2000)**, as amended and updated.

(2) **If required to develop a PCSM Plan, design, implement and maintain PCSM BMPs to mimic preconstruction stormwater runoff conditions to protect, maintain,**

reclaim and restore water quality and existing and designated uses. Various PCSM BMPs and their design standards are listed in the *Pennsylvania Stormwater Best Management Practices Manual* (Stormwater BMP Manual), Commonwealth of Pennsylvania, Department of Environmental Protection, No. 363-0300-002 (December 2006), as amended and updated.

(3) If required to develop a riparian forest buffer, design, implement and maintain the buffer in accordance with § 102.14 (relating to riparian [~~forest~~] buffer requirements). Various design, construction, and maintenance standards are listed in the *Riparian Forest Buffer Guidance*, (Buffer Guidance), Commonwealth of Pennsylvania, Department of Environmental Protection, No. 395-5600-001 (2009), as amended and updated.

(4) IF REQUIRED TO DEVELOP A PPC PLAN, THE PERSON SHALL DESIGN, IMPLEMENT, AND MAINTAIN THE PPC PLAN TO PROTECT WATERS OF THE COMMONWEALTH FROM DISCHARGES OF POLLUTANTS FROM ACCIDENTAL SPILLS, RELEASES OR OTHER ACTIVITIES AND MUST MEET THE REQUIREMENTS IDENTIFIED IN CHAPTER 91. GUIDANCE FOR PPC PLANS IS INCLUDED IN THE GUIDELINES FOR THE DEVELOPMENT AND IMPLEMENTATION OF ENVIRONMENTAL EMERGENCY RESPONSE PLANS, COMMONWEALTH OF PENNSYLVANIA, DEPARTMENT OF ENVIRONMENTAL PROTECTION, NO. 400-2200-001, AS AMENDED AND UPDATED.

(b) **ALTERNATIVE BMP AND DESIGN STANDARDS.** BMPs and design standards other than those listed in the [~~Manual~~] **Manuals or Buffer Guidance** may be used when a person conducting or proposing to conduct an earth disturbance activity demonstrates to the Department [~~or a county conservation district~~] that the alternate BMP or design standard minimizes accelerated erosion and sedimentation **or manages stormwater during and after the completion of earth disturbance activities** to achieve the regulatory standards in subsection (a).

(c) INCORPORATION OF FEDERAL EFFLUENT LIMITATION GUIDELINES AND STANDARDS FOR THE CONSTRUCTION AND DEVELOPMENT POINT SOURCES CATEGORY, 40 CFR PART 450. ACTIVITIES REQUIRING AN NPDES PERMIT UNDER THIS CHAPTER SHALL ALSO COMPLY WITH THE FEDERAL REGULATORY REQUIREMENTS UNDER 40 CFR PART 450, INCLUDING ALL APPENDICES, FUTURE AMENDMENTS AND SUPPLEMENTS THERETO, AS INCORPORATED HEREIN BY REFERENCE TO THE EXTENT THAT THESE PROVISIONS ARE APPLICABLE AND NOT CONTRARY TO PENNSYLVANIA LAW. IN THE EVENT OF ANY CONFLICT AMONG FEDERAL AND PENNSYLVANIA REGULATORY PROVISIONS, THE PROVISION EXPRESSLY SET OUT IN THIS CHAPTER SHALL BE UTILIZED UNLESS THE FEDERAL PROVISION IS MORE STRINGENT.

§ 102.14 Riparian [~~forest~~] buffer requirements.

(a) General requirements *FOR MANDATORY RIPARIAN BUFFERS. EXCEPT AS IN ACCORDANCE WITH PARAGRAPH (D), PERSONS PROPOSING OR CONDUCTING EARTH DISTURBANCE ACTIVITIES WHERE THE ACTIVITY REQUIRES A PERMIT UNDER THIS CHAPTER, SHALL NOT CONDUCT EARTH DISTURBANCE ACTIVITIES WITHIN 150 FEET OF A RIVER, STREAM, CREEK, LAKE, POND OR RESERVOIR WHEN THE PROJECT SITE IS:*

(1) LOCATED IN AN EXCEPTIONAL VALUE OR HIGH QUALITY WATERSHED ATTAINING ITS DESIGNATED USE AS LISTED BY THE DEPARTMENT AT THE TIME OF APPLICATION, AND SHALL PROTECT ANY EXISTING RIPARIAN BUFFER IN ACCORDANCE WITH THIS SECTION; OR

(2) LOCATED IN AN EXCEPTIONAL VALUE OR HIGH QUALITY WATERSHED THAT HAS BEEN LISTED AS IMPAIRED AND MADE PUBLICLY AVAILABLE BY THE DEPARTMENT AT THE TIME OF THE APPLICATION, AND SHALL, IN ACCORDANCE WITH THE REQUIREMENTS OF THIS SECTION:

(i) PROTECT AN EXISTING RIPARIAN FOREST BUFFER; OR

(ii) CONVERT AN EXISTING RIPARIAN BUFFER TO A RIPARIAN FOREST BUFFER; OR

(iii) ESTABLISH A NEW RIPARIAN FOREST BUFFER.

~~(1)~~(b) Riparian forest buffer *CRITERIA. TO QUALIFY AS A RIPARIAN FOREST BUFFER UNDER THIS CHAPTER, AN EXISTING, CONVERTED OR NEWLY ESTABLISHED RIPARIAN FOREST BUFFER, WHETHER MANDATORY OR VOLUNTARY, MUST MEET THE FOLLOWING REQUIREMENTS RELATED TO COMPOSITION, WIDTH AND MANAGEMENT: [Persons proposing or conducting earth disturbance activities shall incorporate a riparian forest buffer within the boundaries of the project site in accordance with this section if one of the following apply:*

~~(i) The activity requires a permit under this chapter, is located within an Exceptional Value watershed, and the project site contains, is along or within, 150 feet of a river, stream, creek, lake, pond or reservoir.~~

~~(ii) The activity is authorized utilizing the permit by rule under this chapter.~~

~~(2) Other approvals that include buffer. A riparian forest buffer may be required to be incorporated within the boundaries of a project site in accordance with this section by other rules, regulations, order, permit or other approval of the Department.~~

~~—(3) *Discharges into the buffer.* Concentrated flow and accelerated erosion and sedimentation shall be managed in the area upgrade and along the riparian forest buffer in accordance with §§ 102.4(b)–(e) and § 102.8 (relating to erosion and sediment control requirements; and PCSM requirements).~~

~~—(4) *Existing buffer composition.* An existing riparian forest buffer must: meet the requirements of subsection (d); consist predominantly of native trees and shrubs that provide at least 60% uniform canopy cover; noxious weeds and invasive species must be removed or controlled to the extent possible.~~

~~—(5) *Existing site enhancement.* Existing sites that consist of predominantly native woody vegetation that do not meet all of the criteria in paragraph (3) shall be enhanced or widened, or both, by additional plantings in open spaces around existing native trees and shrubs to establish a riparian forest buffer. Noxious weeds and invasive species shall be removed or controlled to the extent possible.~~

~~—(6) *Buffer establishment.* On sites with no native woody vegetation, a riparian forest buffer shall be established in accordance with this chapter.~~

~~—(7) *Wetlands and buffers.* Wetlands located in the riparian forest buffer shall be protected and maintained consistent with Chapter 105 (relating to dam safety and waterway management).~~

~~—(8) *Plan submission.* The applicant shall prepare and submit a plan for riparian forest buffer management to the Department or conservation district as part of the PCSM Plan. The riparian forest buffer management plan must describe how the management requirements of this section will be met.~~

~~—(b) *(1) Composition.* A RIPARIAN FOREST BUFFER IS A RIPARIAN BUFFER THAT CONSISTS PREDOMINANTLY OF NATIVE TREES, SHRUBS AND FORBS THAT PROVIDE AT LEAST 60% UNIFORM CANOPY COVER. AN EXISTING RIPARIAN FOREST BUFFER DOES NOT HAVE TO BE ALTERED TO ESTABLISH INDIVIDUAL ZONES 1 AND 2 UNDER (b)(1)(iii), BUT AT A MINIMUM, MUST HAVE A TOTAL AGGREGATE WIDTH OF THE COMBINED ZONES UNDER (b)(2).~~

~~(i) *EXISTING RIPARIAN BUFFER CONVERSION TO A RIPARIAN FOREST BUFFER.* RIPARIAN BUFFERS THAT CONSIST PREDOMINANTLY OF NATIVE WOODY VEGETATION BUT DO NOT SATISFY THE COMPOSITION OF (b)(1)(i) OR THE WIDTH REQUIREMENTS OF (b)(2) SHALL BE ENHANCED, OR WIDENED OR BOTH BY ADDITIONAL PLANTINGS IN OPEN SPACES AROUND EXISTING NATIVE TREES AND SHRUBS THAT PROVIDE AT LEAST 60% UNIFORM CANOPY COVER. AN EXISTING RIPARIAN FOREST BUFFER DOES NOT HAVE TO BE ALTERED TO ESTABLISH INDIVIDUAL ZONES 1 AND 2 UNDER (b)(1)(iii), BUT AT A MINIMUM, MUST HAVE A TOTAL AGGREGATE WIDTH OF THE~~

COMBINED ZONES UNDER (b)(2). NOXIOUS WEEDS AND INVASIVE SPECIES SHALL BE REMOVED OR CONTROLLED TO THE EXTENT POSSIBLE.

(ii) RIPARIAN FOREST BUFFER [establishment] ESTABLISHMENT. ON SITES WITH NO NATIVE WOODY VEGETATION, A RIPARIAN FOREST BUFFER SHALL BE ESTABLISHED AND SHALL BE COMPOSED OF ZONES IN ACCORDANCE WITH (b)(1)(iii), AND SHALL MEET THE WIDTH REQUIREMENTS OF (b)(2). NOXIOUS WEEDS AND INVASIVE SPECIES SHALL BE REMOVED OR CONTROLLED TO THE EXTENT POSSIBLE.

[(1) Buffer zones. At a minimum, newly established riparian forest buffers must be composed of two distinct zones, Zones 1 and 2 (See paragraph (2) regarding zones). Concentrated flow and accelerated erosion and sedimentation shall be managed in the area upgrade and along the riparian forest buffer in accordance with this subsection and subsections (c)–(e) and § 102.8.

–(2)(iii) Zones.

(A) Zone 1. Undisturbed NATIVE [forest] [(trees)] TREES must begin at the top of the streambank or normal pool elevation of a lake, pond or reservoir and occupy a strip of land measured horizontally on a line perpendicular from the top of streambank or normal pool elevation of a lake, pond or reservoir. Predominant vegetation must be composed of a variety of native riparian tree species.

(B) Zone 2. Managed NATIVE [forest] [(trees and shrubs)] TREES AND SHRUBS must begin at the landward edge of Zone 1 and occupy an additional strip of land measured horizontally on a line perpendicular from the top of streambank or normal pool elevation of a lake, pond or reservoir. Predominant vegetation must be composed of a variety of native riparian tree and shrub species.

[(c) Measurements. Riparian forest buffers must be measured horizontally with no more than a 10% variation below the minimum width from the normal pool elevation for lake, pond or reservoir and from top of streambank or top of slope for streams].

[(d)](2) Average minimum widths.

[(1)](i) [All-waters] WATERS OTHER THAN SPECIAL PROTECTION. One hundred feet (30.5 METERS) (50 feet (15.2 METERS) Zone 1 and 50 feet (15.2 METERS) Zone 2 for newly established riparian forest buffers) along all rivers, perennial or intermittent streams (both sides), lakes, ponds or reservoirs. **[Concentrated flow and accelerated erosion and sedimentation shall be managed in the area upgrade and along the riparian forest buffer in accordance with §§ 102.4(b)–(e) and § 102.8.]**

~~[(2) *Impaired waters.* One hundred fifty feet (75 feet Zone 1 and 75 feet Zone 2 on newly established riparian forest buffers) along all rivers, perennial or intermittent streams (both sides), lakes, ponds or reservoirs. Concentrated flow and accelerated erosion and sedimentation shall be managed in the area upgrade and along the riparian forest buffer in accordance with §§ 102.4(b)-(c) and 102.8.]~~

~~[(3)](ii) *Special protection waters.* One hundred fifty feet (45.7 METERS) (~~75~~50 feet (15.2 METERS) Zone 1 and ~~75~~100 feet (30.5 METERS) Zone 2 on newly established riparian forest buffers) ALONG ~~[special protection waters (High Quality and Exceptional Value designations) on]~~ all rivers, perennial or intermittent streams ~~[(both sides), and the shoreline of]~~ lakes, ~~[and]~~ ponds OR RESERVOIRS IN SPECIAL PROTECTION WATERS (HIGH QUALITY AND EXCEPTIONAL VALUE DESIGNATIONS. [Concentrated flow and accelerated erosion and sedimentation shall be managed in the area upgrade and along the riparian forest buffer in accordance with §§ 102.4(b)-(c) and 102.8.]~~

~~[(4) *Existing buffer width.* Existing riparian forest buffers must meet minimum aggregate widths of this chapter.]~~

~~[(5)](iii) *Average RIPARIAN FOREST buffer width.* The average riparian forest buffer width shall be calculated based upon the entire length of streambank or shoreline that is located within OR ALONG the boundaries of the project site. When calculating the buffer length the natural streambank or shoreline shall be followed.~~

~~[(e)](3) *Management requirements.*~~

~~[(1) Both existing and newly established riparian forest buffers, including wetlands and floodplains, shall be managed and maintained to enhance and maximize the unique value of these resources.~~

~~[(2)] EXISTING, CONVERTED AND NEWLY [Newly] established riparian forest buffers [and sites with existing woody vegetation] shall be managed in accordance with the riparian forest buffer management plan IN SUBSECTION 102.14(b)(4) and until THE established vegetation consists of predominantly native trees and shrubs that provide at least 60% uniform canopy cover and noxious weeds and invasive species have been removed or controlled to the extent possible for a period of [at least] FIVE (5) years. AFTER FIVE (5) YEARS, THE RIAPRIAN FOREST BUFFER WILL BE MANAGED AS NEEDED IN ACCORDANCE WITH THE RIPARIAN FOREST BUFFER MANAGEMENT PLAN AND WILL BE PROTECTED IN ACCORDANCE WITH PARAGRAPH (g).~~

~~[(4) MANAGEMENT PLAN. THE RIPARIAN FOREST BUFFER MANAGEMENT PLAN SHALL BE A PART OF THE PCSM PLAN AND INCLUDE AT A MINIMUM:~~

(i) PLANTING PLAN THAT IDENTIFIES THE NUMBER, DENSITY, AND SPECIES OF NATIVE TREES AND SHRUBS APPROPRIATE TO GEOGRAPHIC LOCATION THAT WILL ACHIEVE 60% UNIFORM CANOPY COVER.

(ii) MEASURES TO ENSURE SURVIVAL AND GROWTH OF PLANTINGS AND PROTECTION FROM COMPETING PLANTS AND ANIMALS INCLUDING NOXIOUS WEEDS AND INVASIVE SPECIES OVER A FIVE (5) YEAR ESTABLISHMENT PERIOD.

(iii) INSPECTION SCHEDULE AND MEASURES TO ENSURE MAINTENANCE AND FUNCTIONING OF THE RIPARIAN FOREST BUFFER INCLUDING MEASURES TO REPAIR DAMAGE TO THE BUFFER FROM STORM EVENTS GREATER THAN THE 2 YEAR/24 HOUR STORM.

(c) MANDATORY REQUIREMENTS FOR ALL RIPARIAN BUFFERS.

(1) MANAGEMENT OF STORMWATER INTO THE RIPARIAN BUFFER. STORMWATER AND ACCELERATED EROSION AND SEDIMENTATION SHALL BE MANAGED IN ACCORDANCE WITH §§ 102.4(b)--(e) AND § 102.8 (RELATING TO EROSION AND SEDIMENT CONTROL REQUIREMENTS; AND PCSM REQUIREMENTS) SO AS TO ENSURE THAT STORMWATER ENTERS THE AREA UPGRADE AND ALONG THE RIPARIAN BUFFER AS SHEET FLOW OR SHALLOW CONCENTRATED FLOW IN STORM EVENTS UP TO AND INCLUDING THE 2 YEAR/24 HOUR STORM.

(2) WETLANDS. WETLANDS LOCATED IN THE RIPARIAN BUFFER SHALL BE PROTECTED AND MAINTAINED CONSISTENT WITH CHAPTER 105 (RELATING TO DAM SAFETY AND WATERWAY MANAGEMENT).

(3) MEASUREMENTS. RIPARIAN BUFFERS MUST BE MEASURED HORIZONTALLY WITH NO MORE THAN A 10% VARIATION BELOW THE MINIMUM WIDTH FROM THE NORMAL POOL ELEVATION FOR LAKE, POND OR RESERVOIR AND FROM TOP OF STREAMBANK.

(d) EXCEPTIONS.

(1) THE REQUIREMENTS OF 102.14(a) DO NOT APPLY FOR EARTH DISTURBANCE ACTIVITIES ASSOCIATED WITH THE FOLLOWING:

(i) A PROJECT SITE LOCATED GREATER THAN 150 FEET (45.7 METERS) FROM A RIVER, STREAM, CREEK, LAKE, POND OR RESERVOIR;

(ii) ACTIVITIES INVOLVING LESS THAN ONE (1) ACRE (0.4 HECTARES) OF EARTH DISTURBANCE;

(iii) ACTIVITIES WHERE PERMIT COVERAGE IS NOT REQUIRED UNDER THIS CHAPTER;

(iv) ACTIVITIES WHERE A PERMIT OR AUTHORIZATION FOR THE EARTH DISTURBANCE ACTIVITY REQUIRED UNDER THIS CHAPTER WAS OBTAINED PRIOR TO THE EFFECTIVE DATE OF THIS REGULATION;

(v) ROAD MAINTENANCE ACTIVITIES SO LONG AS ANY EXISTING RIPARIAN BUFFER IS UNDISTURBED TO THE EXTENT PRACTICABLE;

(vi) THE REPAIR AND MAINTENANCE OF EXISTING PIPELINES AND UTILITIES SO LONG AS ANY EXISTING RIPARIAN BUFFER IS UNDISTURBED TO THE EXTENT PRACTICABLE;

(vi) OIL AND GAS, TIMBER HARVESTING, OR MINING ACTIVITIES FOR WHICH SITE RECLAMATION OR RESTORATION IS PART OF THE PERMIT AUTHORIZATION IN ACCORDANCE WITH 25 Pa. CODE CHAPTERS 77 AND 86-90, AND THIS CHAPTER; OR

(vii) A SINGLE FAMILY HOME THAT IS NOT PART OF A LARGER COMMON PLAN OF DEVELOPMENT OR SALE AND THE PARCEL WAS ACQUIRED BY THE APPLICANT PRIOR TO THE EFFECTIVE DATE OF THESE REGULATIONS.

(viii) ACTIVITIES AUTHORIZED BY A DEPARTMENT PERMIT UNDER ANOTHER CHAPTER OF THIS TITLE WHICH CONTAINS SETBACK REQUIREMENTS, AND THE ACTIVITY COMPLIES WITH THOSE SETBACK REQUIREMENTS.

(2) FOR EARTH DISTURBANCE ACTIVITIES ASSOCIATED WITH THE FOLLOWING, THE DEPARTMENT, OR THE CONSERVATION DISTRICT AFTER CONSULTATION WITH THE DEPARTMENT, MAY GRANT A WAIVER FROM ANY OF THE REQUIREMENTS OF 102.14(a) AND (b) UPON A DEMONSTRATION BY THE APPLICANT THAT THERE IS NO REASONABLE ALTERNATIVE FOR COMPLIANCE WITH THIS SECTION, SO LONG AS ANY EXISTING RIPARIAN BUFFER IS UNDISTURBED TO THE EXTENT PRACTICABLE AND THAT THE ACTIVITY WILL OTHERWISE MEET THE REQUIREMENTS OF THIS CHAPTER:

(i) THE PROJECT IS NECESSARY TO ABATE A SUBSTANTIAL THREAT TO THE PUBLIC HEALTH OR SAFETY;

(ii) LINEAR PROJECTS WHICH MAY INCLUDE PIPELINES, PUBLIC ROADWAYS, RAIL LINES, OR UTILITY LINES;

(iii) ABANDONED MINE RECLAMATION ACTIVITIES THAT ARE CONDUCTED PURSUANT TO DEPARTMENT AUTHORIZATION OR PERMIT;

(iv) PROJECTS OF A TEMPORARY NATURE WHERE THE SITE WILL BE FULLY RESTORED TO ITS PRE-EXISTING CONDITION DURING THE TERM OF THE PERMIT UNDER THIS CHAPTER; OR

(v) REDEVELOPMENT PROJECTS WHICH MAY INCLUDE BROWNFIELDS OR USE OF OTHER VACANT LAND AND PROPERTY WITHIN A DEVELOPED AREA FOR FURTHER CONSTRUCTION OR DEVELOPMENT.

(3) THE APPLICANT SHALL SUBMIT A WRITTEN REQUEST FOR A WAIVER TO THE DEPARTMENT OR THE CONSERVATION DISTRICT AS PART OF THE APPLICATION FOR A PERMIT UNDER THIS CHAPTER.

(4) AN APPLICANT REQUESTING A WAIVER MAY PROPOSE AND THE DEPARTMENT MAY ALLOW OFFSITE PROTECTION, CONVERSION, OR ESTABLISHMENT OF RIPARIAN FOREST BUFFERS OR IN-LIEU-OF COMPENSATION TO FUND RIPARIAN FOREST BUFFER PROTECTION, ENHANCEMENT OR ESTABLISHMENT.

(5) PROJECTS QUALIFYING FOR AN EXCEPTION UNDER THIS SUBSECTION ARE NOT RELIEVED FROM COMPLIANCE WITH OTHER APPLICABLE REQUIREMENTS OF THIS CHAPTER OR OTHER LAWS ADMINISTERED BY THE DEPARTMENT.

(e) UTILIZATION OF RIPARIAN FOREST BUFFERS.

(1) ANTIDegradation Presumption. Except for riparian buffers protected pursuant to subsection (a)(1) or (d), a riparian forest buffer meeting the requirements of this section will prevent thermal impacts and is a nondischarge alternative. When included in an E&S plan or PCSM plan meeting the requirements of this chapter, the proposed earth disturbance activity will satisfy the requirements of 102.4(b)(6) and 102.8(h), unless data or information provided to the department during the permit application or authorization review process shows that the proposed earth disturbance activity will degrade water quality.

(2) Trading or Offsetting Credits. Except for riparian buffers protected pursuant to subsection (a)(1) or (d), where protection of existing, or conversion or the establishment of a riparian forest buffer which meets the requirements

OF THIS SECTION AND IS ABOVE BASELINE REGULATORY REQUIREMENTS, CREDITS MAY BE AVAILABLE FOR TRADING OR OFFSETS IN ACCORDANCE WITH ANY PROCEDURES ESTABLISHED BY THE DEPARTMENT OR ANY REGULATIONS RELATED TO TRADING OR OFFSETTING DEVELOPED UNDER THIS TITLE.

(3) VOLUNTARY RIPARIAN FOREST BUFFER. PERSONS THAT PROTECT, CONVERT OR ESTABLISH A NEW RIPARIAN FOREST BUFFER MEETING THE REQUIREMENTS OF THIS SECTION, MAY QUALIFY FOR BENEFITS UNDER SUBSECTION (1) OR (2).

(f) ACTIVITIES WITHIN A RIPARIAN BUFFER.

(1)

[~~3~~] The following practices and activities are prohibited within the riparian **[forest]** buffer:

(i) Soil disturbance by grading, stripping of topsoil, plowing, cultivating or other practices **EXCEPT AS ALLOWED IN SUBPARAGRAPH (f)(5)(i).**

(ii) Draining by ditching, underdrains or other drainage systems.

(iii) Housing, grazing or otherwise maintaining animals **FOR AGRICULTURAL OR COMMERCIAL PURPOSES.**

(iv) Storing or stockpiling materials.

(v) Off road vehicular travel.

[~~4~~](2) The following practices and activities are acceptable in the riparian **[forest]** buffer when **[permitted]** **AUTHORIZED** by the Department:

(i) Construction or placement of roads, bridges, trails, storm drainage, utilities or other structures.

(ii) Water obstructions or encroachments.

(iii) RESEARCH AND DATA COLLECTION ACTIVITIES, WHICH MAY INCLUDE WATER QUALITY MONITORING AND STREAM GAUGING.

(iv) RESTORATION PROJECTS, FACILITIES, EMERGENCY RESPONSE AND OTHER SIMILAR ACTIVITIES.

[~~5~~](3) The following practices and activities are allowable within the riparian **[forest]** buffer:

(i) Activities or practices used to maintain the riparian [~~forest~~] buffer including the disturbance of existing vegetation, tree removal, shrub removal, clearing, mowing, burning or spraying in accordance with the long-term operation and maintenance plan.

~~[(ii) Restoration projects, facilities, emergency response and other activities approved by the Department.]~~

~~[(iii) Scientific studies approved by the Department, including water quality monitoring and stream gauging.]~~

~~[(iv)](ii) Timber harvesting [~~operations only in Zone 2, as described in this section, that maintain at least 60% uniform canopy cover of predominantly native trees and shrubs and are identified in a Forest Stewardship Plan approved by the Department of Conservation and Natural Resources~~] ACTIVITIES IN ACCORDANCE WITH THE RIPARIAN FOREST BUFFER MANAGEMENT PLAN AS PART OF THE PCSM PLAN.~~

~~[(v)](iii) Passive OR LOW IMPACT recreational activities SO LONG AS THE FUNCTIONING OF THE RIPARIAN BUFFER IS MAINTAINED.~~

~~[(f)](g) *Permanent protection of riparian [~~forest~~] buffers.*~~

(1) Existing and newly established riparian [~~forest~~] buffers including access easements must be protected in perpetuity through deed restriction, conservation easement, local ordinance, [~~or~~] permit conditions OR ANY OTHER MECHANISMS THAT ENSURE THE LONG TERM FUNCTIONING AND INTEGRITY OF THE RIPARIAN BUFFER.

(2) For any existing or newly established riparian [~~forest~~] buffer, the boundary limits of the riparian [~~forest~~] buffer must be identified and clearly marked.

~~[(g)](h) *Reporting.* [~~Permittees~~] PERSONS WHO ESTABLISH OR PROTECT AN EXISTING RIPARIAN BUFFER IN ACCORDANCE WITH THIS SECTION shall complete data forms provided by the Department [~~for newly established and existing riparian forest buffers~~] and SHALL submit [~~them~~] THE FORMS to the Department or conservation district [~~as part of the PCSM Plan~~] WITHIN ONE YEAR OF ESTABLISHMENT OR PROTECTION.~~

[§ 102.15. Permit-by-rule for low impact projects with riparian forest buffers.]

~~[(a) *Qualifying for coverage.* Persons proposing or conducting an earth disturbance activity requiring a permit authorization under this chapter shall qualify for permit coverage under this rule if they meet the requirements of this section, which supersede any requirements of Chapter 92 (relating to National Pollutant Discharge~~

~~Elimination System permitting, monitoring and compliance). An earth disturbance activity that requires a permit authorization under this chapter that is not consistent with this section shall obtain coverage under a general or individual NPDES Permit for Discharges Associated with Construction Activities or other E & S control permit under this chapter prior to commencing the earth disturbance activity.~~

~~—(b) Permit-by-rule exclusions. The following sites or the activities associated with the project are not eligible for coverage under the permit-by-rule:~~

~~—(1) Projects located in or with the potential to discharge to waters that have a designated or existing use of Exceptional Value under Chapter 93 (relating to water quality standards):~~

~~—(2) Earth disturbance activities conducted in or on the following sensitive areas:~~

~~—(i) Highly erodible conditions (soils in combination with percent slope) as follows:~~

~~—(A) 3% to 8% slope with soil K factor greater than 0.37.~~

~~—(B) 8% to 15% slope with soil K factor greater than 0.28.~~

~~—(C) 15% slope with soil K factor greater than 0.18.~~

~~—(ii) Geological formations that present a risk to public health, safety and the environment including:~~

~~—(A) Sinkhole development.~~

~~—(B) Land sliding.~~

~~—(C) With the significant potential to cause or contribute to pollution when disturbed; including acid, radioactive and arsenic bearing formations.~~

~~—(iii) Wetlands or floodplains, unless earth disturbance in these areas is required for access and utilities and is authorized under Chapter 105 or 106 (relating to National Pollutant Discharge Elimination System permitting, monitoring and compliance; and floodplain management).~~

~~—(3) Lands that are currently contaminated from a spill or release of a hazardous material, or hazardous, toxic, or other regulated substance, as these terms are defined in this title, that pose a risk or threat to public health, safety, or the environment.~~

~~—(4) The earth disturbance is being proposed or conducted by a person who has failed and continues to fail to comply or has shown a lack of ability or intention to~~

~~comply with a regulation, permit and schedule of compliance or order issued by the Department.~~

~~–(5) The earth disturbance activities or potential discharges will adversely affect a Pennsylvania or federal endangered or threatened species.~~

~~–(c) Permit conditions. Persons conducting earth disturbance activities under this permit shall meet the following requirements:~~

~~–(1) Persons seeking coverage under permit by rule shall first schedule a presubmission meeting with the Department or the conservation district prior to submitting an ROC. The meeting shall also be attended by the professional engineer, geologist or landscape architect registered in this Commonwealth that will be responsible for project design and the operator when known. At the presubmission meeting, the registrant shall provide:~~

~~–(i) A site location map (United States Geologic Survey or equivalent) including:~~

~~–(A) All waters of this Commonwealth and water quality classifications under Chapter 93 (relating to water quality standards).~~

~~–(B) Existing site conditions.~~

~~–(C) Limits of earth disturbance activities.~~

~~–(D) Preliminary site design.~~

~~–(E) Total project acres and boundaries.~~

~~–(ii) A presubmission meeting checklist using a form provided by the Department.~~

~~–(2) When the project site contains, is along, or within 100 feet of a river, stream, creek, lake, pond or reservoir, the registrant shall:~~

~~–(i) Establish new or preserve existing riparian forest buffers at least 100 feet in width between the top of streambank or normal pool elevation of a lake, pond or reservoir and areas of earth disturbance.~~

~~–(ii) Establish new or preserve existing riparian forest buffers at least 150 feet in width between the top of streambank or normal pool elevation of a lake, pond or reservoir and disturbed areas for projects located in high quality or impaired watersheds.~~

~~–(iii) Design or maintain, or both, a riparian forest buffer in accordance with *Riparian Forest Buffer Guidance, Commonwealth of Pennsylvania, Department of Environmental Protection, No. 395-5600-001 (2009), as amended and updated.*~~

~~—(3) The earth disturbance must not exceed 15 acres at a time. If the total disturbed area will exceed 15 acres over the life of the project, earth disturbance shall be sequenced in a manner that provides for stabilization prior to disturbance of subsequent phases.~~

~~—(4) Earth disturbance activities on any portion, part, or during any stage of, a larger common plan of development or sale over the life of the project must meet the requirements and be covered under a single ROC.~~

~~—(i) Any significant new or increased changes to the earth disturbance activities that are not included in the original ROC shall be submitted to the Department or conservation district through an amended ROC in accordance with this section.~~

~~—(ii) The new or increased earth disturbance activities may not commence until receipt of written verification of coverage.~~

~~—(5) Analysis demonstrating that the PCSM BMPs will: meet the volume reduction and water quality requirements specified in an applicable Department approved and current Act 167 stormwater management watershed plan; or manage the net change for storms up to and including the 2-year/24-hour storm event when compared to preconstruction runoff volume and water quality. The analysis for the 2-year/24-hour storm event shall be conducted using the following minimum criteria:~~

~~—(i) Existing predevelopment nonforested pervious areas must be considered meadow in good condition or its equivalent.~~

~~—(ii) When the existing project site contains impervious area, 20% of the existing impervious area to be disturbed must be considered meadow in good condition or better, except for repair, reconstruction, or restoration of roadways or utility infrastructure when the site will be returned to existing condition.~~

~~—(6) Analysis demonstrating that the PCSM BMPs will: meet the rate requirements specified in an applicable Department approved and current Act 167 stormwater management watershed plan; or manage the net change in peak rate for the 2-, 5-, 10-, 25-, 50-, and 100-year/24-hour storm events in a manner not to exceed preconstruction rates.~~

~~—(i) Hydrologic routing analysis is required to demonstrate this requirement is met.~~

~~—(ii) Exempt from this requirement are Department-approved direct discharges to tidal areas or Department-approved no detention areas.~~

~~—(7) Retain the services of a professional engineer, geologist or landscape architect registered in this Commonwealth who shall:~~

~~–(i) Prepare and seal E & S and PCSM Plans to be submitted with the ROC which contain the following certification:~~

~~"I (name) do hereby certify, pursuant to the penalties of 18 Pa.C.S.A. § 4904, to the best of my knowledge, information and belief that the ROC, E & S and PCSM Plans are true and correct, and are in conformance with Chapter 102 of the rules and regulations of the Department of Environmental Protection."~~

~~–(ii) Identify in the E & S and PCSM Plans a schedule of inspections for critical stages of E & S and PCSM BMP installation and provide oversight responsibility during construction of those critical stages.~~

~~–(iii) Oversee and seal any necessary modifications to E & S and PCSM Plans; and submit copies of modified plans to the Department or conservation district.~~

~~–(iv) Prepare and seal record drawings and provide certification that the E & S and PCSM BMPs were installed consistent with E & S and PCSM Plans submitted with the ROC.~~

~~–(8) Upon receipt of the Verification of Coverage, the registrant shall notify the Department or conservation district at least 7 business days before commencing construction.~~

~~–(9) The registrant or co-registrant shall have the E & S Plan, PPC Plan, PCSM Plan, and other documents required by this permit-by-rule available at the site for review by the Department, conservation district, or other authorized local, State or Federal government official.~~

~~–(10) The registrant shall implement the plans developed and verified in accordance with this section.~~

~~–(11) The registrant or an agent shall notify the Department or conservation district at least 3 days prior to critical stages of E & S and PCSM BMP installation.~~

~~–(d) Projects located in High Quality watersheds or watersheds impaired for sediment or stormwater.~~

~~–(1) Watersheds. Permit-by-rule registrants proposing projects that are located in watersheds that have a designated or existing use of high quality, or nonspecial protection waters impaired for sediment or stormwater shall demonstrate that all construction and post construction discharges will not degrade the physical, chemical or biological characteristics of the surface waters and may not utilize the social or economic justification process established under § 93.4c(b)(iii) (relating to implementation of antidegradation requirements). In addition to the 150-foot riparian forest buffer, registrants shall utilize solely nondischarge alternative BMPs in their E & S and PCSM Plans.~~

~~–(2) *Public notice.*~~

~~–(i) The registrant shall provide a public notice once a week for 3 consecutive weeks in at least one newspaper of general circulation within the geographical area of the project site prior to submission for the ROC. The contents of every public notice must include the following:~~

~~–(A) The name, address and phone number of the registrant.~~

~~–(B) A 30-day period following publication of the notice during which written comments may be submitted by interested persons to the applicant.~~

~~–(C) A brief description of each registrant's activities and project location which result in the discharge proposed for the permit by rule.~~

~~–(D) The name of the receiving water and watershed to which each discharge is made and a short description of the location of each discharge on the waterway indicating whether the discharge is a new or an existing discharge.~~

~~–(E) The location of the nearest downstream potable water supply, or a finding that no potable water supply will be affected by the proposed discharge.~~

~~–(F) The means by which interested persons may comment upon the proposed project.~~

~~–(G) Contact information including the name, address and phone number where interested persons may obtain further information regarding the project.~~

~~–(H) The existing or designated use of the receiving surface water under Chapter 93.~~

~~–(ii) The registrant shall provide proof that public notice has been published in a newspaper of general circulation covering the locality or localities in which the activity is or will be located. The proof of public notice, along with any comments and responses, shall be submitted with the ROC.~~

~~–(c) *Municipal notification.* At least 30 days prior to submission of the ROC, the registrant shall provide written notification to every municipality in which the proposed earth disturbance activity will be located under section 1905-A of The Administrative Code of 1929 (71 P. S. § 510-5). Proof of this notification shall be submitted with the complete ROC.~~

~~–(f) *Written E & S Plan, PCSM Plan and PPC Plan.* The registrant shall develop an E & S Plan, PCSM Plan and PPC Plan in accordance with the requirements of this chapter and the following:~~

~~—(1) The E & S BMPs required by this section shall be designed and implemented to meet the standards and specifications identified in the Department's *Erosion and Sediment Pollution Control Manual*, Commonwealth of Pennsylvania, Department of Environmental Protection, No. 363-2134-008 (April 2000), as amended and updated.~~

~~—(2) PCSM BMPs shall be designed and implemented to meet the standards and specifications identified in the *Pennsylvania Stormwater Best Management Practices Manual*, Commonwealth of Pennsylvania, Department of Environmental Protection, No. 363-0300-002 (December 2006), as amended and updated.~~

~~—(3) Both the E & S Plan and the PCSM Plan must include a riparian forest buffer designed in accordance with § 102.14 (relating to riparian forest buffer requirements) and this section.~~

~~—(4) Both the E & S Plan and PCSM Plan must minimize the accelerated erosion and sedimentation and must use PCSM BMPs that collectively achieve no net change when compared to preconstruction discharges in stormwater runoff volume, rate and water quality. This shall be accomplished first through the use of site design and nonstructural BMP approaches, and if necessary, structural filtration, infiltration and runoff control BMPs in accordance with *Erosion and Sediment Pollution Control Manual*, Commonwealth of Pennsylvania, Department of Environmental Protection, No. 363-2134-008 (April 2000), and *Stormwater Best Management Practices Manual*, Commonwealth of Pennsylvania, Department of Environmental Protection, No. 363-0300-002 (December 2006), as amended and updated.~~

~~—(5) Both the E & S Plan and PCSM Plan shall be prepared and sealed by a professional engineer, geologist or landscape architect registered in this Commonwealth.~~

~~—(6) Prepare a PPC Plan in accordance with *Guidelines for the Development and Implementation of Environmental Emergency Response Plans*, Commonwealth of Pennsylvania, Department of Environmental Protection, No. 400-2200-001 (April 2001), as amended and updated.~~

~~—(g) *E & S Plan for the permit-by-rule*. The E & S Plan submitted under this section must meet the requirements of § 102.4 (relating to erosion and sediment control requirements) and also include the following categories of E & S BMPs to be installed and maintained. The installation of BMPs shall be conducted in the following sequence:~~

~~—(1) *Site preparation, sensitive area and buffer protection*. Prior to commencement of any earth disturbance activity including clearing and grubbing, the registrant shall clearly delineate sensitive areas, riparian forest buffer boundaries, areas proposed for infiltration practices, the limits of clearing, and trees that are to be~~

conserved within the project site and install appropriate barriers where equipment may not be parked, staged, operated or located for any purpose.

–(2) *Site access.* This is the first land disturbance activity to take place at the site and the registrant should provide BMPs to minimize accelerated erosion and sedimentation from the following areas: entrance to the site, construction routes, and areas designated for equipment or other use at the site including parking areas and soil stockpiles.

–(3) *Sediment barriers.* The registrant shall install perimeter BMPs after the construction site is accessed, keeping associated clearing and grubbing limited to only that amount required for installing perimeter BMPs.

–(4) *Diversion.* The registrant shall include outlet protection, constructed to divert upslope clean water runoff around the disturbed area (when necessary);

–(5) *Sediment basins and traps.* Outlet protection included shall be constructed prior to the remaining clearing/grubbing and other earth disturbance activities.

–(6) *Sediment laden water channels or other conveyance.* This method shall be used to divert stormwater runoff water to the appropriate BMPs such as traps and ponds and should be installed prior to the remaining clearing/grubbing and other earth disturbance activities.

–(7) *Land clearing and grading.* The registrant shall implement clearing and grading only after all downslope E & S BMPs have been constructed and stabilized.

–(8) *Surface stabilization.* The registrant shall apply temporary or permanent stabilization measures immediately to any disturbed areas where work has reached final grade, has been delayed or otherwise has been temporarily suspended.

–(9) *Construction of buildings, utilities, and paving.* During construction, the registrant shall install and maintain any additional E & S BMPs that may be required and implement structural PCSM BMPs.

–(10) *Landscaping and final stabilization, topsoiling, trees, and shrubs.* After construction is completed, the registrant shall install stabilization BMPs including: permanent seeding, mulching, sodding and riprap, and complete implementation of PCSM BMPs in this last construction phase. The registrants stabilize all open areas, including borrow and spoil areas, and remove all temporary BMPs and stabilize any disturbances associated with the removal of the BMP.

–(h) *PCSM Plan for the permit-by-rule.* The PCSM Plan submitted under this section must meet the requirements of § 102.8 (relating to PCSM requirements), and also include the following categories of BMPs to be installed and maintained:

~~–(1) *Nonstructural BMPs.* Nonstructural BMPs which promote the treatment, infiltration, evaporation and transpiration of stormwater runoff shall be used.~~

~~–(2) *Low impact, conservation and green infrastructure designs.* These designs shall be used to minimize the generation of runoff by preserving open space, preserving natural areas, reducing the amount of impervious surface, and other green infrastructure design principles that utilize or mimic infiltration or evapotranspiration.~~

~~–(3) *Volume reduction and infiltration practices.* These practices must include either engineered structures or landscape features designed to capture, reuse, recycle and manage, or infiltrate runoff that mimic preconstruction conditions.~~

~~–(4) *Runoff practices.* These practices shall be designed and constructed to convey runoff, increase evaporation and manage rate. The practices are to also promote infiltration, filtration and biological uptake of pollutants.~~

~~–(5) *Filtration practices.* These practices shall be used to treat runoff through filter media that are designed to capture pollutants through the processes of physical filtration of solids or cation exchange of dissolved pollutants.~~

~~–(i) *ROC under the permit-by-rule.* Registrants seeking coverage under this permit-by-rule shall prepare and submit a complete ROC to the Department or conservation district. The ROC must demonstrate eligibility under and compliance with this section and include:~~

~~–(1) *An ROC checklist.*~~

~~–(2) *An E & S Plan prepared by a professional engineer, geologist or landscape architect registered in this Commonwealth.*~~

~~–(3) *A PCSM Plan prepared by a professional engineer, geologist, or landscape architect registered in this Commonwealth.*~~

~~–(4) *Proof of municipal notice.*~~

~~–(5) *Proof of public notice along with all comments and responses for projects in High Quality watersheds impaired for sediment or stormwater.*~~

~~–(6) *Proof of consultation with the PNHP regarding the presence of a State or Federal threatened or endangered species on the project site.*~~

~~–(7) *Applicable fees.*~~

~~–(j) *Eligibility verification.* Upon submission of the ROC, the Department or the conservation district will review the ROC for consistency with the eligibility criteria,~~

~~conditions and other requirements of this section, and make a determination of coverage within 30 days. Upon determination of eligibility, the Department or the conservation district will provide written verification of coverage for 5 years. The registrant may apply for other permit coverage as referenced in this section if coverage under this permit-by-rule is denied.~~

~~—(k) Coverage notice. The Department will provide notice in the *Pennsylvania Bulletin* of every approval of coverage under this permit-by-rule.~~

~~—(l) Requiring coverage under an individual permit or general permit.~~

~~—(1) The Department may deny coverage under this permit-by-rule, or may amend, revoke, suspend or terminate previously issued coverage under this permit-by-rule and require the registrant to apply for and obtain either a general or an individual NPDES permit for failure to meet the requirements of this section. An interested person may petition the Department to take action under this subsection. If a permittee is notified by the Department that previously authorized coverage under this permit is revoked, terminated or suspended and that a general or individual NPDES permit is required, the registrant shall submit a complete NPDES NOI or application, in conformance with this chapter, within 90 days of receipt of the notification, unless the discharger is already in possession of a valid general or individual NPDES permit. Failure to submit the NOI or application within 90 days shall result in automatic termination of coverage under the permit-by-rule. If the project site is in compliance with this chapter, a timely submission of a complete NOI or application shall result in continuation of coverage under the permit-by-rule until the Department takes final action on the pending NOI or permit application.~~

~~—(2) An action of the Department or the conservation district denying coverage under this permit-by-rule, or requiring a general or an individual NPDES permit, is not a final action of the Department until the registrant submits and the Department takes final action on an individual permit application.~~

~~—(m) ROC. Persons requesting an ROC under this permit-by-rule shall submit to the Department or conservation district an administratively complete and acceptable ROC at least 30 days prior to the expiration date of the coverage. In the event that a timely, administratively complete, and acceptable application for renewal of coverage has been submitted and the Department or conservation district is unable, through no fault of the permittee, to reissue the approval for coverage before the expiration date of the approved coverage, the terms and conditions of the approved coverage will be automatically continued and will remain fully effective and enforceable pending the issuance or denial of the renewal of coverage, provided the permittee is, and has been, operating in compliance with the terms and conditions of the permit-by-rule.~~

~~—(n) *Other permits or approvals.* Nothing in this permit-by-rule relieves the registrant of the obligation to obtain any other applicable permits, or of complying with all Federal, State or local laws, regulations or standards for the construction, operation and maintenance of the project.~~

~~—(o) *Termination of coverage.* A permit-by-rule registrant covered under this section shall comply with § 102.7 (relating to permit termination) to terminate permit coverage.~~

~~—(p) *Program audit.*~~

~~—(1) The Department will audit the permit-by-rule to verify the effectiveness and the level of environmental protection that the permit provides. The audit will include the following:~~

~~—(i) Evaluation of whether the objectives of riparian forest buffers, conservation design and permittee compliance are being met.~~

~~—(ii) Whether the professional engineer, geologist or landscape architect registered in this Commonwealth plan certifications are accurate and effective.~~

~~—(iii) The adequacy of permittee plan development and BMP implementation and maintenance.~~

~~—(iv) The effectiveness of achieving the desired environmental results.~~

~~—(2) This audit process will not only report noncompliance and corrective actions, but also highlight areas of good practices and favorable results. That information will be used to develop policy or amend regulations for enhanced and continual improvement.]~~

§ 102.22. [Permanent] Site stabilization.

(a) *Permanent stabilization.* Upon final completion of an earth disturbance activity or any stage or phase of an activity, the site shall [be] immediately have topsoil restored, replaced, or amended, seeded, mulched or otherwise permanently stabilized and protected from accelerated erosion and sedimentation.

[(b) Erosion and sediment control]

(1) E & S BMPs shall be implemented and maintained until the permanent stabilization is completed. Once permanent stabilization has been established, the temporary E & S BMPs shall be removed. Any areas disturbed in the act of removing temporary E & S BMPs shall be permanently stabilized upon completion of the temporary E & S BMP removal activity.

[(c)](2) For an earth disturbance activity or any stage or phase of an activity to be considered permanently stabilized, the disturbed areas shall be covered with one of the following:

[(1)](i) A minimum uniform 70% perennial vegetative cover, with a density capable of resisting accelerated erosion and sedimentation.

[(2)](ii) An acceptable BMP which permanently minimizes accelerated erosion and sedimentation.

(b) *Temporary stabilization.*

(1) Upon temporary cessation of an earth disturbance activity or any stage or phase of an activity where a cessation of earth disturbance activities will exceed ~~[3]~~ 4 days, the site shall be immediately seeded, mulched, or otherwise protected from accelerated erosion and sedimentation pending future earth disturbance activities.

(2) For an earth disturbance activity or any stage or phase of an activity to be considered temporarily stabilized, the disturbed areas shall be covered with one of the following:

(i) A minimum uniform coverage of mulch and seed, with a density capable of resisting accelerated erosion and sedimentation.

(ii) An acceptable BMP which temporarily minimizes accelerated erosion and sedimentation.

ENFORCEMENT

§ 102.31. Applicability.

The Department or a [county] conservation district may enforce this chapter under The Clean Streams Law (35 P. S. §§ 691.1--691.1001).

§ 102.32. Compliance and enforcement provisions.

* * * * *

(b) If the Department finds that pollution or a danger of pollution results from an act of God in the form of sediment from land for which a complete Conservation Plan has been developed by the [county] conservation district and the Natural Resource Conservation Service, and the plan has been fully implemented and maintained, the landowner shall be excluded from the penalties of [the act] **The Clean Streams Law (35 P. S. § 691.1--691.1001).**

(c) A person aggrieved by an action of a conservation district under this chapter may request an informal hearing with the Department within 30 days following the notice of the action. Any final determination by the Department under the informal hearing may be appealed to the EHB in accordance with established administrative and judicial procedures.

(d) For enforcement action taken under this subchapter, the Department or conservation district may collect or recover, from the responsible party, costs and expenses involved in taking enforcement action in accordance with this subchapter and initiating cost recovery actions under this subchapter. The Department or conservation district may collect the amount in the same manner as civil penalties are collected under section 605 of The Clean Streams Law (35 P. S. § 691.1605).

RESPONSIBILITIES OF LOCAL GOVERNING BODIES

§ 102.41. Administration by [county] conservation districts.

(a) The Department may delegate by written agreement the administration and enforcement of this chapter to [county] conservation districts if they have adequate and qualified staff, and are; or will be; implementing the program identified in the delegation agreement.

(b) An acceptable program shall have the concurrence and approval of the governing body of the county in which the [county] conservation district operates.

(c) The Department will retain program administration and enforcement over projects which cross the political boundaries of [county] conservation districts unless otherwise authorized by the Department.

§ 102.42. Notification of application for permits.

A municipality or county which issues building or other permits shall notify the Department or [county] conservation district within 5 days of receipt of an application for a permit involving an earth disturbance activity consisting of [5 acres] 1 acre ([2] 0.4 hectares) or more.

§ 102.43. Withholding permits.

[A] With the exception of local stormwater approvals or authorizations, a municipality or county may not issue a building or other permit or final approval to those proposing or conducting earth disturbance activities requiring a Department permit until the Department or a [county] conservation district has issued the [Erosion and Sediment Control] E & S or individual NPDES Permit, or approved coverage under the general NPDES Permit for Stormwater Discharges Associated With Construction Activities under § 102.5 (relating to permit requirements).
