COMMONWEALTH OF PENNSYLVANIA, DEPARTMENT OF ENVIRONMENTAL PROTECTION NOTICE OF SIGNIFICANT MODIFICATION TO TITLE V OPERATING PERMIT (TVOP) Notice is hereby given in accordance with 25 Pa. Code Sections 127.521 and 127.542 that Energy Transfer Marketing & Terminals, L.P. (ETMT) has submitted a significant operating permit modification application to the Pennsylvania Department of Environmental Protection (DEP) to modify TVOP No. 23-00119 for its Marcus Hook Terminal (MHT), which is located at 100 Green Street in Marcus Hook Borough, Delaware County. In accordance with 25 Pa. Code §§ 129.111-129.115 (relating to additional RACT requirements for major sources of NOx and VOCs for the 2015 ozone NAAQS), DEP has made a preliminary determination to approve a RACT III alternative compliance plan for the ETMT MHT. The RACT III alternative compliance plan, if approved by DEP, will be issued as a significant modification to the facility's TVOP. The RACT III alternative compliance plan incorporates provisions and requirements for the control of emissions of nitrogen oxides (NOx) and volatile organic compounds (VOCs). These provisions and requirements are intended to address the Commonwealth's Reasonably Available Control Technology (RACT) obligations under section 184 of the Clean Air Act for the 2015 8-hour ozone National Ambient Air Quality Standards (NAAQS). The RACT III alternative compliance plan does not adopt any new regulations. If approved by DEP, the RACT III alternative compliance plan will be submitted to the United States Environmental Protection Agency (EPA) as a revision to the Commonwealth's State Implementation Plan (SIP). Requirements that are not part of the RACT III alternative compliance plan will be excluded from the SIP revision submittal. The following is a summary of the RACT III alternative compliance requirements for this facility that are proposed to be submitted to EPA as a revision to the Commonwealth's SIP, found in the TVOP: Source ID Source Name Citation Air Cleaning Devices and Air Pollution Control Technologies or Techniques Current Proposed for RACT III 102 Refrigerated 25 Pa.
