Subject: FW: New Hope Pit Pump Feeder Changes

The attached quote is the company we are using for the relocation of the electrical transformers.

The new Electrical Transformers will be located directly above the current trailer located on level 4. The quote states the instructions. The ordering of the electrical components has a lead time of 4 to 6 weeks. Once all the materials are in, there is a 1 to 2 week lead time to have it scheduled.

We are looking at this work to be done around the middle to end of June time frame.

Please let me know if you have any questions

Christina
I opted to use new transformers since the old ones are in bad shape.
I appreciate the opportunity to quote this project.
Best regards!!!
Tom

Re: Pit Pump Feeder Changes

Furnish & Install

- Three new 167 KVA transformers on a new pole at the top of high wall adjacent to level 4
- One 45' class 2 pole to mount the transformers onto
- Miscellaneous pole line hardware for tying into the existing 4,160 volt power line
- Parallel runs of 4/0 GGC wiring from the new transformers to the relocated pump control station
- Wiring into the relocated control station
- Demolition of the existing wiring that feeds the existing trailer power structure

Project Cost.....\$38,700.00 Dollars

Exclusions

- Removal of the existing trailer power structure (Shall be abandoned in place)

Respectfully submitted,

Customer Agreement of contract
