COMMENTS AND RECOMMENDATIONS: This partial inspection was conducted solo. A blast was being loaded and all activity in the pit was ceased for safety. The stream area was very muddy due to the recent rain. The NW corner was also very muddy and Mr. Jeff Phillips felt the area was not safe for reclamation work. Mr. Romano (Foreman) stated that 2 employees left the company. The employee log book was reviewed. Pumping volumes were reviewed and were approximately 500,000 GPD. Water was discharging and appeared clear. Water levels in the pit and sump appeared to be the same as the previous inspection. The operator is reminded to submit the monthly truck count and estimated volume of material used for reclamation by the 5th of each month. The operator was reminded to have the reclamation hours and volumes in the quarterly report. The operator was reminded that reclamation work needed to continue as noted in items 2 and 3 in the Department letter dated January 29, 2016. Failure to comply with the terms and conditions of the January 29, 2016 letter will result in enforcement action.
