---DROUGHT WARNING/DROUGHT WATCH---

Dear Public Water Supplier:

We are writing to inform you about the expanded drought declaration DEP Acting Secretary Patrick McDonnell announced on September 6, 2016, on behalf of Governor Tom Wolf. The expanded drought watch declaration added the following 4 counties:

Chester, Cumberland, Delaware and Philadelphia.

The following is the list of counties, including the four recently added ones that are under a drought declaration:

Drought Warning

Potter

Drought Watch

Armstrong, Bedford, Berks, Blair, Bradford, Cameron, Carbon, Center, Chester, Clarion, Clearfield, Clinton, Cumberland, Dauphin, Delaware, Elk, Forest, Fulton, Huntingdon, Indiana, Jefferson, Juniata, Lawrence, Lebanon, Lehigh, Lycoming, McKean, Mercer, Mifflin, Northampton, Perry, Philadelphia, Schuylkill, Snyder, Sullivan, Tioga, Union, and Venango.

The declaration adding four additional counties into drought watch was due to low stream flows, declining groundwater levels and lack of precipitation.

Please review your Drought Contingency Plan (DCP) and update your DCP, if necessary, to account for any changes in either your sources or the demands on your system. If you do not have a DCP, or your existing DCP is older than 3 years, you should be preparing one. If you are preparing one for the first time, we have information available to help you at <http://www.dep.pa.gov/Business/Water/PlanningConservation/Drought/Pages/Forms.aspx> . Refer to the Drought Contingency Plan Checklist and Drought Management Guidelines under the Public Water Supply section on the drought forms page. For technical assistance please call our Planning and Conservation Division at 717.772.4048. After you have completed your DCP, you should submit it to us for review and approval. DCPs can be submitted online through the Drought Emergency Application (DEA) link provided on the drought forms page.

We encourage you to use our website for Drought Information at <http://www.dep.pa.gov/drought>. We post drought updates on this website on a regular basis to keep you informed of emerging conditions. The website also either provides or links to information that is useful for monitoring conditions in your area or educating your customers in

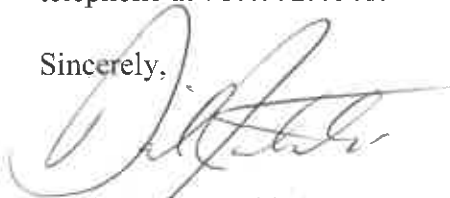

various methods of conserving water. If you have a website, you may wish to consider linking directly to the Drought Information Center so your customers will have ready access to our information as well.

Remember, in a drought watch, we should all be seeking to reduce water use by about 5 percent through voluntary conservation measures. During a warning, our goal is 10-15 percent reductions, still through voluntary measures.

Under a gubernatorial emergency proclamation, public water suppliers providing service to 50 or more customer connections with sources or a service area within a designated drought emergency area are required to develop, adopt, and submit a DCP to the Planning and Conservation Division for approval. In addition, should bans on nonessential water uses become mandatory, water rationing may be approved, if necessary, by the Commonwealth Drought Coordinator, as agent of the Pennsylvania Emergency Management Council. Prudent use of our resources now can help to prevent, or at least delay, the need for emergency measures later.

If you have any questions, or we can be of assistance to you in any way, please feel free to contact our Planning and Conservation Division by e-mail at droughtinfo@pa.gov or by telephone at 717.772.4048.

Sincerely,

A handwritten signature in black ink, appearing to read "D. Jostenski", written over a light gray circular stamp.

David B. Jostenski, P.E.
Commonwealth Drought Coordinator
