

W A N T E D ARMED AND IRRITATING!

Common Ragweed

(Alias: *Ambrosia artemisiifolia*)

Pollen from ragweed causes the countenance of hay fever in the innocent.

Description: 1-5 feet tall, fern-like leaves, dull flowers in long spikes, no mustache. Seen recently on newly-disturbed soils along roads, fields and abandoned lots.

If you see this "bad-weed" growing, do approach and pull from the ground! Nab it before pollen season in August.

REWARD: Ea\$y Breathing

Contact Don Torsello at 717-772-3959 if you need help in catching ragweed!
