

Climate Change Adaptation  
Infrastructure Working Group  
Agenda – July 12, 2010

**Attendance/Introductions**

**Goals and process**

- 1) End goal—an adaptation plan that includes:
  - a. summary of initially defined vulnerabilities and risks with a process to permit/encourage a dynamic list
  - b. Identification of strategies to address vulnerabilities and risks that includes practical strategies and/or a data/research needs list
  - c. Prioritize list of strategies
  - d. Recommend both short term and long term plan to adapt beyond immediate priorities
- 2) Process
  - a. vulnerabilities
  - b. risks
  - c. implementation strategies and data gaps
  - d. prioritization (short term) and long term plan
- 3) Meeting goals
  - a. *May meeting*: brainstorm session to ID vulnerabilities and risks
  - b. *July 12 meeting*: Review work of May meeting, identify practical adaptation strategies and data currently available and data gaps to address each defined risk area
  - c. *September 13 meeting*: review work of July meeting, prioritize adaptation strategies
  - d. *November 8 meeting*: draft report presented to work group, accept edits/revisions
  - e. *December deadline*: report submitted to DEP and Climate Change Advisory Committee

**Review and adopt May Meeting Summary**

**July Meeting –**

ID implementation strategies and data gaps for each area of vulnerability/risk

- 1) Sector Specific
  - a. Energy
  - b. Transportation
  - c. Water
- 2) Cross sector
