#### RAUSCH CREEK POWERSPORTS SUBSIDENCES 2 ABANDONED MINE RECLAMATION PROJECT CONTRACT NO. OSM 54(0435)104.1 EMER

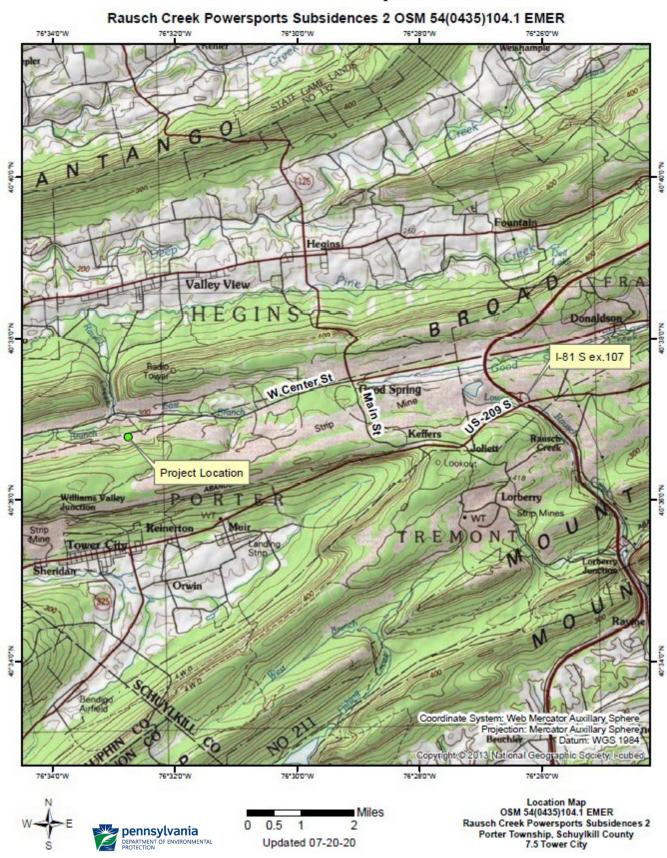

#### FACT SHEET

<u>Location:</u>	The project is located just off Gap Street in Porter Township, Schuylkill County. The site can be accessed from I-81S by taking exit 107 toward Tremont. Turn right onto US-209 S (1 mi.). Turn right onto Main Street (2.2 mi.). Turn left onto West Center Street (0.8 mi.) and continue onto Gap St.
Watershed:	Rausch Creek
Official Start Date:	June 18, 2020
<b><u>Contract Completion Date:</u></b>	July 7, 2020
<u>Contractor:</u>	Earthmovers Unlimited, Inc., P.O. Box 187, Kylertown, PA 16847
<b>Property Owner:</b>	Rausch Creek Land, LP
Project Cost:	\$42,424.00 (Final Amount) \$28,739.00 (Bid Amount)
Project Area:	11.8 Acres
<u>Purpose:</u>	To eliminate a health and safety hazard on abandoned mine land and in close proximity to a high foot traffic area.
<u>Description:</u>	On May 20, 2020, Rausch Creek Land, LP, notified the Department of an underground mine subsidence discovered in proximity to heavily trafficked ATV trails located within the Rausch Creek Powersports trail riding park and campground. The subsidence over the steeply pitched Skidmore Vein created the new Priority 1 vertical opening hazard (AML Feature 0435-18 VO). The opening, forty (40) feet in diameter, forty (40) feet deep, and approximately fifty (50) feet from an ATV trail, created a dangerous condition for campers and ATV riders who frequent the riding park and campground year-round. To prevent further subsidence, 1,859 cubic yards of on-site mine refuse material was used to backfill the subsided area and create a six (6)-foot mound atop the feature. Upon completion of the project, the borrow and backfill area (0.8 acres total) was seeded for revegetation.
<u>Funding:</u>	The project was funded by the Abandoned Mine Land Program, which is subsidized by the coal industry via fees paid on each ton of coal mined.

#### **Project Management**

Bureau of Abandoned Mine Reclamation Wilkes-Barre District Office 570.826.2371

## Location Map

#### **Pre-Construction**

AMLF 0435-18 (VO): Looking Southeast at the vertical opening and subsidence with underground mine workings visible, depth to mining is approximately 189 feet.

AMLF 0435-18 (VO): Looking East, this vertical opening is 40 feet in diameter at the surface, 10 feet in diameter at the bottom, and 40 feet deep.

# During Construction

Backfill of subsidence in progress: looking Northwest. Excavator is removing mine refuse from designated borrow area.

Looking Northeast, contractors utilize the ATV trail as a haul road to remove backfill from borrow area.

# Post-Construction

Looking North, vertical opening feature is reclaimed, filled completely with mine refuse, and a six (6)-foot mound placed atop the feature. Project area seeded for revegetation.
