

TABLE OF CONTENTS

Five-year Report

The Effects of Subsidence Resulting from Underground Bituminous
Coal Mining on Surface Structures and Features and Water Resources

I.	Purpose and Scope	I-1
	Purpose	I-1
	Scope	I-2
II.	Summary and Conclusions	II-1
	Introduction	II-1
	Conclusions	II-2
	Summary of Observations	II-3
III.	Legislative and Regulatory History	III-1
	Legislative History of BMSLCA	III-1
	Regulatory History and Development	III-4
IV.	Framework for the Report	IV-1
	Regulatory Setting	IV-1
	Report Period	IV-2
V.	Study Area	V-1
	Areas of Active Mining	V-1
	Counties with Active Mines	V-2
	Locations of Mines in Relation to Infrastructure and Other Features	V-2
VI.	Underground Coal Mining in the Bituminous Coalfields	VI-1
	Background	VI-1
	Room-and-pillar Mining	VI-2
	History	VI-3
	Longwall Mining	VI-3
	Early History (1875 - 1950)	VI-6
	Modern Longwall Mining	VI-6
VII.	Geology and Hydrology of the Bituminous Coalfields	VII-1
	Introduction	VII-1
	Stratigraphy	VII-2
	Pottsville Group	VII-2
	Allegheny Group	VII-2
	Conemaugh Group	VII-4
	Monongahela Group	VII-4
	Dunkard Group	VII-4
	Structure	VII-5
	Physiographic Provinces and Climate	VII-5
	Groundwater Hydrology	VII-6
	Groundwater Quality	VII-9
	Groundwater Availability	VII-9

VIII.	Potential Impacts from Underground Mining	VIII-1
	Mine Subsidence - An Overview	VIII-1
	Subsidence above Longwall Panels	VIII-2
	Overburden Movement	VIII-3
	Final Subsidence Profile	VIII-4
	Dynamic Subsidence	VIII-6
	Potential Impacts of Longwall Subsidence on Surface Land and Structures ...	VIII-7
	Potential Impacts on Surface Lands	VIII-7
	Potential Impacts on Structures	VIII-8
	Potential Hydrologic Impacts of Underground Mining	VIII-9
	Potential Impacts on Streams and Surface Waters	VIII-10
	Room-and-pillar Mining	VIII-10
	Room-and-pillar with retreat and Longwall Mining	VIII-12
	Potential Impacts on Wells and Springs	VIII-13
	Room-and-Pillar Mining	VIII-13
	Longwall and Room-and-Pillar with Retreat	VIII-13
	Other Causes of Impacts on Structures and Water Supplies	VIII-16
IX.	Sources of Information and Data Collection for Evaluating Impacts	IX-1
	Introduction	IX-1
	Six-month Mine Maps and Notification Letters	IX-1
	Permit Applications	IX-2
	Six-month Mine Map Database	IX-2
	Claims Database	IX-3
	Survey of Mine Operators	IX-4
	Response of Mine Operators	IX-4
	Survey of Property Owners	IX-5
	Response of Property Owners	IX-7
	Survey of Public Facility Operators	IX-9
	Response of Public Facility Providers	IX-10
	Survey of Gas Pipeline Operators	IX-10
	Response of Gas Pipeline Operators	IX-11
	Mine Subsidence Insurance Database	IX-11
	Observations of Surface Subsidence Agents	IX-11
	Federal Office of Surface Mining Records	IX-11
	Other Reports	IX-12
X.	Impacts on Water Supplies in the Study Area	X-1
	Water Supplies near Active Mining	X-1
	Number of Water Supply Impacts Reported	X-1
	Types of Water Supply Impacts	X-2
	Relation between Type of Mining and Water Supply Impacts	X-2
	Impacts Versus Distances from Mining	X-3
	Status of Reported Cases Involving Water Supply Impacts	X-3
	Property Owners' Comments Regarding Claim Resolution	X-6
	Availability of Premining Survey Data	X-6
	Observations of Surface Subsidence Agents	X-6
XI.	Impacts on Structures in the Study Area	XI-1
	Introduction	XI-1
	Properties with Structures Impacted by Mining	XI-1
	Relationship between Type of Mining and Structure Damage	XI-2
	Reports of Irreparable Damage	XI-2
	Resolution of Structure Damage Claims	XI-3
	Premining Surveys	XI-6
	Types of Structures Impacted by Mining	XI-6
	Observations of Surface Subsidence Agents	XI-7
	Study of Structures Considered Likely to Subside	XI-7

XII.	Impacts on Major Pipelines, Roads and Public Facilities	XII-1
	Impacts on Natural Gas Pipelines	XII-1
	Impacts on Infrastructure of Public Service Providers	XII-3
	Description of Damage	XII-4
XIII.	Impacts on Surface Land in the Study Area	XIII-1
	Surface Areas that were Undermined	XIII-1
	Number of Land Damage Claims Reported	XIII-1
	Resolution of Land Damage	XIII-2
	Observations of Surface Subsidence Agents	XIII-2
XIV.	Impacts on Streams in the Study Area	XIV-1
	Streams Located Above or Near Underground Mines	XIV-1
	Reported Impacts on Streams	XIV-1
	Observations of Surface Subsidence Agents	XIV-2
	Repair of Affected Stream Segments	XIV-2

LIST OF FIGURES

Figure IV.1	Data Sources and Periods of Applicability	IV-3
Figure V.1	Permit Area vs. Actual Mining Area	V-1
Figure VI.1	Bituminous Coal Production, 1977-1997	VI-1
Figure VI.2	Schematic Illustrating Room-and-pillar Mining	VI-2
Figure VI.3	Schematic Illustrating Longwall Mining	VI-4
Figure VII.1	Generalized Paleogeographic Map of the Pennsylvanian Depositional Basin and Source Areas	VII-1
Figure VII.2	Generalized Stratigraphic Section of the Bituminous Coalfield of Western Pennsylvania Showing Stratigraphic Names and Positions of Principal Coals	VII-3
Figure VII.3	Physiographic Provinces of Pennsylvania (PA-DCNR MAP 13)	VII-6
Figure VII.4	Sketch Illustrating Various Characteristics of the Composite Fresh-Water Groundwater Flow System	VII-7
Figure VII.5	Idealized Perched Water Conditions	VII-8
Figure VIII.1	Sinkhole Subsidence Feature above an Underground Mine Entry	VIII-1
Figure VIII.2	Overburden Movement above a Longwall Panel	VIII-3
Figure VIII.3	Cross-section of Subsidence Trough Showing Angle of Draw, Compression Zone, Tension Zone, and Inflection Points	VIII-4
Figure VIII.4	Critical, Supercritical, and Subcritical Widths	VIII-6
Figure VIII.5	Development of Dynamic Subsidence Profiles as the Face Advances ...	VIII-7

LIST OF TABLES

Table VI.1	Pennsylvania's Modern Longwall Mines	VI-5
Table VII.1	Allegheny Group Coal Seams that have been Mined within the Last Five Years	VII-4
Table VII.2	Geologic Units and Water-bearing Characteristics for Greene and Washington Counties	VII-10
Table VII.3	Well Yields in Somerset County by Geologic Unit and Topographic Position	VII-11
Table IX.1	Property Owners' Questionnaires: Distribution, Delivery and Responses	IX-8
Table IX.2	Nature of Property Owner Survey Responses	IX-9
Table X.1	Types of Impacts on Water Supplies	X-2
Table X.2	Type of Mining vs. Water Supply Impacts	X-3
Table X.3	Distances Between Mining and Reported Impacts	X-3
Table X.4	Status of Reported Claims at the Close of Study Period	X-4
Table XI.1	Properties with Reported Structure Damage	XI-1
Table XI.2	Type of Mining vs. Properties with Structure Damage	XI-2
Table XI.3	Resolution of Structure Damage Claims by Method	XI-4
Table XI.4	Primary Structures Damaged by Mine Subsidence	XI-6
Table XI.5	Appurtenant Structures Damaged by Mine Subsidence	XI-7
Table XI.6	Reported Impacts on Properties with Structures Considered Likely to Subside	XI-8
Table XII.1	Summary of Impacts - Transmission Pipelines	XII-2
Table XII.2	Summary of Impacts - Local Distribution Pipelines	XII-2
Table XII.3	Summary of Responses	XII-4
Table XIII.1	Land Damage Claims by Type and Mining Method	XIII-2
Table XIV.1	Reported Impacts on Streams	XIV-1
Table XIV.2	Stream Incidents versus Mining Method	XIV-2

APPENDICES

Appendix A:	Act 54: Amendments to the Bituminous Mine Subsidence Land Conservation Act	
Appendix B:	Regulations for Mine Subsidence Control, Subsidence Damage Repair and Water Supply Replacement	
Appendix C:	Supporting Information	
Table C.1	Underground Mines Active during the Study Period	C-1
Figure C.1	Description of Six-month Mine Map Database	C-3
Figure C.2	Description of Claims Database	C-5
Figure C.3	Claim Report Forms	C-8
Figure C.4	Survey Letters to Mine Operators	C-13
Figure C.5	Property Owners' Questionnaire	C-18
Figure C.6	Example of Advertisement for Property Owners	C-21
Figure C.7	News Release on Survey	C-22
Figure C.8	Questionnaire on Impacts to Infrastructure	C-24
Figure C.9	Questionnaire on Mining-Related Impacts to Natural Gas Pipelines	C-26
Appendix D:	Plates	
Plate 1	Five-year Report Study Area	
Plate 2	Area of Study Showing Mine Locations	
Plate 3	Area of Study Showing Mine Locations, Urban, and Suburban Areas	
Plate 4	Area of Study Showing Mine Locations and Highways	
Plate 5	Area of Study Showing Mine Locations and Major Railroads	
Plate 6	Area of Study Showing Mine Locations, County and State Parks	
Plate 7	Area of Study Showing Mine Locations and Public Water Supplies	
Plate 8	Area of Study Showing Mine Locations and Natural Gas Transmission Lines	
Plate 9	Area of Study Showing Mine Locations and Major Rivers and Streams
