

## Application Modernization Plan

- Enable truly modular permit applications by including parts only when required/indicated
- Create consistency across permit application types, standardization of information across all application types, ease of updating
- Update forms to ease transition to electronic permitting platform
- Three phases beginning with Bituminous SMP application

### 1. Bituminous Surface Mining Permit

- Match the process developed for Greenport e-permitting
- Rolling out module replacements gradually
- Ready to launch with new format

### 2. Anthracite Surface Mining Permit (and large noncoal)

- Will follow Bituminous format

### 3. Bituminous Underground, CRDA, Prep Plant

- Parts to be replaced with standard information sections, as applicable
- Unique parts to be updated
