Contact Information Help

Please enter the information for the primary contact person for this project. The accuracy of this information is extremely important as all communication and correspondence regarding the review of this project will be sent to this person. Additional contacts can be added here and will receive responses from the PA SHPO, however, only one contact is designated as the primary.

Project Overview Help

Provide a detailed description of the proposed project that is no longer than 1000 characters. Include a description of past and present conditions of the project area, including land use and previous ground disturbance. More detailed descriptive information, such as relevant portions of project applications or environmental statements, can be uploaded as attachments (Under Attachments) at the end of the application.

If this is supplemental documentation on a project not previously entered in PA-SHARE, in the Project Description include the ER Number found on previous correspondence and indicate if the project design has changed.

If your project will affect 10 or more above ground resources, it is necessary to obtain approval of the APE and methodology for survey prior to submitting resources in PA-SHARE; please specify using the checkbox and a PA SHPO survey proposal request will be sent to you.

ZOOM MAP TO PROJECT ADDRESS

The map interface includes a search bar at the top left with the text "Find address or place" and a magnifying glass icon. On the left side, there are four navigation buttons: a home icon, a plus sign for zooming in, a minus sign for zooming out, and a location pin icon. On the right side, there are five utility buttons: a full-screen icon, a funnel icon for layers, a stack of layers icon, a list icon, and a print icon. At the bottom left, there are two icons: a square with an 'X' and a globe. At the bottom right, there are two icons: a refresh icon and a pencil icon. The map shows a road labeled "Centennial Dr" and a water body labeled "Paint Creek". The map data is attributed to "West Virginia GIS, Esri, HERE, Garmin, INCREMENT P, Intermap, USGS, METI/NASA, EPA, USDA" and is "Powered by Esri".

Municipalities: 0

Project Location Help

The Area of Potential Effects (APE) consists of the geographic area or areas within which a project may directly or indirectly cause changes in the character or use of historic properties. The APE should include the project's physical boundaries as well as potential visual, vibrational, and/or audible effects to above ground resources. The Limit of Disturbance (LOD) is the area of total earth disturbance for the project. This includes all ancillary facilities such as access roads, utilities, material borrow areas, and staging areas.

You can either draw the APE and LOD on the map or upload as a Shapefile. If the LOD field is required on your map, you can toggle between editing the APE and LOD by clicking the appropriate button. The LOD **must** be fully contained within the APE as it is a subset of the APE's geographic area. *If the LOD field is not present on the map widgets, your submission does not require an LOD.*

The APE for building rehabilitation should be drawn as the boundary of the current tax parcel unless there is the potential for a visual effect on surrounding properties.

Map Help

Using the two tools in the lower right-hand corner of the map, you can sketch the APE and/or LOD on the map OR upload a .zip archive of a Shapefile. **Click on one of the buttons below** to learn more about a particular tool: For more information about the map window and the controls within it, please review the [related Help topic](#).

Please note that the Upload Shapefile widget and the Feature Sketch widget are mutually exclusive. That is to say, **if you add a file with the Upload Shapefile Widget** 📁, **the Sketch Widget** ✎ **will become unavailable.**

More Help

For more information about the map window and the controls within it, please review the [related Help topic](#).

Project Resources Help

Please enter the location(s) of any resources that have the potential to be affected by the project. Please click the “Add Resource” button to add each resource within the APE. For each resource entered, you will be guided through the process of entering the location, descriptive information, photos, and other relevant information. For Previously Identified Resources, please provide current color photographs and update the relevant fields. For Above Ground Resources, enter those resources that are 45 years in age or older. For Archaeological Resources, please provide photographs of location of site showing existing conditions. If there are 10 or more above ground resources in your APE that have the potential to be affected by the project, contact the SHPO reviewer and request to submit a survey proposal.

Project Documents Help

Attach the following as well as any other documents that would be useful to review of the project. Our preference is that you submit these documents as a single PDF. Our preference is that you submit these documents as a single pdf.

- Photographs of the project location and surrounding area. Photo pages should be uploaded as an attachment
- Photograph location map
- Architectural or engineering plans
- Specifications for proposed work, including methods and materials, if available
- If demolition is proposed, a structural assessment of condition
- The views of the public, Tribes, and other consulting parties (local government, historical societies, affected property owners, etc.), if available
- Survey reports or resource documentation, if available
- Alternatives
- GIS shapefiles compiled in .zip format

Photographs of the project area can either be added as photo(s) or as an attachment (PDF of a photo pages).
