Conventional well – A bore hole drilled or being drilled for the purpose of or to be used for the production of oil or gas from a conventional formation.

[*Marcellus Shale well*—A well that when drilled or altered produces gas or is anticipated to produce gas from the Marcellus Shale geologic formation.]

Nonvertical unconventional well—

- (i) An **unconventional** well drilled intentionally to deviate from a vertical axis.

- (ii) The term includes wells drilled diagonally and wells that have horizontal bore holes.

Vertical unconventional well—An unconventional well with a single vertical well bore.
