

Regulatory Citation(s):

78.72. Use of safety devices – blow-out prevention equipment.

(h) When a blowout preventer is installed or required under subsection (a), there shall be present on the well site an individual with a current certification from a well control course accredited by the International Association of Drilling Contractors (IADC) or other organization approved by the Department.

Question:

What organizations/companies provide the necessary IADC accredited well control course?

Response:

The link below provides all the information currently available on this matter. US schools can be accessed by selecting the below link.
