[REDACTED]

Re: Act 223, Section 208 Determination
Complaint No. 267033
Elk Township, Clarion County

Dear [REDACTED]

The Department has investigated your October 11, 2009, complaint that the diminution of your water supply was caused by gas well drilling activities at the EQT Production Company, [REDACTED] gas well [REDACTED].

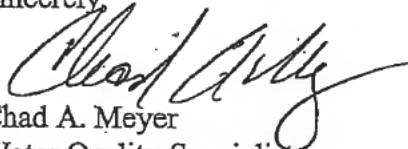

On October 15, 2009, I sampled your water supply, which was analyzed by our laboratory in Harrisburg. I have enclosed copies of the analysis reports for your samples. Also enclosed is a fact sheet explaining maximum contaminant levels and interpretations of sample results.

As a result of our investigation, the Department has determined that the drilling, alteration, or operation activities at the above referenced oil or gas well had diminished your water supply.

My attempts to contact you regarding the current status of your water supply have been unsuccessful. If you are continuing to experience problems that you believe are related to the drilling, alteration, or operation of the subject gas well, please contact me at the above listed number. If you do not contact me by January 29, 2010, I will assume that your diminished water supply has returned to predrill conditions, and this investigation will be closed.

Of course, please feel free to contact me anytime if you have questions or need additional information.

Sincerely,

Chad A. Meyer
Water Quality Specialist
Oil and Gas Management
