

Applicant: Transcontinental Gas Pipe Line Company, LLC (Transco)

Project Name: Atlantic Sunrise Project (Project)

Date: July 2017

Impact Number	Description of Impact (Fill, road/utility crossing, grading)	Resource Type (stream, wetland, floodway, body of water)	Resource Name	Chapter 93 Classification, Wetland Classification(EV or Other), or Floodway Type ¹	Wetland (Cowardin Classification) ²	Stream Type (Intermittent, Perennial)	Stream Trout Status (Class A Wild Trout, Wild Trout, Trout Stocked)	Resource ID
1	Utility Pipeline Crossing	Stream	Marsh Run (WW-T02-15016)	CWF, MF	R3	Perennial	Wild Trout Waters	WW-T02-15016
2	Utility Pipeline Crossing	Stream	Marsh Run (WW-T02-15016)	CWF, MF	R3	Perennial	Wild Trout Waters	WW-T02-15016
3	Utility Pipeline Crossing	Floodway	Floodway to Marsh Run (WW-T02-15016)	FEMA Detailed	N/A	N/A	N/A	Floodway to WW-T02-15016
4	Utility Pipeline Crossing	Floodway	Floodway to Marsh Run (WW-T02-15016)	FEMA Detailed	N/A	N/A	N/A	Floodway to WW-T02-15016
5	Utility Pipeline Crossing	Wetland	W-T02-15017	EV	PEM	N/A	N/A	W-T02-15017

¹ CWF = Cold Water Fishery; MF = Migratory Fishes; EV = Exceptional Value

² PFO = Palustrine Forested; PSS = Palustrine Scrub-Shrub; PEM = Palustrine Emergent; R3 = Perennial Stream; R4 = Intermittent Stream; R6 = Ephemeral Stream

³ Widths are reported as the maximum width for the feature. Stream lengths are reported on the impact maps as the sum of the permanent and temporary lengths.

⁴ Multiple streams are included in these calculations as the floodways overlap.

⁵ Temporary impacts to PFO wetlands include temporal conversion from forested to scrub-shrub or emergent wetland. Within this wetland, a 30-foot-wide corridor centered over the pipeline will be permanently converted from forested to scrub-shrub or emergent wetland; the remainder of the wetland will be allowed to fully revert back to PFO.

⁶ Temporary impacts to PFO wetlands include temporal conversion from forested to scrub-shrub or emergent wetland. All impacts to this wetland are within the temporary construction ROW; therefore, the wetland will be allowed to fully revert back to PFO.

⁷ This feature will be crossed using an HDD within the LOD shown on the drawing. However, the impacts shown are for the contingency, or secondary, crossing method, since those impacts are larger. The drawing showing the LOD and resource impacts for the contingency crossing method is provided in Attachment H-3.

⁸ The temporary floodway impact represents the full extent of the floodway across the existing access road. Project activities within the floodway will be limited to placement of timber matting over the existing gravel road surface, as well as vehicle traffic along the existing access road. No permanent fill will be placed or grading completed within the floodway.

⁹ The temporary floodway impact represents the full extent of the floodway across the existing access road. Project activities within the floodway will be limited to placement of compost filter sock and soil amendments, as well as vehicle traffic along the existing access road. There will be no permanent changes in existing grade within the floodway.

¹⁰ The temporary floodway impact represents the full extent of the floodway across the existing access road. Project activities within the floodway will be limited to vehicle traffic over the existing culvert. No permanent fill will be placed or grading completed within the floodway.

¹¹ The temporary floodway impact represents the full extent of the floodway across the existing access road. Project activities within the floodway will be limited to vehicle traffic over the existing bridge. No permanent fill will be placed or grading completed within the floodway.
