Subject: RE: Sunoco PPP Act 167 consistency letter request for additional information

Megan,

We received the E&S Control Report and Stormwater Management Report yesterday and had a chance to review the information. Before the Township issues any letters, I would like to request the Stormwater Management Calculations to show that the plan, for the change of coverage from woods to meadow, is consistent with Caernarvon Township's Ordinance 229 (Act 167), Article 3, Section 302-A. These calculations should ensure that post development conditions must be equal to or better than predevelopment conditions.

Thanks,
Beckie Smith, EIT

Hi Beckie,
We are currently applying for an ESCGP-2 through PADEP. Berks County Conservation District is also reviewing the permit and providing their feedback to DEP.

The ESCGP-2 application is rather significant in size (5000+ pages). Due to its size, can we provide you the permit application via CD? Berks County Conservation District does have a hard copy of the document.

Megan

Megan,

I would like to request storm water calculations for the change of coverage from woods to meadow. Also, if there is anything that has been submitted to the Berks County Conservation District/DEP, for your NPDES Permit, that you have not shared with us, please send that information to me.

Thanks,
Beckie Smith, EIT

Dear Ms. Smith:

Per your request, attached are the Erosion and Sediment Control and Site Restoration Plans for the Pennsylvania Pipeline Project within Caernarvon Township. The project limits of disturbance will be restored to meadow within the township which is consistent with the requirements of the Schuylkill River Watershed Act 167 Plan (June 2007) and the Conestoga River Watershed Act 167 Plan (September, 2005). There are no permanent stormwater BMPs or impervious areas proposed within Caernarvon Township.

Should you have questions regarding this correspondence, please do not hesitate to contact me at 412-921-8963 or via e-mail at megan.carson@tetrattech.com.

Sincerely,
Megan Carson
