Cambria	2.16	HDD area shaded to identify as part of partial termination
	2.33	HDD area shaded to identify as part of partial termination
	2.34	HDD area shaded to identify as part of partial termination, CCD did not concur with permanent stabilization - Area moved to renewal
	2.61	HDD area shaded to identify as part of partial termination
	2.62	HDD area shaded to identify as part of partial termination
	2.73	HDD area shaded to identify as part of partial termination
	2.74	HDD area shaded to identify as part of partial termination

Notes for 2022 submission:

1. Gray shading was added to areas requesting termination per public comment.
2. A Red comment block was added to each E&S plan sheet stating that drawing and text elements in red represent approved changes made since original permit authorization on February 12,2017.
3. Extended partial termination shading was provided over all completed HDDs even if LOD was not shown over drill. Refer to the list above for more details.
4. For areas where CCD did not concur with permanent stabilization, they were moved to renewal. Refer to the list above for more details.
5. Updated communications and inspection reports were added to the submission package for the following counties:
 - 5.a. Washington, Westmoreland 1, Indiana, and Cambria
6. Tracking table for Indiana County was revised and indicated in red on the table.
