

RE: Sunoco Pipeline L.P.'s Mariner East 2 Environmental Permit Applications

Domenic Rocco  
Program Manager  
Waterways and Wetlands Program  
PADEP Southeast Regional Office  
2 East Main Street  
Norristown, PA 19401

Dear Mr. Rocco,

I am writing to you regarding Sunoco Pipeline's Mariner East 2 Project and their Title 25, PA Code, Chapter 102 (Erosion & Sediment Control) and Chapter 105 (Water Obstructions & Encroachment) permit applications.

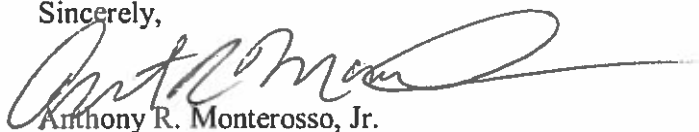

I would simply like to state for the record that Sunoco Pipeline representatives have been in touch with me since 2013 for this project. They described how it would impact my property, and over the course of the past three years have shared information on construction methods, environmental protection practices, and pipeline safety.

The company encouraged me to attend the Open House session they held in my county, where I was given the opportunity to directly question the Project Manager and senior project officials representing Right-of-Way, Environmental, Safety, and Construction.

During negotiations, I found Sunoco to be respectful, fair and responsive to my concerns. Having dealt with Sunoco for nearly 3 years on Mariner East 2, I can attest to the company's commitment to transparency to ensuring that landowners are informed during project development.

This letter does not require a response.

Sincerely,

Anthony R. Monterosso, Jr.
