Mr. Joe Kerber, Chairman
Sewickley Township Supervisors
2288 Mars Hill Road
Irwin, PA 15642

Subject: Sunoco Pipeline L.P. Pennsylvania Pipeline Project
Floodplain Management and Stormwater Management Consistency Review
Sewickley Township, Westmoreland County

Dear Joe:

We have reviewed the Erosion & Sedimentation Control (E&SC) Plan and Report prepared by Tetra Tech, Inc. for the above referenced site. The E&SC Plan and Report dated March 2016 are consistent with the Township's Stormwater Management Ordinance as well as the Township's Floodplain Management Ordinance and are of sound design and in accordance with current standard engineering practices.

The project proposes to construct a 20-inch diameter natural gas transmission pipeline across Sewickley Township continuing from the west of Sewickley Creek and crossing Sewickley Creek south of Cowansburg and following a northeasterly direction to the east of Herminie where it then continues beyond the Township limits. The project has an anticipated disturbed area of approximately 33 acres within Sewickley Township of which nearly all disturbed area will be restored to near original contours and vegetative ground cover. No long term adverse impacts to floodplains or to stormwater runoff are anticipated from this project if properly implemented as presented in the plans and report.

Our office reviews Stormwater Management and Land Disturbance Plan applications solely to determine compliance with the Sewickley Township Stormwater Management Ordinance as well as other relevant Township ordinances. Property and right-of-way owners are ultimately responsible for storm water leaving their site.

Please contact me at (724) 539-8562 should you have any questions.

Sincerely,

GIBSON-THOMAS ENGINEERING CO., INC.

Douglas P. Siler, P.E.
