

Bureau of Clean Water

2018 Integrated Water Quality Monitoring and Assessment Report

Agriculture Advisory Board
December 21, 2017
Gary Walters
Chief, Assessment Section
Water Quality Division

New Format

- For 2018 the Integrated Report narrative will be in a new format
 - This format will make the report more user friendly and accessible
- Will use the ESRI story map format
 - The Susquehanna River Story uses this format
 - www.dep.pa.gov/Susquehanna
- What follows will be an overview of the look and content

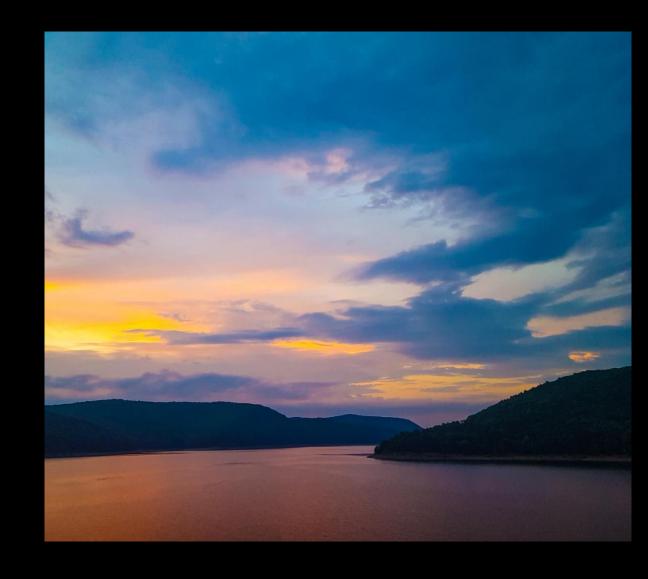

O PURPOSE

This report is the twenty-forth in a series of reports prepared for Clean Water Act (CWA) Section 303(d) listing, and Section 305(b) reporting.

The narrative that follows contains the data and results used to satisfy the requirements of Sections 303(d) and 305(b). This report covers the current status of Pennsylvania's waters and summarizes various programs in place to protect and improve water quality.

Although reporting for the Clean Water Act has a long history, this is the first time an Integrated Report has been created in the Story Map format. Story Maps offer the ability to convey tremendous amounts of information, but in way that is much easier to understand and interpret. DEP hopes that this format will greatly increase transparency and public understanding of the programs in place to protect our waters. Click here to discover more DEP story maps and mapping applications.

O LISTING DATA

Just like Pennsylvania's waters, the datasets used to create this report are extensive. DEP has many data collection protocols designed to measure water quality. From those data collection protocols, DEP builds various assessment methods designed for Use determinations. Click the links below to see these collection protocols and assessment methods.

DEP DATA COLLECTION PROTOCOLS

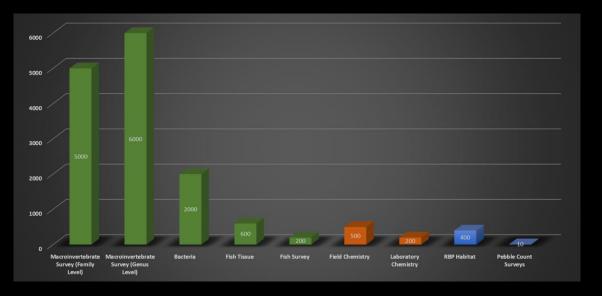

DEP USE ASSESSMENT METHODS

DEP readily accepts all outside datasets. By using a set of acceptance tiers, DEP ensures that all data are used according to their purpose and quality assurance. Click below to view DEP's data solicitation report.

O 303(d) LIST

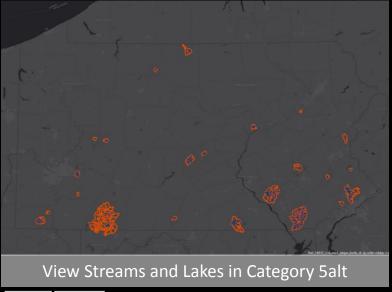

Section 303(d), also is the list of impaired waters that require the development of a TMDL (Category 5) or alternative restoration plan (Category 5alt).

Starting in 2016, DEP created an Integrated Report Viewer that allows users to view the status of waters under all categories. This has significantly increased the usability and transparency of this report. As in the past, users may also download the Integrated Report as a PDF.

Category 5alt is a list of priority waters across Pennsylvania where the implementation of restoration activities will begin immediately without needed a TMDL. The list of waters under category 5alt may also be downloaded as a PDF.

LAKES

As part of Section 305(b), Section 314 of the CWA requires states to report on the status of significant publicly owned lakes.

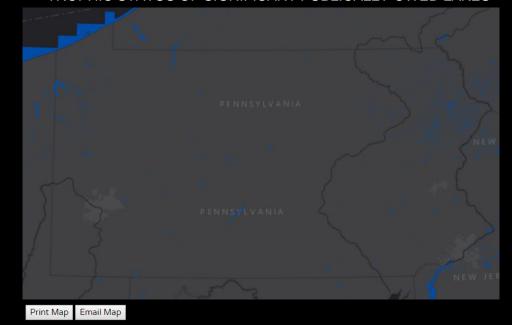

DEP employs both the WQN sampling method and the TSI sampling method to collect data. The TSI provides information on a lakes trophic status, which is required for Section 314 reporting. Click on the map to the right to see trophic status of Pennsylvania's significant publicly owned lakes.

Currently, most of these lakes have been assessment for all Uses. Sources and causes of lake impairments are available in tabular format.

ASSESSMENT STATUS OF SIGNIFICANT PUBLICALLY OWED LAKES

TROPHIC STATUS OF SIGNIFICANT PUBLICALLY OWED LAKES

CONTROL PROGRAMS

DEP has a series of programs in place to control sources of water quality impacts. Click on each program to see an overview of how the program protects water quality, how much the program invests in protecting water, and to visit that program's website.

NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM (NPDES)

MINING

OIL AND GAS

SAFE DRINKING WATER

RADIATION PROTECTION

WASTE MANAGEMENT

SEWAGE PLANNING

WETLANDS PROTECTION

NONPOINT SOURCE CONTROL

•

.

• RESTORATION PROGRAMS

.

DEP also has a series of programs in place to restore water quality. Primary funding sources come from the 319 grant (\$1,000,000 annually) and Pennsylvania's Growing Greener funds (\$3,000,000 annually). Click on each program to see an overview of how the program restores water quality and to visit that program's website.

RESTORATION ALTERNATIVES

SECTION 319 PROGRAM/GROWING GREENER

LAND RECYCLING REMEDIATION PROGRAM (ACT 2)

ABANDONED MINE RECLAMATION

Summary

- Format changes will make the process more transparent
- Gives the DEP the opportunity to highlight progress
- Document the numerous positive collaborations with other agencies, organizations and private citizens
- Provide information and data in useable and readily available format
