

Editor's note: A basin-wide migratory fishes (MF) designation was added to the Atlantic slope basin (drainage lists A--O and Z) as part of the Triennial Review of Water Quality Standards which was effective upon publication as a final rulemaking in the Pennsylvania Bulletin on May 16, 2009 (39 Pa.B. 2523). The MF designation applies to all waters within the respective basins unless there were specific exceptions previously noted for certain waterbodies or stream segments within one of these drainage lists. Drainage lists A--G are located within the Delaware River Basin. Drainage lists H--O are located within the Susquehanna River Basin. Drainage list Z is located within the Potomac River Basin. The MF designated use has been added to those waters which appear in Annex A to be consistent with the action in the Triennial Review final rulemaking at 39 Pa.B. 2523.
