

ANNEX A

TITLE 25. ENVIRONMENTAL PROTECTION
PART I. DEPARTMENT OF ENVIRONMENTAL PROTECTION
Subpart C. PROTECTION OF NATURAL RESOURCES
ARTICLE II. WATER RESOURCES

CHAPTER 93. WATER QUALITY STANDARDS

* * * * *

§ 93.1. Definitions.

* * * * *

Outstanding National, State, regional or local resource water—A surface water for which a National or State government agency has adopted water quality protective measures in a resource management plan, or regional or local governments have adopted coordinated water quality protective measures along a watershed corridor. **The term includes a surface water protected by one or more conservation easements held in perpetuity, where a governmental unit with taxation powers, a national government agency, or a state government agency is the holder, long-term steward, or responsible beneficiary related to repair and perpetual maintenance of the easement. Such easements must be situated along a watershed corridor, in a manner that provides protection to significant reaches of the corridor, and must provide for the maintenance and enhancement of water quality through water quality protective measures. A conservation easement will only be considered if a petitioner provides a recorded easement document that demonstrates compliance with this definition, and is a perpetual easement that cannot be revised, rescinded, or amended by any party.**

* * * * *

§ 93.7. Specific water quality criteria.

(a) Table 3 displays specific water quality criteria and associated critical uses. The criteria associated with the Statewide water uses listed in § 93.4, Table 2 apply to all surface waters, unless a specific exception is indicated in § § 93.9a—93.9z. These exceptions will be indicated on a stream-by-stream or segment-by-segment basis by the words “Add” or “Delete” followed by the appropriate symbols described elsewhere in this chapter. Other specific water quality criteria apply to surface waters as specified in § § 93.9a—93.9z. All applicable criteria shall be applied in accordance with this chapter, Chapter 96 (relating to water quality standards implementation) and other applicable State and Federal laws and regulations.

TABLE 3

Parameter	Symbol	Criteria	Critical Use*

Ammonia Nitrogen	Am	<p>[The maximum total ammonia nitrogen concentration (in mg/L) at all times shall be the numerical value given by: un-ionized ammonia nitrogen (NH₃-N) x (log⁻¹[pK_T-pH] + 1), where: un-ionized ammonia nitrogen = 0.12 x f(T)/f(pH)</p> $f(pH) = 1 + 10^{1.03(7.32-pH)}$ $f(T) = 1, T \geq 10^{\circ}C$ $f(T) = \frac{1 + 10^{(9.73-pH)}}{1 + 10^{(pK_T-pH)}}, T < 10^{\circ}C$ <p>and pK_T = 0.090 + $\left[\frac{2730}{(T+273.2)} \right]$, the dissociation constant for ammonia in water.</p> <p>The average total ammonia nitrogen concentration over any 30 consecutive days shall be less than or equal to the numerical value given by:</p> <p>un-ionized ammonia nitrogen (NH₃-N) X (log⁻¹[pK_T-pH] + 1), where: un-ionized ammonia nitrogen = 0.025 x f(T)/f(pH)</p> $f(pH) = 1, pH \geq 7.7$ $f(pH) = 10^{0.74(7.7-pH)}, pH < 7.7$ $f(T) = 1, T \geq 10^{\circ}C$ $f(T) = \frac{1 + 10^{(9.73-pH)}}{1 + 10^{(pK_T-pH)}}, T < 10^{\circ}C$ <p>The pH and temperature used to derive the appropriate ammonia criteria shall be determined by one of the following methods:</p> <ol style="list-style-type: none"> 1) Instream measurements, representative of median pH and temperature—July through September. 2) Estimates of median pH and temperature—July through September—based upon available data or values determined by the Department. For purposes of calculating effluent limitations based on this value the accepted design stream flow shall be the actual or estimated lowest 30-consecutive-day average flow that occurs once in 10 years.] <p><u>In freshwater, the concentration of total ammonia nitrogen (TAN) shall not exceed (more than once in three years on average), the concentration calculated (in milligrams of TAN per liter) by the following:</u></p> <p><u>1-hour average Criteria Maximum Concentration (CMC) acute criterion equation:</u></p>	CWF, WWF, TSF, MF

		$ \begin{aligned} \text{CMC} = \text{MIN} & \left(\left(\frac{0.275}{1 + 10^{7.204 - \text{pH}}} + \frac{39.0}{1 + 10^{\text{pH} - 7.204}} \right), \right. \\ & \left(0.7249 \times \left(\frac{0.0114}{1 + 10^{7.204 - \text{pH}}} + \frac{1.6181}{1 + 10^{\text{pH} - 7.204}} \right) \right. \\ & \left. \left. \times (23.12 \times 10^{0.036 \times (20 - T)}) \right) \right) \end{aligned} $ <p><u>30-day average Criteria Continuous Concentration (CCC) chronic criterion equation:</u></p> $ \begin{aligned} \text{CCC} = 0.8876 \times & \left(\frac{0.0278}{1 + 10^{7.688 - \text{pH}}} + \frac{1.1994}{1 + 10^{\text{pH} - 7.688}} \right) \\ & \times (2.126 \times 10^{0.028 \times (20 - \text{MAX}(T, 7))}) \end{aligned} $ <p><u>Chronic concentration is not to exceed 2.5 times the CCC as a 4-day average within 30 days (e.g. 2.5 X 1.9 mg TAN/L at pH 7 and 20°C or 4.8 mg TAN/L) more than once in 3 years on average.</u></p> <p><u>The pH and temperature used to derive the appropriate ammonia criteria shall be determined by instream measurements or best estimates, representative of the median pH and temperature of the receiving stream for the applicable time period and design conditions.</u></p>	
Bacteria	Bac ₁	<p>[(Fecal coliforms/ 100 ml)] (<u><i>Escherichia coli</i>/100 ml</u>) - During the swimming season (May 1 through September 30), the maximum [fecal coliform] <i>E. coli</i> level shall be a geometric mean of [200] <u>126</u> per 100 milliliters (ml) based on [a minimum of five] consecutive samples, each sample collected on different days during a 30-day period. No more than 10% of the total samples taken during a 30-day period may exceed [400] <u>410</u> per 100 ml.</p> <p>(<u>Fecal coliforms/ 100 ml</u>) For the remainder of the year, the maximum fecal coliform level shall be a geometric mean of 2,000 per 100 milliliters (ml) based on a minimum of five consecutive samples collected on different days during a 30-day period.</p>	WC
	[Bac ₂	(Coliforms/100 ml)—Maximum of 5,000/100 ml as a monthly average value, no more than this number in more than 20 of the samples collected during a month, nor more than 20,000/100 ml in more than 5% of the samples.	PWS]
Chloride	[Ch] Cl ₁	Maximum 250 [mg/l.] <u>mg/L</u>	PWS
	Cl ₂	<u>In freshwater, the concentration of chloride shall not exceed, more than once in 3 years on average, the concentration calculated (in milligrams per liter) by the following:</u>	<u>CWF,</u> <u>WWF,</u> <u>TSE,</u>

	<p><u>1-hour average Criteria Maximum Concentration (CMC) acute equation:</u></p> <p><u>CMC (mg/L) = 349(Hardness)^{0.2058}(Sulfate)^{-0.0745}</u></p> <p><u>4-day average Criteria Continuous Concentration (CCC) chronic equation:</u></p> <p><u>CCC (mg/L) = 113(Hardness)^{0.2058}(Sulfate)^{-0.0745}</u></p> <p><u>The hardness and sulfate values used to derive the appropriate chloride criteria shall be determined by instream measurements or best estimates, representative of the median hardness and sulfate concentrations of the receiving stream for the applicable time period and design conditions.</u></p>	<u>MF</u>

§ 93.8a. Toxic substances.

(b) Water quality criteria for toxic substances shall be established as described under Chapter 16 (relating to water quality toxics management strategy—statement of policy). The Department will develop water quality criteria for toxic substances not listed in Chapter 93, Table 5 in accordance with § 93.8d (relating to development of site-specific water quality criteria) and Chapter 16. **[Appendix A, Table 1A in Chapter 16 lists] The Department will maintain a table of** site-specific human health and aquatic life criteria that have been recently developed or adopted by the Department based on approved methodologies and the best scientific information currently available. The approved analytical procedures and detection limits for these substances will also be listed in Chapter 16 **for any analytical procedures or detection limits that are not EPA approved.** Chapter 16, along with changes made to it, is hereby specifically incorporated by reference.

(j) The requirements for discharges to and antidegradation requirements for the Great Lakes System are as follows:

(3) Statewide antidegradation requirements in this chapter and Chapter 96 (relating to water quality standards implementation) **[and in the Federal regulation in 40 CFR 131.32(a) (relating to Pennsylvania)]** as applicable, apply to all surface waters of the Great Lakes System.

§ 93.8c. Human health and aquatic life criteria for toxic substances.

(a) Table 5 (relating to water quality criteria for toxic substances) and [**Chapter 16, Appendix A, Table 1A (relating to site-specific water quality criteria for toxic substances)**] **the table of site-specific criteria maintained by the Department** list the aquatic life and human health criteria for toxic substances which the Department uses in development of effluent limitations in NPDES Permits and for other purposes. The human health criteria, which include probable modes of exposure (such as, but not limited to ingestion from drinking water and fish consumption, inhalation and dermal absorption), are further defined as to the specific effect (that is, cancer or threshold health effects). For those aquatic life criteria which are [**hardness related**] **a function of local water quality conditions** and **are** specified as a formula, such as several of the heavy metals, [**the Department will use the specific hardness of the receiving stream after mixing with the waste discharge in calculating criteria on a case-by-case basis**] **the hardness and pH values used to derive the appropriate water quality criteria shall be determined by instream measurements or best estimates, representative of the median concentrations or conditions of the receiving stream for the applicable time period and design conditions. The priority pollutants are a set of specific chemical pollutants regulated by EPA.** The priority pollutant numbers (PP NO) used by the EPA to identify priority pollutants are included in Table 5 for reference purposes. The toxics without a PP NO are nonpriority pollutants or State-derived criteria.

(b) Some of these criteria may be superseded for the Delaware Estuary, Ohio River Basin, Lake Erie Basin, and Genesee River Basin under interstate and international compact agreements with the Delaware River Basin Commission, Ohio River Valley Sanitation Commission and International Joint Commission, respectively. [**The criteria in Table 5 do not apply to the Great Lakes System.**] Water quality criteria for the Great Lakes System are contained in § 93.8e (relating to special criteria for the Great Lakes System) and Table 6 (relating to Great Lakes Aquatic Life and Human Health Criteria). **Criteria in Table 5 may apply to the Great Lakes System for those substances not listed in Table 6.** Criteria may be developed for the Great Lakes System for substances other than those listed in [**§ 93.8e**] **Tables 5 and 6,** under the methodologies in § 16.61 (relating to special provisions for the Great Lakes system).

Acronyms and Footnotes to Table 5

* Indicates dissolved metal criterion; others are total recoverable metals. Each listed dissolved criterion in Table 5 is equal to the corresponding total recoverable criterion before rounding (from the EPA National Ambient Water Quality Criteria Documents) multiplied by the conversion factor (from the Conversion Factors Table); a criterion that is expressed as a hardness (H)-based equation is shown in Table 5 as the conversion factor (listed) multiplied by the hardness criterion equation; an example criterion at hardness=100mg/L is included.

† Indicates criterion based on the exposure inputs of 2 liters per day of drinking water and consumption of 17.5 grams of fish per day, for protection of a 70 Kg person.

CAS—Chemical Abstract Service number

CRL—Cancer risk level at 1×10^{-6}

D – DEP developed criteria

E – EPA developed criteria

H—Threshold effect human health criterion; incorporates additional uncertainty factor for some Group C carcinogens.

ln [H]—Natural Logarithm of the Hardness of stream as mg/l CaCO₃

ug/L—Micrograms per liter

N/A—Criterion not developed

PP NO—Priority Pollutant Number

§ 93.8d. Development of site-specific water quality criteria.

(a) The Department will consider a request for site-specific criteria when one or more of the following apply:

(1) There exist site-specific biological or chemical conditions of receiving waters which differ from conditions upon which the water quality criteria were based.

(2) More stringent criteria are needed for a parameter listed in § 93.7 (relating to specific water quality criteria) to protect more sensitive, intervening uses.

(3) There exists a need for a site-specific criterion for a substance not listed in § 93.8c, Table 5 (relating to water quality criteria for toxic substances).

(b) The request for site-specific criteria must include the results of scientific studies for the purpose of:

(1) Defining the areal boundaries for application of the site-specific criteria which will include the potentially affected wastewater dischargers identified by the Department, through various means, including, but not limited to, the total maximum daily load (TMDL) process described in Chapter 96 (relating to water quality standards implementation) or biological assessments.

(2) Developing site-specific criteria which protect the surface water's existing and designated uses.

(c) Scientific studies shall be performed in accordance with the procedures and guidance in the Water Quality Standards Handbook (EPA 1994), as amended and updated, including: "Guidance on the Determination and

Use of Water-Effect Ratios for Metals” (February 1994); and the “Methodology for Deriving Ambient Water Quality Criteria for the Protection of Human Health” (2000). **The Department may require the use of the Biotic Ligand Model (BLM) for the development of new or updated site-specific criteria for copper in freshwater systems.** Other guidance approved by the Department, which is based on other EPA-approved or scientifically defensible methodologies, may be used.

* * * * *

(f) If the Department determines that site-specific criteria are appropriate in accordance with subsection (a), the Department will do the following:

* * * * *

(2) Maintain **a** publicly available [**lists**] **table** of site-specific criteria.

* * * * *

§ 93.8e. Special criteria for the Great Lakes System.

(a) *Special criteria.* The special provisions in this section apply for the Great Lakes System, which includes the streams, rivers, lakes and other bodies of surface water within the drainage basin of the Great Lakes in this Commonwealth.

(b) *Water quality criteria for the Great Lakes System.* Human health and aquatic life criteria for the Great Lakes System are contained in Table 6 (relating to Great Lakes aquatic life and human health criteria). For any pollutant not listed in the table, criteria **in Table 5 may be used** to protect existing and designated uses, **or criteria** will be developed by the Department, as needed, in accordance with this chapter and § 16.61 (relating to special provisions for the Great Lakes System).
