**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Stephanie Ulmer  
427 Elmer St.  
Pittsburgh, PA 15218

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Laura Chinofsky  
422 Wendy Rd  
Southampton, PA 18966

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Sharon Furlong  
133 E Bristol Rd  
Feasterville Trevose, PA 19053

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Carl Rider  
4120 W Lincoln Hwy  
Downington, PA 19335

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

Proximity of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the well being of our Commonwealth residents. This type of verboten pollution, contaminates our precious air, water and land causing grave harm to human health. Most egregiously those living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

We desperately need you to ensure that Pennsylvania institutes a statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
karen rudy

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

What is common sense? Caving to fossil fuel industries who make goo-gobs of profit while leaving geographical areas polluted, drinking wells contaminated, soil ruined, and removes forestland -- or establishing respectful, precautionary distances of fracking away from our homes, schools, hospitals, streams, and drinking water wells?

Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. **RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Rhea Brown  
4 Red Fox Drive

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Erin Reagan

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
John Holmes

**PERSONAL ADDITION**

As the sender of this form letter, I want to add my own thoughts as such:

1) There has been and will be fracking in PA, but while the debate of "whether or not there will be fracking" has gone on for decades, it has, unabated. The minimum We must do is enforce the highest safety protocols and shut down the business operations of out-of-compliance operators/owners/corporations.

2) If our natural gas resources weren't practically invisible as they are (being underground, transparent in gas form, and pipes off in contained methods that we don't clearly witness) We as PA citizens would be astounded at the amount of value that We have been robbed of. Literals Billions of dollars of unrenewable fuel has been extracted and taken away without our tax base being remunerated at any meaningful level. If it were our forests we would witness the denuding of hundreds of thousands of acres of resource for nary a penny of recompense. Make extraction companies pay for our fuel, better yet, keep it here and give PA residents a dramatically reduced rate of cost for this fuel to warm homes for generations untold into the future.

Sincerely,  
Jonathan Fantazier

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

Governor Josh Shapiro,

The closeness of fracking to PA homes, schools, hospitals, streams, and drinking water wells threatens the health of all Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human and animal health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

Therefore, I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Additionally,

Clean Air Council programs are supported by federal dollars which include actions such as putting up air quality monitors in communities and promoting public transit. We will not stand for this current Executive attack on the environment and the communities served. We need you to contact President Trump immediately and urge him to do all he can to reverse "The Federal Funding Freeze"! Help protect nonprofit funding now from this illegal Federal Funding Freeze.

Thank You Governor Shapiro

Minister Teri Gilmore

Sincerely,  
Teri Gilmore

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Sidne Baglini  
203 Channing Ave  
Malvern, PA 19355

- 750 feet from any surface water

Governor Shapiro, please refocus to protect the health of Pennsylvanians as you did when you were Attorney General. It is extremely concerning that your administration would not follow through on promises made as AG, and instead pivot and partner with a gas company with a history of environmental violations.

Respectfully,

Marilyn C. O'Connell

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Timothy Duncan  
569 Acorn St  
Philadelphia, PA 19128  
215-593-4232

April 01, 2025

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents, particularly children and elderly. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts, such as respiratory diseases and cancer, at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple but necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Lauren Otero

- 3,281 feet from any drinking water wells
- 750 feet from any surface water

I am living in an area where CNX is busy every day - I have seen beautiful farmland converted to ugly industrial sites, with increased truck traffic destroying our local roads that were never built for the steady stream of "Sand Box" trucks and water tankers, as we watch the local water reservoir get lower than any have ever seen, in the 70 + years since the Beaver Run Reservoir was constructed - a water supply built for the local residents. Please calculate the cost of producing this un-green source of energy, and you will see, it is not cost effective. We will pay a greater price. Please -Protect our Land - Protect our Water - Protect our Health!!

Sincerely,  
Betty Reefer

Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Lissa Barker

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

Dear Governor Shapiro,

This letter is coming to you for a problem I know you understand, but now fail to manage.

You know there are more clean energy jobs in PA than polluting energy jobs. You know fracking pollutes our air, contaminates our water and land, and harms human health.

People living near fracking experience negative health impacts at rates far greater than the general public. The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents, your constituents. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe.

Setbacks are a simple and necessary way to better protect PA residents from the harms of fracking. I urge you to ensure that our state institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,

Dr. Melanie Pallone

Sincerely,

Melanie Pallone

I live DIRECTLY across the street from the Marcus Hook Refinery Compressor Station in neighboring Linwood, PA 19061.

The CONSTANT pollution being expelled into our air is toxic for us all. It is NOT far enough away at all and is also directly across the street from Linwood Elementary School!!!

It is about time you put the citizens FIRST! Our children are slowly, daily breathing in these toxins!

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Paul Roden  
307 Daleview Dr

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Hope Punnett  
6635 Wissahickon Ave  
Philadelphia, PA 19119

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Robert DuPlessis  
413 S 24th St  
Philadelphia, PA 19146

- 750 feet from any surface water

My husband and I live 1/2 mile from a proposed well pad. We are desperately trying to fight it. Not that our fight matters. The same company, Olympus--check their safety record, will have a fracking well pad about a mile from us. The site 1/2 mile from us will have a compressor station built on it. I do not think our court battle will stop that.

We are half past our seventies. With this house made worthless by the frackers, where will we go? Would you give someone in their seventies a thirty year mortgage? We thought that if we were abstemious, our savings would keep us covered. With the housing market as it is, our savings won't be able to cover a down payment. We live in Allegheny County. It's too populated to frack anywhere in the County. The University of Pittsburgh research says that people within 10 miles of a fracking well pad will be adversely affected.

Please, we need at the very least the minimum setbacks proposed above. I would like to see those minimums at the very least doubled.

Sincerely,  
Yvonne Hutchinson

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Will Willis  
100 Academy Dr

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

As time goes on, we learn more of how the closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents.

Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

Please ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with at least the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Thank you very much.

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Marya Bradley  
11 Prices Ln

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Kathleen Reifke

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Julio Paz y Miño  
100 Lincoln Ave  
Havertown, PA 19083

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

A state funded study from 2023 concluding that children living near fracking wells and other infrastructure have a 5-7 times more likelihood of getting childhood lymphoma.

Fracking also poses a danger to water miles from a well due to the long distance of laterals which can extend miles upon miles from the well site.

This is shown by water contamination in West Deer Twp Park from a subsurface fracking lateral. There are people whose water is so contaminated that it's not just undrinkable but also can be set on fire. We must protect our communities from such disasters.

Living in this region I've seen fracking companies consistently break agreements with people building fracking wells too close to people's property, contaminating people's well water, lying to county and city officials, as well as property owners about the risks and benefits. For example, I've seen gas companies tell municipal officials that they will see much higher funds from fracking than they ever actually give out and landowners being told they will receive compensation that they never actually receive.

Studies have shown that babies born near fracking wells are on average born earlier and with lower birth weights than regular babies. A Canadian study found that babies living with 6.2 miles of fracking wells in Alberta had low birth weight and abnormal birth defects.

The waste from the fracking process is radioactive and includes high levels of heavy metals and PFAS. We still have yet to find a safe way to dispose of it. Many are stored in tanks on fracking pads, some of it is dumped in landfills which increases pollution, and harms people. Injecting it into injection wells often contaminated people's water even more than normal fracking drilling, and in many parts of Pennsylvania its spread on roads as a dust suppressant allowing people to track radioactive waste into their homes.

As a young person who will have to live with consequences both relating to pollution and the climate crisis from fracking we need to stop. Fracking should happen nowhere near places where people live, go to school, worship and play.

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Maria Bajzek  
2855 Fernwald Road  
Pittsburgh, PA 15217

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

For years I have studied and been alarmed by the adverse effect of fracking. If it were necessary, some allowance might be made. But renewable energy is available and affordable. Thus I strongly support taking strong action to prevent harm from fracking.

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Therese MacKenzie

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Patricia Harlow  
624 Erlen Rd  
Plymouth Meeting, PA 19462

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

First, I want you to know that there are active fracking wells within a MILE of both an elementary AND a middle school, here in the Fox Chapel School District. This is totally unacceptable!

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land. People living near fracking experience negative health effects at rates far greater than the general public. Existing siting restrictions for fracking are INADEQUATE to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
J Fried  
948 Harmony Hill Rd  
West Chester, PA 19380

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

Greetings Sam,

Fracking close to homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air, water and land, harming human health. Existing fracking restrictions are do not keep Pennsylvanians safe. Setbacks are a simple and necessary way to protect residents.

Please help ensure that Pennsylvania institutes no-drill zone requirements for new wells with the setbacks of:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Regards, David

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
Marilyn Grasso

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

This is the minimum protection that should be afforded to Pennsylvanians. You know the risks and harms of fracking from your time as Attorney General. These fossil fuel industries should actually be banned from our state and the country. They are responsible for global warming, pollution, illness and death. Our present and future require renewable energy and we demand it. Science and facts do not lie.

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. **RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,  
chris lewis  
6038 Hegeman St  
Philadelphia, PA 19135  
215-535-7025

April 01, 2025

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

PLEASE enact statewide setbacks of at least 3,281 feet from any buildings. This should be the bare minimum to protect our health, and I'm incredibly disappointed that you haven't followed through on environmental campaign promises.

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

**RE: Please institute common sense no-drill zones now**

Dear Governor Shapiro,

As a resident of Pennsylvania, I am very concerned about the impact of fracking on our health and the health of the environment. Industry has been able to act with limited concern on our wellbeing and they have been able to frack close to our homes, schools, hospitals, streams, and drinking water wells. All of this is a major threat to our health. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public and this is deeply concerning and unfair. Unfortunately, as things stand, siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. I write to urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

I hope you can take our health and environmental health into consideration, but ideally, please move away from fracking all together. We are living in a climate crisis and cannot afford emitting more methane in addition to the detrimental health effects of fracking gas.

Sincerely,  
Magdalena Sikora
