

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Barbara Susang-Talamo
4959 Simmons Cir, Export PA 15632

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Martha Evans
PO Box 39, Buena Vista PA 15018

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

2224 Forster St, Harrisburg PA 17103

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Tammy Krumbhaar
36 Meadow Creek Ln, Glenmoore PA 19343

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Morgan Craig
309 Arch St # # 13 604, Philadelphia PA 19106

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Jason Crawford

340 Coleman Dr, Monroeville PA 15146

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Christina Bush
3402 Route 130, Harrison City PA 15636

Dear Sam Robinson,

Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Cynthia Contie

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

William Ridgeway
842 N Sumner Ave, Scranton PA 18504

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Kellie Surmacz
122 Lorien Dr, Jeannette PA 15644
