

Editor's note: A basin-wide migratory fishes (MF) designation to drainage lists A through O and Z, is currently being considered as part of the Triennial Review of Water Quality Standards final rulemaking. This additional MF designation to the waters in drainage lists A through O and Z will become effective upon the final publication of the Triennial Review of Water Quality Standards in the Pennsylvania Bulletin. Publication of the Triennial Review of Water Quality Standards final rulemaking in the Pennsylvania Bulletin may be subsequent to the Board's consideration of this proposed regulation. When published, the MF designation will apply to all waters within the respective basins unless there are specific exceptions already noted for certain waterbodies or stream segments within one of these drainage lists. Drainage lists A through G are located within the Delaware River Basin. Drainage lists H through O are located within the Susquehanna River Basin. Drainage list Z is located within the Potomac River Basin. The MF designated use has been added to those waters which appear in the Annex of this proposed rulemaking to be consistent with the pending action in the Triennial Review final rulemaking.
