Subject: Betz Court ECP response

Good morning Josh,

Rapid response!!! They have gone over the documents. Please add this below note (this is a standard special provision on Individual permits) to the E&S plans to clearly call out what needs to be done if any contaminants are encountered during construction. Thanks.

- C. If the permittee becomes aware during earth disturbance activities that soils in the area of earth disturbance contain concentrations of regulated substances exceeding the residential medium-specific concentrations for soil in 25 Pa. Code Chapter 250, that were not previously disclosed to DEP/CCD, the permittee shall notify DEP/CCD in accordance with Part A III.D of this permit and cease earth disturbance activities in areas of known soil contamination until authorized to resume by DEP/CCD.
