Rachel,

Attached is a letter from HRG, in response to your request to Silver Spring Township for a determination of the Sunoco Pipeline Pennsylvania Mariner East 2 Pipeline project's consistency with stormwater and floodplain management requirements, programs, etc.

Please review the letter and incorporate it into your project and any permit submissions as needed. If you have any questions, feel free to contact me. Thank you.

Re: Sunoco Pipeline L.P., Pennsylvania Mariner East 2
Pipeline Project
Chapter 105 Water Obstruction and Encroachment
Permit
Floodplain and Stormwater Management Consistency
Request

Dear Mrs. Eberly:

On behalf of Silver Spring Township (the "Township"), HRG, Inc. has reviewed the details of the proposed Sunoco Pipeline Pennsylvania Mariner East 2 pipeline installation project with respect to those portions of the pipeline that will be installed within Silver Spring Township, Cumberland County, PA. HRG has also reviewed the information provided by Tetra Tech, Inc. in letters and document submissions to the Township dated November 10, 2015 and February 8, 2016. Provided that the proposed activity, construction and final project restoration is completed in accordance with state and federal stormwater and erosion and sedimentation control regulations and all proper state and federal permitting is received, HRG has determined that the project will be consistent with the Township's current stormwater ordinance and Act 167 Plan requirements in effect at the time of submission.

In regard to floodplain management, provided that the project is constructed and completed as described above, the proposed activity for the above referenced project shall also be consistent with any FEMA Floodplain Management Program effective in the Township.

If you have any specific comments or questions or require further information in this regard, please feel free to contact me. Thank you.

Sincerely,

Herbert, Rowland & Grubic, Inc.
