No contractors or permittee representatives were present; I did not enter the site and took all pictures and observations from 51st Street and the Bartram's Garden trail. Upon our arrival, we observed work being done by 2 workers at the far upslope corner (opposite 51st St). Mr. Carlson indicated soon after the inspection that this was slope soil matting and the addition of filter sock designed to capture heavy metals from influent stormwater. We noted the upslope portion of the site to be generally covered in straw mulch. The other filter sock along the perimeter of the site was observed to be in good condition. We noted that some erosion
