Dear Mr. Armstrong

Recognizing that there as been a proposal presented to remediate the toxic contamination of soil, groundwater, surface water, and a residential drinking water supply at and around the Bishop Tube Site in East Whiteland Township, Chester County, PA, the steps outlined are not sufficient to truly address the issue.

I advocate for a more comprehensive response which includes additional analysis / study of the extent of the contamination, removal of all contaminated material, acknowledgment that there are aspects of the PADEP proposal that are flawed or not based on sounds science, and that the PADEP truly listen to the community which has borne the burden of the impact of the contamination.

Sincerely,
Albert Wei
