Remarks: On site review was conducted on 11/21/17 with A. Bollinger, SMCI. There was no mining activity being conducted while onsite. Operator has not conducted any blasting onsite for several years, so no records are available for review. This inspection was conducted so as to determine if a revised blasting module is needed. It has been determined that because of the length of the upcoming project, there is no records/blast data to review, the older Mod 13 that is still in place, the Department feels being proactive and updating the Module 16 blasting plan should be performed prior to beginning blasting operations. Also prior to approving and/or blasting onsite a mine plan should be discussed and/or reviewed. No violations have been cited.
