NARRATIVE REPORT FORM

Facility Name: Glenwood Drive and Walker Road

Primary Facility ID: 881609 _____

Narrative (continued):

Observations:

- Raab Drilling arrived on site, who were there to collect the purged water from the newly installed potable well at [REDACTED] so that a second water sample could be collected to be analyzed.
- Stantec personnel were there to collect the samples.

- [REDACTED]:
- There was an absorbent sock that was installed in the well.
 - The sock was removed, placed into a bucket and estimated by GES to be 100% saturated.
 - The installation of the replacement sock would happen before the gauging team left the site.

- [REDACTED]:
- There was a LNAPL thickness measured of 0.10' with the interface probe.
 - The well was bailed and the water/LNAPL was poured into the graduated cylinder.
 - After the well was bailed, the depth to water and LNAPL was gauged. There was 0.03' of LNAPL remaining in the well.
 - GES estimated that there was approximately 310mL of LNAPL in the graduated cylinder.
 - A LNAPL sample was collected at 10:30.
 - The water/LNAPL was then poured into a dedicated metal bucket.

RW=2 (Glenwood Drive):

- The depth to water and LNAPL was measured with the skimmer in the well and after it was removed.
- After the skimmer was removed it was poured into the graduated cylinder, LNAPL was measured to be approximately 50mL.
- The contents were poured into a dedicated metal bucket, a LNAPL sample was collected at 10:47.
- The skimmer depth was readjusted to match the depth to water before it was reinstalled in the well.

RW-3 (Glenwood Drive):

- The depth to water and LNAPL was measured with the skimmer in the well and after it was removed.
- After the skimmer was removed it was poured into the graduated cylinder, LNAPL was measured to be approximately 10mL.
- The contents were poured into a dedicated metal bucket, a LNAPL sample was collected at 11:05.
- The skimmer depth was readjusted to match the depth to water before it was reinstalled in the well.

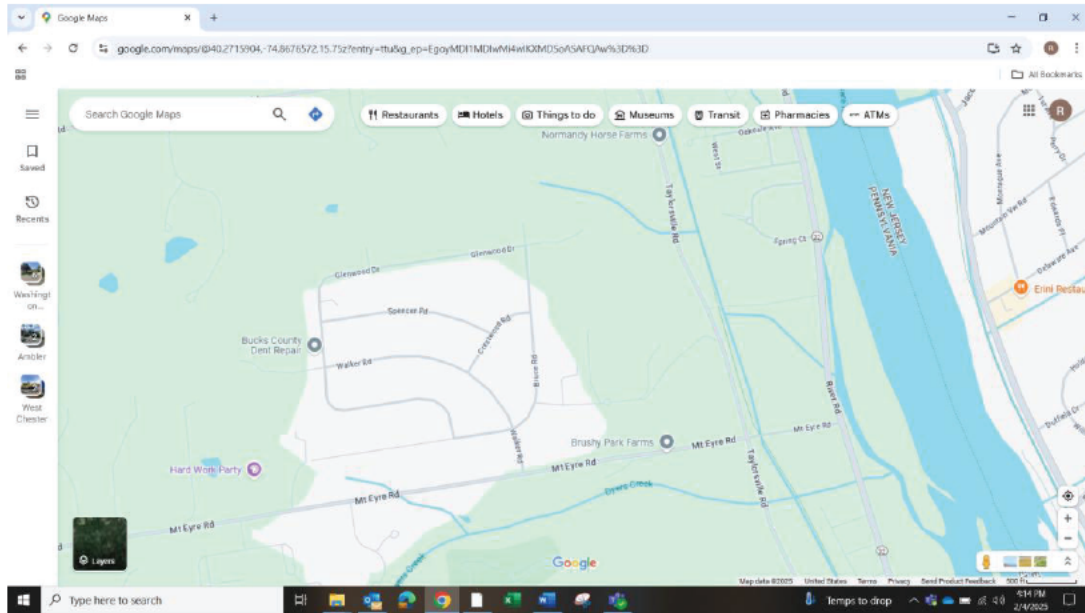

I departed the site at 11:15
