

Module 16: Large Noncoal Blast Plan

(Chapter 211/§§ 77.561/77.562/77.563/77.564)

- New
- Revised

Permittee Neiswonger Construction Inc
 Permit No. 63192001
 Mine Name Maggie Lynn Underground Mine
 County Washington
 Township Deemston Borough

Blasting Contractor _____

Blasting Contractor ATF Permit License No. _____

An application for proposed blasting shall contain a blasting plan for the proposed permit area, explaining how the applicant intends to comply with §§ 77.561-77.565 (relating to use of explosives) and including the following; drilling patterns, including size, number, depths and spacing of holes, charge and packing of holes, types of initiation and detonation controls, sequence and timing of firing holes, and scaled distance. Persons responsible for blasting operations at a blasting site shall be familiar with the blasting plan and site-specific performance standards (25 Pa. Code Chapter § 77.453).

A permit issued under the Noncoal Surface Mining and Conservation and Reclamation Act (52 P. S. §§ 3301-3326), and the regulations promulgated thereunder (25 Pa. Code Chapter 77), authorizing blasting activity shall act as a blasting activity permit issued under 25 Pa. Code Chapter 211. An application for a blasting activity permit shall be prepared by a blaster and shall include information needed by the Department to determine compliance with applicable laws and regulations and conditions necessary to ensure that the proposed blasting activity complies with the applicable statutes and 25 Pa. Code Chapter 211. (25 Pa. Code Chapter § 211.121, 25 Pa. Code Chapter § 211.124).

Sections 16.1 through 16.12 and Sections 16.14 through 16.17 must be submitted with the permit application. Section 16.13 (relating to public notice of blasting schedule) must be submitted prior to blast plan approval. There shall be no blasting until a blast plan has been approved by the Department.

There is a fee required under 25 PA Code Chapter § 77.106 for each blast plan application. Please refer to: <https://www.dep.pa.gov/Business/Land/Mining/BureauofDistrictMining/Pages/Fees.aspx> for the most current fee rates.

Is the fee being submitted with the application?

- Yes
- No

16.1a Blast Loading Plan 1 (§ 77.453)

| | Hole DIA. | MAX # HOLES | MAX # ROWS | BURDEN | | SPACING | | HOLE DEPTH | | STEMMING | |
|---|------------|-------------|------------|--------|------|---------|------|------------|------|----------|--------------------------|
| | | | | MIN. | MAX. | MIN. | MAX. | MIN. | MAX. | MIN. | TYPE |
| A | 6¾" | 200 | 10 | 10' | 25' | 10' | 25' | 10' | 85' | 9' | Competent Drill Cuttings |
| B | 6¾" | 200 | 10 | 9' | 20' | 9' | 20' | 9' | 85' | 8' | Competent Drill Cuttings |
| C | 5½" 5⅞" | 200 | 10 | 7' | 15' | 7' | 15' | 7' | 85' | 6' | Competent Drill Cuttings |
| D | 4½" 5" | 200 | 10 | 6' | 15' | 6' | 15' | 6' | 85' | 5½" | Competent Drill Cuttings |
| E | 3" 3½" | 200 | 10 | 5' | 14' | 5' | 14' | 4' | 50' | 3' | Competent Drill Cuttings |

Maximum explosives weight per delay (less than 8ms) 775 Minimum Scaled Distance 27
 Specific Type of Explosives Cast boosters, anfo, emulsion, stingers, AP Plus, Det. Cord, emulsion sticks, Pre split.
 Method of blast initiation Electric Non-Electric Other
 Explain Other Electronic Detonators

Comments:

| | |
|---|--|
| A | If blasting is to occur near or proceeds towards dwellings or structures discretion will be used to maintain a minimum scaled distance of 27 or more. The pounds per delay, hole diameters, number of holes per pattern, spacings, burdens, hole depths and amount of stemming will be adjusted and crushed stone stemming may be used to prevent fly-rock and maintain acceptable vibration and air blast levels. Stone production holes will not exceed 50' deep |
| B | |
| C | |
| D | |
| E | |

16.1b Blast Loading Plan 2 (§ 77.453)

| | Hole DIA. | MAX # HOLES | MAX # ROWS | BURDEN | | SPACING | | HOLE DEPTH | | STEMMING | |
|---|-------------|-------------|------------|--------|------|---------|------|------------|------|----------|--------------------------------|
| | | | | MIN. | MAX. | MIN. | MAX. | MIN. | MAX. | MIN. | TYPE |
| A | 1" 2.25" | 200 | NA | 2' | 4' | 2' | 6' | 5' | 18' | 2' | None, Clay dummies, Foam Plugs |
| B | | | | | | | | | | | |
| C | | | | | | | | | | | |
| D | | | | | | | | | | | |
| E | | | | | | | | | | | |

Maximum explosives weight per delay (less than 8ms) 775 Minimum Scaled Distance 27
 Specific Type of Explosives Cast boosters, anfo, emulsion, stingers, AP Plus, Det. Cord, emulsion sticks, Pre split.
 Method of blast initiation Electric Non-Electric Other
 Explain Other Electronic Electornic Detonators

Comments:

| | |
|---|--|
| A | Actual opening of the deep mine until officially underground blasting takes over Minimum SD of 27. |
| B | |
| C | |
| D | |
| E | |

16.2 Peak Particle Velocity and Airblast Limits (§§ 211.151 (c),(d))

Blasts shall be designed and conducted to meet the maximum allowable peak particle velocity indicated by Figure 1 of 25 PA Code Chapter 211.151 (c) and not exceed the noise levels specified in Table 1 of 25 PA Code Chapter 211.151 (d) at the closest building not owned or leased by the permittee or its customer.

The Department may establish an alternative peak particle velocity or airblast level if it determines that an alternative standard is appropriate or if the owner and lessee, if leased to another party, of a structure located on the permit area have each signed a waiver releasing the vibration limit. The waiver shall be clear, knowing and specific. (attachment(s) **NOTE: Additional review time will be necessary if the applicant submits a waiver for an alternative peak particle or airblast limit at a structure.**

16.3 Will the sequence and timing of hole detonation be determined by considering factors such as geology, direction and proximity of homes or other structures, permit boundaries, or the locations of underground or overhead utilities. (§ 77.453) Yes No

16.4 Will the loading of holes be determined by considering factors such as geology, direction and proximity of homes or other structures, permit boundaries, or the locations of underground or overhead utilities. (§ 77.453) Yes No

16.5 Blasting near Dwellings, Public Buildings or Schools (§ 77.564(g)(3))

Will blasting occur within 1,000 feet of any dwelling, public building or school? Yes No

Indicate distance to the nearest dwelling or structure, neither owned nor leased by Permittee, from the area where blasting will occur. 2,005 feet

16.6 If blasting will occur within 1,000 feet of any public building or school, explain how notification required by 25 Pa Code § 77.564(g)(3) will be made.

Not applicable

16.7 Will blasting be conducted within 300 feet of an occupied dwelling? (§ 77.564(g)(4)) Yes No

16.7a If blasting is proposed within 300 feet of an occupied dwelling provide a notarized written waiver from the owner each dwelling specifying the distance blasting may occur to the dwelling (**Note:** If the waiver includes an increase in the peak particle velocity limits or in the airblast limits, in 25 Pa Code Section 211.151(c) and (d), the alternative limits must be specified in the waiver). (Attachment) (§ 77.564(g)(4))

16.8 Will blasting will be conducted within 800 feet of any public road? (§ 77.564(g)(1)) Yes No

16.8a If blasting will be conducted within 800 feet of any public road describe the precautions that will be taken to protect the travelling public (can be submitted as an attachment): (§ 77.564(g)(1))

When blasting within 800 feet of a public road the orientation of the blast will be directed away from the public road. Hole diameters, number of rows, hole sizes, spacings, burdens and the total pounds per delay will be adjusted downward. When needed stemming will be increased

16.9 Blast Area (§§ 77.564(d)(1), 77.564(e))

Describe how the blast area as defined in 25 Pa Code Section 211.101 will be determined, the procedures for notification of all persons who may have access to the blast area, and how the blast area will be secured and safeguarded (can be submitted as an attachment):

All areas in and surrounding the blast area will be cleared prior to blasting. All roads leading into the blast area will be barricaded. Signs will be posted at the mine entrance to control access to the blasting area. At least 1 minute but not more than 2 minutes prior to detonation, sound a warning signal of 3 blasts, each lasting approximately 5 seconds. The warning signal shall be of sufficient power to be heard one-half (1/2) mile from the blast site. After the blaster-in-charge has determined the blast area is safe, the blaster-in-charge will sound an all-clear signal, consisting of one long blast, lasting approximately 10 seconds. This all-clear signal shall be of sufficient power to be heard one-half (1/2) mile from the blast site.

16.10 Underground Mines (§ 77.551)

Will blasting occur within 500 feet to any point over or adjacent to an active or abandoned portion of an active underground mine? Yes No

If yes attach completed MSHA form. (**Attachment**)

16.11 Underground Utility Lines (§ 211.181-182)

Will blasting be conducted within 200 of feet Underground Utility Lines? Yes No

If underground utilities are located within 200 feet of the area where blasting will occur, attach a copy of the notification sent to the owner(s) (submit as an attachment).

If there are any requests for waiver of any of the provisions of 211.182 attach copies of any agreements with the owner(s) of the utilities (submit as an attachment).

16.12 Streams (§ 73 P.S. s 166(d))

If blasting will occur within 100 feet of any streams, identify the stream and indicate the distance blasting will occur from the stream. *Not Applicable*

Stream: _____ Distance: _____

16.13 Public Notice of Blasting Schedule (§ 77.563)

Submit the following to the Department prior to the initiation of blasting.

- a) A Copy of the public notice of the blasting schedule that is published in a newspaper of general circulation in the locality of the area where blasting will occur (submit as an attachment)
- b) A List of the Local governments and public utilities that are located within 1,000 feet of the area where blasting will occur, who received copies of the blasting schedule. (**Note:** These shall be sent a copy of the blasting schedule.) (submit as an attachment)

16.14 Explosive Storage (§ 87.65(a)(11))

Will explosives be stored within the proposed blasting area? Yes No

If "yes" provide current explosives storage security plan number. _____

If no explain the disposition of explosives materials used for this project.

Blasting materials will be delivered to the site as needed. If any materials are not used that day they will be returned to the blasting company. No blasting materials will be stored at the Maggie Lynn site.

16.15 Blast Plan Preparer (§ 211.124(a))

The PA licensed blaster who prepared this application must print and sign name below. (General or Surface Mining Authorization Only)

Licensed Blaster Craig Bryan
Print

Licensed Blaster *Craig Bryan* Date 10/19/21 Blaster's license Number BL- 6627
Sign (General or Surface Mining Authorization)

16.16 Permittee Authorization Representative (§ 77.107)

The permittee or an authorized representative of the permittee must print and sign name below.

Permittee or Authorized Representative Craig Bryan
Print

Permittee or Authorized Representative *Craig Bryan* Date 10/19/21
Sign

16.17 Map (attachment-delineates where blasting will occur and the area within 1,000 feet of where blasting will occur.) (If explosives are going to be stored on the mine site, the location of the explosives storage must be included on the map.) **The map should accurately show, at a minimum, permit boundaries, the locations of streams, gas wells and lines, other underground utilities, overhead utilities and the nearest dwellings and other structures. (§§ 211.124(7)), (77.454(a)(9))**
