RE: PennEnergy Resources, LLC
State Water Obstruction and Encroachment Permit Amendment
B50 Temporary Aboveground Waterline
E0407222-001; APS # 1058722
Beaver County, Economy Borough

Dear Mr. Watson,

This is in reference to the January 15, 2025 request to amend Permit No. E0407222-001. Permit No. E0407222-001 authorized the construction, operation, and maintenance of (7) Megator Dolphin Strainer floating intakes and 0.9 miles of 12-inch diameter high density polyethylene (HDPE) and 12-inch plastic lay flat temporary aboveground waterline in Economy Borough, Beaver County. The intakes will be placed directly in Big Sewickley Creek, a perennial stream, classified as a Trout Stocked Fishery (TSF). The waterline will aerially cross Coony Hollow, a perennial stream, classified as a TSF, and the floodway of UNT 2 to Coony Hollow, an ephemeral stream, classified as a TSF, with use of a super truss system and a temporary timber mat bridge. The waterline will also be excavated within the floodway of Coony Hollow to allow for the crossing of Cooney Hollow Road. The project will result in 0.033 acres of permanent direct impacts and 0.167 acres of temporary direct impacts to Waters of the Commonwealth.

Please be advised that your request is approved in compliance with the provisions of the Clean Water Act, Pennsylvania's Clean Streams Law, the Dam Safety and Encroachments Act, the Flood Plain Management Act, the Administrative Code, and the Rules & Regulations promulgated thereunder. Permit No. E0407222-001 is hereby amended to:

construct, operate, and maintain (7) Megator Dolphin Strainer floating intakes and 0.9 miles of 12-inch diameter high density polyethylene (HDPE) and 12-inch plastic lay flat temporary aboveground waterline in Economy Borough, Beaver County. The intakes will be placed directly in Big Sewickley Creek, a perennial stream, classified as a Trout Stocked Fishery (TSF). The waterline will aerially cross Coony Hollow, a perennial stream, classified as a TSF, with use of a super truss system and a temporary timber mat bridge. The waterline will also be excavated within the floodway of Coony Hollow to allow for the crossing of Cooney Hollow Road. The project will result in 0.033 acres of permanent direct impacts and 0.105 acres of temporary direct impacts to Waters of the Commonwealth.

This authorization does not extend the permit term. Please be advised that ALL permit conditions that were specified in the original permit remain in effect.

If you have questions about your permit, please contact Michael Stephan at 412.442.4164, and refer to Application No. E0407222-001: APS No. 10587222.

Sincerely,

A handwritten signature in black ink, appearing to read 'A. Barravecchio', with a long horizontal flourish extending to the right.
