Subject: Westmoreland Sanitary Landfill  
Minor Permit Modification – Relocated Facility Entrance  
Rostraver Township, Westmoreland County, Pennsylvania  
PADEP Permit No. 100277  
Civil Design Solutions Project 2022-070

Civil Design Solutions, Inc. (Design Solutions) is pleased to present an electronic copy of this Minor Permit Modification Application for the Westmoreland Sanitary Landfill, LLC – Westmoreland Sanitary Landfill facility (WSL) located in Rostraver Township, Westmoreland County, Pennsylvania. This Minor Permit Modification proposes the relocation of the facility entrance for operational improvements. This Permit Modification Application does not propose any changes to the overall configuration of the landfill, the permitted liner grades, the permitted final cover grades or the limits of the landfill disposal area.

### **Modification Summary**

This permit modification proposes to lengthen the landfill access road to improve the truck queuing and improved roadway areas for soil or other materials to separate from vehicles. The lengthened roadway presented with this permit modification proposes the construction of a new approximate 0.3-mile roadway from the scale area to a new drive access onto Tyrol Boulevard located to the north of the existing entrance area. Once constructed, the proposed entrance area will be the only entrance utilized at the site, the existing entrance will be permanently blocked with fence.

This proposed relocated entrance and associated roadway construction is anticipated to require several ancillary permits including: Penn DOT Highwall Occupancy Permit, PADEP Stream Encroachment Permit and NPDES permitting. The determination of the scope and preparation of these ancillary permits is under-way.
