

HAZARDOUS WASTE GENERATORS REPORT INSTRUCTIONS

Aug 3, 2017

(Waste_Generators)

This report provides 7 tabs of hazardous waste generator information from EFACTS. It allows the user to review hazardous waste generator inspections and information listed below.

This report is used for mid-year and end-of-year reporting to EPA. The Start Date must be 10/1/XXXX and the End Date must be 3/31/XXXX or 9/30/2017. A report may be run for a 6 month or 12 month period. For example, 10/1/2016 to 3/31/2017 or 10/1/2016 to 9/30/2017.

1. Enter the FY Begin Date.
2. Enter the FY End Date.
3. Enter All or the Region to review.
4. Click on View Report.
5. Use arrow keys to move through report tabs.
6. The reports can be exported to Excel or CSV.

Report Tab 1: Insp Codes

Complete list of inspection codes in EFACTS.

Report Tab 2: SF Counts Per Region

Total count, broken down per Region, of active and inactive SFs tied to a hazardous waste PF. If “generator code description” is empty, no generator code is associated with that SF.

Report Tab 3: SF Generator Counts: Total count for the State of active and inactive SFs tied to a hazardous waste PF. If “generator code description” is empty, no generator code is associated with that SF.

Report Tab 4: SQG Insp

Total count, broken down by Region, of SQG inspections conducted.

Report Tab 5: CESQG Insp

Total count, broken down by Region, of CESQG inspections conducted.

Report Tab 6: COG Insp

Total count, broken down by Region, of COGEN inspections.

Report Tab 7: Non HW Insp

Inspections entered to EFACTS by another program using a hazardous waste PF other id, or when a hazardous waste inspection gets incorrectly coded to the WMRW program.
