

Tracking of Continuing Education Credits

As an added convenience to SEOs to track their accrued continuing education credits, be advised that the list of “Active SEO by County” has an additional column which itemizes the number of continuing education hours a SEO has earned during the current certification cycle. The credit column should assist you in meeting the 15-credit requirement for the 2-year cycle beginning July 1, 2014 and ending June 30, 2016.

The “Active SEO by County” can be located under the heading Active Sewage Enforcement Officers.

Please remember that the Department will not be taking requests from SEOs for copies of their training records as each individual SEO’s training record was provided at the beginning of the training cycle in July 2014.

The Department anticipates that the list of “Active SEO by County” will be updated periodically.
